The Vision and Mission of the Department of Anesthesia and Perioperative Medicine, London Health Sciences Centre and St. Joseph’s Health Care, London, The University of Western Ontario is to be an internationally acclaimed academic department in anesthesia, pain management and critical care. We strive to provide exemplary patient care and foster excellence in anesthesia delivery, research and education at the undergraduate and postgraduate levels, and in continuing medical education at regional, national and international levels.

The Department of Anesthesia and Perioperative Medicine (Department) of the Schulich School of Medicine & Dentistry, The University of Western Ontario (UWO) consists of 78 Departmental faculty members who practice at the teaching hospital sites of the London Health Sciences Centre (University Hospital and Victoria Hospital) and St. Joseph’s Health Care, London. The Department provides clinical support to 40 operating rooms/day at both London Health Sciences Centre (University and Victoria Hospitals), and St. Joseph’s Health Care, London. We also provide the spectrum of medical care from conducting preoperative anesthesia assessment to performing the most advanced life-supporting techniques in all perioperative settings such as subspecialty surgery, ambulatory surgery, obstetrics, pediatric care, out-of-OR interventional procedures, acute and chronic pain management, blood conservation management, post-anesthetic care unit, cardiac surgery recovery unit and intensive care units. In particular, the CSTAR (Canadian Surgical Technologies & Advanced Robotics) Research and Training Centre at the London Health Sciences Centre, UWO, is a national centre of excellence for advanced surgical and anesthesia training and research in minimally invasive surgical procedures such as cardiac, thoracic, urological, general and fetal surgery. The CSTAR also received a three year accreditation by the American College of Surgeons’ Program for Accreditation of Education Institutes. This provides an excellent training facility and program for anesthesia in the latest and most advanced minimally invasive surgery management.
The Department provides teaching and training to undergraduate and postgraduate trainees in anesthesia and allied health care fields both at UWO and the Out-Reach Community Program. The Department is well known for its clinical and research excellence in cardiac anesthesia, neuroanesthesia, transplantation, critical care, perioperative blood management, and pain medicine. The Department has been attracting clinical/research fellows and visiting scholars from around the world (Australia, New Zealand, UK, USA, Germany, Singapore, Korea, China, Japan, Columbia, and Saudi Arabia) for training in anesthesia and perioperative medicine, as well as critical care medicine.

RECRUITMENT AND RETENTION

The anesthesia human resource planning at our London teaching hospitals continues to meet the rising demand of OR and non-OR anesthesia services, as well as the provincial wait list access pressure. The Department continues its target recruitment and retention policy, working together with LHSC/SJHC, UWO and Ministry of Health and Long-Term Care (MOHLTC) to improve job satisfaction and academic excellence. Resource initiatives such as a Citywide Anesthesia Academic Practice Plan, AFP Phase 3, HOCC, Academic IMG and Fellowship Program, Anesthesia Care Team Program, and restructuring transition support from institutions continue to enhance the development of the Department. The Department has been very successful in recruiting and retaining our graduating residents/fellows with significant contributions to the academic mandates in their career development.

Three new faculty members joined the Department during this academic year.

Dr. Arif Al-Areibi, MSc MD FRCPC
Dr. Arif Al-Areibi completed his residency in our Department and successfully passed the Royal College exams in June 2008. Dr. Al-Areibi completed his medical degree and training in Libya, and later attained a Master of Science in Physiology at Garyounis University, Libya. Dr. Al-Areibi joined our Department in September 2008 as a full-time consultant and is committed to education development in the Department.
Dr. Ronit Lavi, MD
Dr. Ronit Lavi joined our Department on August 1, 2008. Dr. Lavi completed her medical degree and residency training in Israel (Rappaport Faculty of Medicine, and Rambam Medical Centre, Haifa, Israel). Following her training, she completed a Research Fellowship in the Division of Nephrology and Hypertension at the Mayo Clinic College of Medicine, Rochester, MN from January 2006 to June 2007. She completed a one year Clinical Fellowship in cardiac anesthesia and intensive care at Toronto General Hospital before being recruited as a faculty consultant in our Department. Dr. Lavi focuses on clinical anesthesia research in cardiac surgery and interventional cardiology.

Dr. Luminita Tureanu, MD FRCPC
Dr. Luminita Tureanu was a Regional Anesthesia Fellow in our Department for one year prior to joining our Department as a faculty consultant (regional anesthesia and pain medicine) in August 2008. She completed her medical degree, internship and residency in Romania in the specialization of obstetrics and gynecology. Later in 2002, she began an anesthesiology residency in Chicago, IL at the John H Stroger Jr. Hospital, and following that, completed a Fellowship in pain medicine at the same hospital. Dr. Tureanu’s research interest is in regional anesthesia and pain medicine.

Two future recruits are planned for the 2009/2010 academic year. They are:

Dr. Geoff Bellingham, MD FRCPC
Dr. Geoff Bellingham completed his medical education and the Anesthesia Residency Program at The University of Western Ontario. In June 2009, he completed a one year Clinical Fellowship in chronic pain management at the University of Toronto. He was recruited to London in August 2009 to join our Department, working in the area of chronic interventional pain management.

