Anatomical Pathology Residency Program
RESIDENT COVERAGE OF THE AUTOPSY SERVICE

A. Blocks that do not have a resident assigned:

1. The Chief Resident will come up with a roster to ensure daily coverage by one resident of the autopsy service (Monday – Friday, including Wednesday afternoons) on a rotating basis.

2. Coverage means that the resident will be available to do hospital autopsies that cannot be completed by the pathologist on the service (days with only one hospital autopsy and no coroner's autopsies will be covered by the A1 pathologist).

B. Days when the resident on the autopsy service is on vacation or there is an unexpected absence:

1. There will be no roster for coverage on these days.

2. If the number of hospital autopsies is such that the autopsies that day cannot be completed by the pathologist on the service, then the Chief Resident will be asked to find a resident to help on that day.