Dr. Thomas Howlett, MB BCh BAO FCARCSI
Dr. Thomas Howlett will be joining our Department as a full-time consultant in May 2010 and will be focusing on pediatric anesthesia practice and education at the Children’s Hospital at LHSC. He completed his medical training at the National University of Ireland, Galway and is a Fellow of the Irish College of Anaesthetists. In addition, he has completed the Diplomat in Intensive Care Medicine with the Irish Board of Intensive Care Medicine, and has spent two years as a Clinical Fellow in pediatric anesthesia and intensive care medicine at the Hospital for Sick Children in Toronto, ON. Dr. Howlett’s practice will focus in pediatric anesthesia and pediatric critical care in the Department.
FELLOWSHIP

The Fellowship Program as directed by Dr. Rosemary Craen, includes a broad scope of academic programs, provides excellent clinical exposure, as well as teachers and mentors in research. In this academic year, the program includes 8 - 10 fellows (cardiac anesthesia, neuroanesthesia, regional anesthesia and pain, transplantation, and obstetric anesthesia).

ADMINISTRATION

Department faculty continue to contribute an important role in administrative functions outside the Department.

Dr. John Fuller as Medical Director of Perioperative Care, SJHC and a member of the RCPSC Council including as Chair of the Regional Advisory Committee of the RCPSC;

Dr. Bill Sischek as the Chair of LHSC Credential Committee;

Dr. Ron Butler as Site Chief of ICU, LHSC University Hospital, Director of the Cardiac Surgery Recovery Unit, and Vice-President of Professional Staff Organization at LHSC;

Dr. Michael Sharpe as the Critical Care Advisor at Southwestern Local Health Integrated Network (LHIN);

Dr. Fiona Ralley as the Medical Director of the Perioperative Blood Conservation Program at LHSC;

Dr. Neal Badner as Chair of the Research Committee of the Canadian Anesthesiologists’ Society.

Dr. Sal Spadafora has been appointed as a Corresponding Member (General) of the Anesthesia Examination Board of the RCPSC for a two-year renewable term. He is also being appointed as the Associate Dean of Postgraduate Education in the Schulich School of Medicine & Dentistry, UWO.
**Dr. Jim Watson** is the Medical Director of the Respiratory Therapist Program at Fanshawe College and the Anesthesia Assistant Program at London teaching hospitals; he is also an Executive Committee Member of the Anesthesia Section of the Ontario Medical Association.

**Dr. Davy Cheng** continues his active advisory roles on many committees at the London teaching hospitals, University, LHIN, MOHLTC, and National and International anesthesia societies. Recently, he was also elected as Chair of the Management Committee amongst the 16 University Chairs in the Association of Canadian University Departments of Anesthesia (ACUDA).

**CLINICAL**

The Citywide Department has numerous areas of strong clinical activities including transplantation, vascular and thoracic anesthesia, acute pain and regional anesthesia, chronic pain program, critical care, obstetric anesthesia, pediatric anesthesia, etc. in addition to the well known programs of robotic surgery, cardiac anesthesia, neuroanesthesia and perioperative blood conservation. These focused clinical programs continue to develop and expand in the city under the leadership of our site chiefs, Dr. Chris Harle (LHSC-UH), Dr. Neal Badner (LHSC-VH) and Dr. Ian McConachie (SJHC).

**EDUCATION**

The Postgraduate Education Program under the Directorship of Dr. Jeff Granton and Associate Directorship of Dr. Sandra Katsiris continues to thrive and grow, with 47 anesthesia residents and 34 off-service residents hosted from other residency training programs. Residents achieve continued success at the Royal College examinations. The program offers general and sub-specialty rotations (chronic pain, cardiac, neuro, ambulatory, regional, obstetric, thoracic, vascular, pediatric, and preadmission clinic). The Simulation Program at CSTAR led by Dr. Richard Cherry is now an integral and very popular part of training for the residents and medical students. New rotations in airway management, acute pain and in Cardiac Surgery Recovery Unit are being implemented. Rotations throughout Southwestern Ontario (SWOMEN) are offered to residents. Our Department pioneers medical curriculum in palliative medicine and end-of-life care in a critical care setting to the medical
students and residents under the leadership of Dr. Valerie Schulz. Our Continuing Medical Education Program under the leadership of Dr. Ian Herrick and Dr. Mary Lampe feature invited professorships from top academic institutions to our Department.

**RESEARCH**

The Department is committed to enhancing academic productivity and resources including protected time and clinical access to research cases. The Department is ranked among the top in peer-reviewed publications in academic anesthesia departments in Canada. The investigators have been successful in peer-review research grants and contract grants annually. The Department continues to build on the strengths of several outstanding academic programs: Cardiac Anesthesia and post Cardiac Surgical Recovery Unit (Drs. John Murkin, Daniel Bainbridge, Ron Butler, Ivan Iglesias, Phil Jones, Ronit Lavi, Davy Cheng); Critical Care Medicine (Drs. Michael Sharpe, Lois Champion, Ron Butler, Ravi Taneja); Neuroanesthesia (Dr. Rosemary Craen, Dr. Miguel Arango); Transplantation (Dr. Achal Dhir, Dr. Wojciech Dobkowski), Regional Anesthesia and Pain Program (Drs. Su Ganapathy, Pat Morley-Forster, Shalini Dhir, Kevin Armstrong); Evidence-Based Perioperative Clinical Outcomes Program (EPiCOR) (Drs. Janet Martin, Daniel Bainbridge, Davy Cheng); Perioperative Blood Conservation Program (Dr. Fiona Ralley); Airway and Simulator Program (Dr. Tim Turkstra, Dr. Richard Cherry). New academic programs are being developed such as the Clinical Pharmacology (Dr. Craig Railton), Coagulations, and Thoracic/Vascular Programs. Recruitment is targeted at individuals with demonstrated academic and research productivity. The expansion of the Fellowship Program has also resulted in increased academic productivity. Residents play an active role in research and presentations (poster and oral) at the Resident Research Day (co-ordinated by Dr. Indu Singh) held jointly each year with the Anesthesia Program at McMaster University. The Canadian Anesthesiologists’ Society Annual Meeting was also well represented by our Residents and Faculty.

**ACHIEVEMENTS AND AWARDS**

**Dr. Timothy Turkstra**

Top Research Presentation at the 2008 Society for Airway Management Annual Meeting
Dr. Collin Clarke
CAS/Vitaid-LMA Residents’ Research Award 2008
Neuroimaging of Lidocaine-induced Analgesia in Complex Regional Pain Syndrome

Dr. John Murkin
Canadian Anesthesiologists’ Society Research Recognition Award 2008
For outstanding contributions to the knowledge base of our specialty through research into Protection of the Brain During Cardiac Surgery

Dr. Collin Clarke
Awarded second prize of the 2009 CAS Residents’ Competition
Virtual Reality Imaging with Real-Time Ultrasound for Facet Joint Injection – Proof of Concept; supervisor Dr. Daniel Bainbridge

Dr. Ronit Lavi
Canadian Anesthesiologists’ Society, David S. Sheridan Research Award 2009
Sevoflurane Sedation During Primary PCI Intervention

Dr. Jeff Granton
Canadian Anesthesiologists’ Society, John Bradley Young Educator Award 2009
In recognition of outstanding contributions to anesthesia medical education as a master clinician, academic clinical scientist and learner-centred teacher

Dr. Steven Dain
CSA Member Appreciation Award 2009 by the Canadian Standard’s Association
In recognition of his 16 years of Leadership Excellence and participation in the development of the Canadian National and International standards for medical equipment and clinical engineering

Dr. Sugantha Ganapathy
Recipient of the YMCA Women of Excellence Award 2009
In the area of Health, Science and Technology

Dr. Davy Cheng
The Outstanding Contribution Award, honoured at the 30th Anniversary meeting of the Chinese Society of Anesthesiology and the Chinese Medical Association, for the outstanding contribution to the development of Anesthesiology in China (other USA/Europe recipients: Drs. Ron Miller, Adrian Gelb, Paul White, Alex Evers, Mervyn Maze, Anneke Meursing).

ST. JOSEPH’S HEALTH CARE, LONDON

St. Joseph’s Health Care, London is a major teaching facility within The University of Western Ontario, Department of Anesthesia and Perioperative Medicine. Dr. Ian McConachie succeeded Dr. John Fuller as Site Chief in December 2008. Approximately 20,000 surgical cases are performed each year in our modern, fully equipped operating rooms. The surgical focus is on the Hand and Upper Limb Centre, Endourology, Ophthalmology, ENT, General Surgery, Gynecology, Plastic Surgery and care of dental patients. St. Joseph’s is one of only a few sites in Canada offering Robotic Assisted Laparoscopic Surgery for both Urology and Gynecology patients. The Department also offers an Acute Pain Service. The majority of patients are ambulatory though some inpatient beds have been retained. St. Joseph’s Health Care currently acts as the Tertiary Care Obstetrical Level III Centre performing about 3,500 deliveries per year. In addition, in 2009 the Department at St. Joseph’s Health Care became responsible for provision of anesthesia for ECT service at the Regional Mental Health Centre. The actual service is provided by practitioners from all three sites within the city.

The major areas of subspecialty training are regional anesthesia, obstetrics and ambulatory anesthesia with chronic pain management offered through the Earl Russell Multidisciplinary Pain Centre. Fellowships are available in regional anesthesia, obstetric anesthesia and analgesia, chronic pain and, most recently, ambulatory anesthesia. The volume of high-risk obstetrical patients and surgical patients provide a very fertile learning and research ground in these areas of subspecialty care.

The Anesthesia Care Team project has been a major success at St. Joseph’s Health Care, London. Their work enhances the efficiency of the Department, especially in the provision of care in the cataract suite. Further developments of this program are
targeted to the main operating room and enhancement of perioperative care.

An integrated surgical facility comprising modern operating rooms, preadmission clinic, surgical day care and PACU provides an excellent daily working environment. In addition, extensive renovations are nearing final completion which will offer expanded accommodation for our growing Department.

Internal reconstruction and modernizing of a substantial portion of the older building is underway, to improve facilities for the majority of clinical services at St. Joseph’s Health Care, London. The new ambulatory surgical centre is a major portion of the restructuring effort and will provide a firm foundation for future study and care of ambulatory patients.

UNIVERSITY HOSPITAL

At University Hospital we provide anesthesia in a variety of clinical areas. We have been able to maintain our level of service provision throughout the year through a combination of excellent human resources and flexibility from our consultant body and with support from our clinical fellows. There are 16 fully operational operating rooms where we provide anesthesia for cardiac surgery, neurosurgery, general surgery, orthopedics, sports medicine, plastic surgery, urology and ear, nose and throat surgery. Our services are also required for diagnostic and therapeutic procedures in the electrophysiology laboratory, neuro-radiology, cardiac angiography and percutaneous cardiac interventions. Furthermore, we have provided support for, as well as continued, our clinical activity in the preadmission clinic and acute pain service. We also provide 24-hour coverage for liver transplantation. We are very well represented in both the Medical/Surgical ICU and the Cardiac Surgery Recovery Unit consultants bodies.

Clinical and Academic Anesthesia programs and activities at University Hospital include:

**Cardiac Anesthesia**
Dr. Daniel Bainbridge, Dr. Wojciech Dobkowski

**Perioperative Transesophageal Echocardiography (TEE)**
Dr. Daniel Bainbridge, Dr. Ivan Iglesias
**Neuroanesthesia**
Dr. Rosemary Craen

**Liver Transplantation**
Dr. Wojciech Dobkowski

**Acute Pain and Regional Anesthesia Service**
Dr. Kevin Armstrong, Dr. Rakesh Bhandari

**Undergraduate Education**
Dr. Tony Vannelli, Dr. Ivan Iglesias

**Anesthesia Rounds**
Dr. Achal Dhir

**Continuing Medical Education Program**
Dr. Mary Lampe

**Perioperative Blood Conservation Program**
Dr. Fiona Ralley

Dr. Rosemary Craen oversees the Fellowship Program for our citywide Department, as well as the Neuroanesthesia Fellowship. Dr. Achal Dhir and Dr. Wojciech Dobkowski run the Liver Transplant Anesthesia Fellowship Program, Dr. Ravi Taneja supervises the Cardiac Anesthesia Fellowship, and Dr. Kevin Armstrong and Dr. Su Ganapathy run the Regional Anesthesia Fellowship.

There are many clinical research projects both ongoing and recently completed at University Hospital. These activities are made possible because of the commitment and hard work of the physicians who conceive and conduct the research, and because the milieu of our institution supports academia.
The Victoria Hospital, Department of Anesthesia provides clinical service for vascular, thoracic, orthopedic (trauma and spine), plastic including craniofacial, ENT, urologic, oncologic, general surgical and pediatric (ENT, general, urologic, neurosurgical and plastic) surgery. Victoria Hospital also provides anesthesia services to the secondary level obstetric unit in the city. The site’s emphasis is clinical teaching of residents, medical students, and allied health professionals and includes the use of a newly operational simulator program.

**Thoracic/Vascular Anesthesia**
Both subspecialties under the direction of Dr. George Nicolaou have flourished and remain popular as a resident rotation. Both services are leaders in endovascular approaches to their respective pathology. Several recent clinical research projects in these subspecialties have been completed, and others involving Video Assisted Thoracic Surgery (VATS), and pressure limited one lung ventilation are underway. A previous project led to a change in the postoperative epidural analgesia solution utilized.

**Pediatric Anesthesia**
This division is under the guidance of Program Director, Dr. Lynn Coveney, with input from members of the Pediatric Anesthesia Interest Group. It currently supports three dedicated pediatric surgery ORs daily, as well as sedation for endoscopies/colonoscopies, MRIs, CT scans and diagnostic LP/bone marrow biopsies out of the OR three days per week. Further expansion of this service is planned. This division has implemented a “Parental Presence at Induction” Program, and expanded pediatric preoperative assessment and postoperative pain management. Pain management for pediatric patients with epidurals on the ward is offered. Residents and interested staff continue to participate in the nationwide telemedicine conferences hosted by the Hospital for Sick Children, Toronto.

**Obstetrical Anesthesia**
Dr. Sandra Katsiris, the citywide Obstetrical Anesthesia Director, has successfully introduced a citywide standardized obstetrical anesthesia care approach including standardized epidural solutions, PCA and PCEA. The volume of births in this level 2 unit continues to increase, approaching 2,500 deliveries as final planning for the consolidation of all obstetrical anesthesia services in London to Victoria Hospital is underway. Construction at the location has begun for completion in March 2011.
ACUTE PAIN MANAGEMENT AND REGIONAL ANESTHESIA/ANALGESIA

Acute Pain Management and Regional Anesthesia have been combined into one division as many of the anesthesiologists involved are active in both subspecialties and they both compliment each other well. Dr. Sugantha Ganapathy and Dr. Kevin Armstrong are currently co-directors of the division. Dr. Armstrong is responsible for administrative and clinical deliverables and Dr. Ganapathy for research and fellowship in regional anesthesia and acute pain. They are assisted by co-ordinators at each site. The acute pain service co-ordinators are Dr. Rakesh Bhandari (UH), Dr. Kate Ower (VH) and Dr. John Parkin (SJHC). The regional anesthesia co-ordinators are Dr. Shalini Dhir (SJHC), Dr. Gary Simon (VH) and Dr. Tony Vannelli (UH).

Clinical Care
The Acute Pain Service is active at all three teaching hospitals. Approximately 40 of our anesthesiologists provide daily care to inpatients requiring postoperative pain management or consultation. They are supported by two full-time nurse clinicians at LHSC and PACU nurses from all sites. There are between 30,000 and 40,000 patient visits per year.

Regional Analgesia, both neuraxial and peripheral nerve blockade, as part of multimodal analgesia is utilized for patients with pre-existing pain issues or those undergoing surgical procedures with associated significant postoperative pain. Peripheral nerve blockade as the primary anesthetic technique is practiced more selectively for procedures which lend themselves to this mode of anesthesia and analgesia. The greatest number of surgeries would occur, but is not limited, to orthopedic and plastic surgery procedures.
**Fellowship Program**

Two clinical fellows completed the Fellowship in Regional Anesthesia. Dr. Adhikary has joined the University of Pennsylvania at Hershey, USA and Dr. Ravi Kumbharathi has joined the University of Manitoba. The fellowship positions for the coming two years are already filled with excellent candidates.

Dr. Sanjib Adhikary presented an abstract on the anatomic and US evaluation of the axillary nerve and suprascapular nerve at the annual ASRA meeting in November 2008.

Dr. Adhikary presented three abstracts at the Advanced Regional Anesthesia 2009, Invasive Pain Management Techniques and Regional Anesthesia Hands On Workshop organized by Wayne State University, Michigan in May 2009. His abstracts were

1. 3D Evaluation of Lumbar Plexus and Paravertebral Block
3. A Novel New Posterior Approach to the Catheterization of Supraclavicular Brachial Plexus

**Quality Assurance**

The need for improved quality assurance is currently being addressed. In 2008 - 2009 Dr. Steven Dain, Dr. Kevin Armstrong and nurse clinician Cindy Carnegie together with support from the APS group have been working with the PowerChart team to develop bedside charting capabilities. This will allow charting of pertinent information “real time” during patient rounds, which will then be available for analysis at regular intervals. Great appreciation to Carol Hemphill (PowerChart team) for her time and expertise in this project. It is expected that a trial will occur early in the 2009 - 2010 year at University Hospital and subsequent role out to all sites by the end of the year.

**Research Activities**

The division was involved in a multicentre trial on pregabalin for preventing chronic pain following inguinal herniorrhaphy sponsored by Pfizer.

Our division is one of the sites looking at the role of paravertebral block for breast cancer surgery on cancer spread, an outcomes group study from the Cleveland Clinic. Dr. Ganapathy and Dr. Tureanu were the lead investigators.
AMBULATORY ANESTHESIA

The newest academic program offered within the Department is Ambulatory Anesthesia. St. Joseph’s Health Care, London is the main site for ambulatory anesthesia within the city though surgical cases are performed on an ambulatory basis at all sites. A wealth of learning opportunities are offered in ambulatory anesthesia at St. Joseph’s Health Care, London – the largest in numbers of cases of all the anesthetic subspecialties. A fellowship in ambulatory anesthesia may be available to a suitable candidate. Dr. McConachie is also the chair of the ambulatory anesthesia section of the Canadian Anesthesiologists’ Society and is actively involved in the Canadian Ambulatory Anesthesia Research and Education Group (CAARE). As such, Dr. McConachie is the organizer for the ambulatory section events and lectures for the annual scientific meeting of the CAS. Dr. McConachie also reintroduced specific lectures in ambulatory anesthesia to the formal Residents’ Lecture Program. Teaching is otherwise informal. Members of the group, led by Dr. Fuller are involved in research on postoperative monitoring of obstructive sleep apnea patients.

ANESTHESIA ASSISTANT

The past year has continued to build on the success of the Anesthesia Care Team. We have continued with the development of this program. Anesthesia Assistants have been integrated into the work routines of the Department with the cooperation of the entire Department. This has allowed us to reliably provide service for some of the key wait time initiatives such as cataract surgery. In the cataract suite we use a model of care where one consultant supervises two Anesthesia Assistants. Other AAs assist in the block room or monitor patients after major regional blockade or provide special assistance in the operating room for more complex cases. Care of patients outside the OR such as pediatric imaging and procedures, neuroradiology or electrophysiology labs have all benefited from having consistent, reliable assistance in these challenging environments.

In September 2008, Fanshawe College in London initiated a training program for Anesthesia Assistants. The first class has graduated. The Department of Anesthesia and Perioperative Medicine has been involved in the design of this program and has provided a significant amount of classroom and operating room instruction. During the Basic Program, run from September to December, most teaching is provided
by Fanshawe College instructors affiliated with the long-established Respiratory Therapy Department but this will change for the Advanced Program or second semester which runs from January to April. Most of the lectures and workshops are physician directed. Many of the senior anesthesia residents participated in teaching these courses and workshops. Residents and the participating faculty members found this to be a rewarding training experience. Enrollment has begun for next year’s class.

The role of Anesthesia Assistants is generally becoming universal and has been recently adopted by the Canadian Anesthesiologists’ Society. Currently, we are developing new models of care in areas where the Department has not had the human resources to provide coverage. This includes endoscopy and obstetrics with expanded invasive radiology. We have participated in provincial teams in association with the MOHLTC to further develop and define the roles within the Anesthesia Care Team. Review of the application of the ACT model have demonstrated a cost effective, safe and accepted model of care. We are currently awaiting approval from the Ministry of Health for funding to more formally explore and apply the ACT. This should greatly improve patient safety, efficiency and improve the working conditions for anesthesiologists.

CARDIAC ANESTHESIA

The Cardiac Anesthesia Program underwent a reorganization bringing its members to a total of 20. The Fellowship Program continues with 3 - 4 Fellows under the direction of Dr. Ravi Taneja. The program has been modified to focus on intraoperative management with a one month rotation in the CSRU. The TEE Program continues under the direction of Dr. Iglesias, with the weekly Wednesday morning rounds continuing. This year saw the purchase of a 3D ultrasound machine in the cardiac ORs; the first of several to be purchased in order to upgrade the older machines.

The University Hospital cardiac group, under the leadership of Dr. John Murkin, successfully organized the annual “Outcomes” meeting, which over the years has become a well recognized international meeting. The cardiac group also organized the Annual Cardiac Team Meeting - a multidisciplinary, international conference designed to foster exchange and interaction between surgeons, clinical perfusionists and anesthesiologists. Again this year the meeting was held in Mont-Tremblant, QC.
Since the establishment of this 14 bed Cardiac Surgery Recovery Unit at London Health Sciences Centre, University Hospital in March 2005, the cardiac surgery division was consolidated to the London Health Sciences Centre, University Hospital, performing about 1,400 cardiac surgeries per annum. The CSRU specializes in the postoperative care of patients who have had cardiovascular surgery such as bypass, valve replacements, heart transplantation and robotic cardiac surgery. This unit has state of the art equipment to meet the complex needs and fast track recovery of our cardiac surgical patients. The CSRU is medically staffed by cardiac anesthesiologists, critical care medicine, and cardiac surgery. The trainees consist mainly of anesthesia and cardiac surgery residents, critical care fellows, and cardiac anesthesia fellows. A nurse practitioner is also linking the long-term care patients in CSRU and the cardiac surgery ward. The CSRU provides excellent experience in postoperative cardiac surgery care both clinically and academically. A study led by Dr. Richard Novick (CSRU Associate Director and Chair/Chief of Cardiac Surgery) has demonstrated improved postoperative outcomes and morbidities in such specialized recovery units, rather than in the previous model of mixed medical/surgical intensive care units (Can J Anesth 54: 737-743, 2007). The progressive improvements in cardiac surgery patients in terms of morbidity and mortality have been verified at the Cardiac Care Network of Ontario since the establishment of the CSRU. Dr. Ron Butler was appointed as the CSRU Medical Director effective May 2008.
CARDIAC TRANSESOPHAGEAL ECHOCARDIOGRAPHY [TEE]

As in previous years, 2008 - 2009 was another strong year for our service. Once more, all of our Fellows passed the NBE/PTe Exam, and we have to thank our faculty members for their dedication for our programs continued success in teaching Transesophageal Echocardiography (TEE). New equipment was acquired (Phillips IE33) and the program for renewal of our three old remaining units is supported by the Administration and will take place during the next three years bringing our resources to a more updated condition. The Department also owns a Sonosite unit that is being used for vascular access. Another unit will be acquired by the end of 2009 for better support to these procedures. We are pleased to state that most central catheters inserted at University Hospital are guided by ultrasound which keeps pace with the current recommendations to increase patient safety during these procedures.

The diagnostic support provided by the Intraoperative Echocardiography Service has a well established reputation among the different surgical groups and intensive care units and we have been able to help in many different scenarios in the OR in cardiac and non-cardiac surgical procedures but also in postoperative situations in intensive care. We will continue increasing our participation in the perioperative setting as the advantage of the information for diagnosis, monitoring and management of patients gained through the application of ultrasound becomes more widely applied in current medical practice.

Our service was created in 2002 under the leadership of Dr. Daniel Bainbridge. We are pleased to report that after six years our group has grown in quantity and quality with a total of 11 Consultants that currently hold either NBE Certified or Testamur status, a true privilege both in the number and the quality of the people that practice and teach echocardiography in our Department.

Ivan Iglesias
**Clinical Care**
In 2009, an M-Turbo ultrasound machine was donated to the Pain Clinic via the St. Joseph’s Health Care Foundation. This will enable more accurate placement of a number of blocks and avoid the need for fluoroscopic guidance of some procedures.

Dr. Geoff Bellingham will join the Anesthesia staff in July 2009 with a focus on chronic pain management. He spent a year in a Chronic Pain Fellowship at the Wasser Clinic, affiliated with the University of Toronto. Well-trained in ultrasound guided nerve and facet blocks, Dr. Bellingham also has an interest in peripheral neuropathic pain including pelvic pain.

**Education**
Family Medicine Preceptorships are offered in the Pain Clinic for approximately 4 - 6 physicians each year.

Interdisciplinary Pain Rounds continue to be held on the fourth Wednesday of each month. A schedule of past and future speakers is available on our website www.londonpain.ca.

A workshop on neuropathic pain diagnosis and management was held on October 24, 2008, for family physicians and pain specialists in the Southwestern Ontario region. Speakers were Drs. Pat Morley-Forster, Dwight Moulin (Neurology) and Bill McKeough (Family Medicine).

A multidisciplinary selective in Acute and Chronic Pain Management was offered to 100 fourth year medical students. (Dr. Neal Badner and Dr. Pat Morley-Forster). This selective has been offered since 2001.

**Clinical Research**
The SJHC Pain Clinic participated in four pharmaceutical trials in 2008 - 2009. Starting in May 2007, 430 patients have been registered in the Neuropathic Pain Registry. This multi-centre project supported by Pfizer Canada will provide long-range data on outcomes of pharmacotherapy and interventional treatments for neuropathic pain. Patients who meet diagnostic criteria for central or peripheral neuropathic pain are enrolled and followed for 24 months using validated and comprehensive outcome measures. SJHC is the lead site collaborating with McGill.
University, Mt. Sinai (University of Toronto), University of Calgary, and University of Ottawa. This study started enrollment in May 2007. Another ongoing research project is a study of MRI changes with intravenous lidocaine treatment in patients with chronic pain. Dr. Collin Clarke was awarded an Earl Russell Research Grant to conduct this study in patients with Complex Regional Pain Syndrome.

CRITICAL CARE UNIVERSITY HOSPITAL – MSICU

The Critical Care Program at The University of Western Ontario is a multidisciplinary program that provides Royal College postgraduate training in Critical Care Medicine. Trainees gain experience caring for critically ill patients in the Richard Ivey Critical Care Trauma Centre (26 beds) at Victoria Hospital and the Medical Surgical Intensive Care Unit (24 beds) and the Cardiac Surgery Recovery Unit (14 beds) at University Hospital. There is exposure to a wide variety of clinical services within the program including: trauma, major vascular, thoracic, neurological, neurosurgical, transplant and cardiac. The program in critical care has a well-established educational program for trainees, which has been recognized for its excellence by the Royal College of Physicians and Surgeons. There are 17 faculty members within critical care with a range of clinical backgrounds including anesthesia, internal medicine, respirology, emergency medicine and surgery. Faculty members are involved in education, and basic science and clinical research.

If you are interested in postgraduate training, further details can be obtained by visiting our website: http://www.lhsc.on.ca/programs/critcare/pge/
The adult ICU at SJHC was successfully transferred to LHSC in April 2005, in keeping with the mission of hospital restructuring. Staff moved with the program, or found alternative positions within SJHC. It had been identified that there was a need to provide critical care support to certain subgroups of patients scheduled to be cared for at SJHC through to Milestone 2 of restructuring. These include major joint orthopedics, gynecology, and especially high-risk obstetrics. To meet this need, the concept of a “Step Up Capability” was developed for SJHC. This provides staff and physical plant, based from PACU, to intervene in the case of any patient requiring critical care service at SJHC. Staffing includes nurses from PACU, RRTs from the hospital pool, and physicians from the citywide Critical Care Program, with clinical assistant physicians in-house after hours. Patients who can be stabilized remain at SJHC, monitored by the Step Up team. The team transfers those who remained unstable or critically ill, to ICU (LHSC). The Step Up capability also provides the base for the cardiac arrest capability at SJHC, with expanded duties better described by its new name, the Medical Emergency Response Team (MERT).

The Step Up capability was inaugurated on April 25, 2005, coincident with closure of the SJHC ICU. Step Up has operated successfully since then. The numbers of patients and levels of acuity are almost exactly as predicted. This service has allowed continuation of the planned level of obstetric and surgical activity at SJHC. Data collection is ongoing to assist in developing medical emergency response services at SJHC beyond Milestone 2. A committee is currently in the process of developing mechanisms to support higher acuity patient care at SJHC beyond Milestone 2.
EVIDENCE BASED PERIOPERATIVE CLINICAL OUTCOMES RESEARCH GROUP (EPiCOR)

The Evidence Based Perioperative Clinical Outcomes Research (EPiCOR) Group is a multi-disciplinary collaboration between Perioperative Medicine and Anesthesia, Surgery, Pharmacy, and Pharmacology whose mandate is to provide comprehensive systematic reviews, meta-analyses, and health technology assessments of new and existing technologies including medical devices and equipment, surgical and other interventional procedures, drugs and diagnostic techniques in order to inform important perioperative clinical and economic questions with the best available evidence.

The EPiCOR Group has completed research in the following areas:

- **Perioperative Supportive Care**
  - Patient Controlled Versus Nurse Controlled Analgesia
  - NSAIDs Versus Non-NSAID Multimodal Analgesia
  - Amiodarone Perioperatively
  - Postoperative Nausea and Vomiting
  - Perioperative Gastric Acid Suppression
  - Levosimendan for Prevention of Arrhythmia and Death

- **Blood Conservation**
  - Antifibrinolytics
  - Synthetic Colloids Versus Albumin
  - IV Irons
  - Cell Saver

- **Minimally Invasive Surgical Methods**
  - Off-Pump Versus On-Pump Coronary Artery Bypass Surgery
  - Endovascular Versus Open Vein Harvest for CABG (EVH)
  - Video-Assisted Thoracic Surgery (VATS)
  - Thoracic Endovascular Aortic Repair Versus Conventional Open Repair

- **Innovative Surgical & Imaging Techniques**
  - Stentless Valves Versus Conventional Valves for Aortic Valve Replacement
  - Multislice CT, MRI, TEE/TTE Ultrasound, Versus Angiography for Aortic Dissection
  - Surgical AF Ablation (MAZE and related procedures)
International Collaboration
In addition, EPiCOR has collaborated with other international groups to perform evidence-based systematic reviews and consensus statements. These forums provide a unique opportunity to teach surgeons, anesthesiologists and related healthcare personnel about evidence-based decision-making, meta-analysis and systematic review. The following areas have been addressed by EPiCOR-led consensus conferences

- Off-Pump Coronary Artery Bypass Surgery (OPCAB)
- Endovascular Vein Harvest (EVH)
- Transmyocardial Revascularization (TMR)
- Stentless Aortic Valves (SAV)
- Thoracic Endovascular Aortic Repair (TEVAR)
- Perioperative Colloids
- Minimally invasive mitral valve repair (ongoing)

Presentations
EPICOR research has been presented at conferences, research centres and universities locally and internationally. The EPICOR Group also contributed to teaching opportunities and publications for the purpose of raising awareness of the need for evidence-based decision-making.

Presentations done this year include:
- Interpreting the Literature
  Evidence-Based Medicine & Clinical Trial Design
  Workshop Organizer and Presentation
  11th International Congress of Cardiothoracic and Vascular Anesthesia
  Berlin, Germany
- Meta-Analysis & Systematic Review
  Basic Principles and Application to Off-Pump vs On-Pump Bypass Surgery
  Workshop
  11th International Congress of Cardiothoracic and Vascular Anesthesia
  in Association with the German Society of Anesthesiology and Intensive Care Medicine and the Society of Cardiovascular Anesthesiologists
  Berlin, Germany
• Systematic Review & Meta-Analysis of Stentless Aortic Valves
  Presentation
  International Society of Minimally Invasive Cardiothoracic Surgery
  Annual Meeting
  Japan
  November 2008
• Decision-Making Tips to Increase Your Safety Net
  Presentation
  3\textsuperscript{rd} Annual International Patient Safety Symposium
  Antalya, Turkey
• OPCAB Surgery: Do Elderly Patients Benefit More?
  International Medical Congress on Perioperative Care for the Geriatric Patient
  The Mt. Sinai School of Medicine, New York and Czech Society of Anaesthesiology
  and Intensive Care Medicine
  Prague, Czech Republic
• Making Difficult Decisions When the Stakes are High: Drug Formularies & Hospital
  Health Technologies
  Health Policy Showcase, Ivey School of Business
  The University of Western Ontario

LIVER TRANSPLANTATION

The Liver Transplantation Group has been established in our Department for over 30 years. Presently, this group includes five cardiac anesthesiologists with subspecialty in liver transplantation (Drs. Dhir, Dobkowski, Harle, Rally and Vannelli).

This year we provided services to 76 liver transplant patients including 16 living related transplants. The Living Related Liver Transplant Program has been well developed at our centre. Our group is involved in preoperative assessment and qualification of these patients for transplantation procedures. Also, we provide services for patients undergoing liver resection and biliary tract surgeries.

Our Fellowship Program has been well-established for over 25 years. Every year we have two fellows who are involved in all clinical activities of the Department. This program includes a series of seminars, every two weeks, for fellows, consultants and residents, participation in preoperative assessment of all transplant patients during transplant rounds and in preadmission clinic. All fellows have the
opportunity and obligation to be involved in research projects. Also, our fellows participate in pediatric liver transplants, which are performed in London, at Victoria Hospital. Dr. Achal Dhir is the co-ordinator for this program.

Over the last five years, the LHSC - University Hospital Liver Transplantation Group, together with our colleagues from Toronto General Hospital, have co-organized a Transplantation Symposium at the CAS Annual Meeting.

In addition, we have developed a transplantation website which, we hope, will be a national discussion forum for all Canadian transplant anesthesiologists. This website will be in operation from January 2010.

Our plan includes organization of the Canadian Transplantation Interest Group and hopefully, in the future, a Transplantation Section at CAS.

**MEDICAL INFORMATICS**

Over the past year, Dr. Steven Dain has worked extensively with the medical device industry group “Integrating the Health Enterprise” or IHE as an advisor, educator and writer for the committees that are developing the computer to medical device data syntax for critical care ventilators (http://wiki.ihe.net/index.php?title=PCD_RTM_Ventilator) and other medical devices. This will allow the seamless interconnection of equipment from multiple vendors to work together with hospital information systems and other devices. Weekly telephone and internet (WEBEX) conferences along with the IHE Wiki has facilitated the work on this project.

Nora Aghbar, a Grade 11 co-op student from Oakridge Secondary School worked for 2.5 hours daily from January to June 2009 with Dr. Dain, International Chair, ISO Technical Committee 121, Subcommittee 3, and Marigo Portokalis, collating the over 500 technical definitions from the 72 ISO (Organization for International Standardization) anesthesia, critical care and respiratory care standards for the inclusion in the next edition of ISO 4135. Nora and Dr. Dain received a letter of thanks from the Deputy-General of ISO in Geneva, Switzerland for their work.

Dr. Dain has continued work with the International Healthcare Terminology Standards Development Organization and the International Organization for Terminology in Anesthesia devising a standardized vocabulary for the electronic anesthesia
record and quality assurance. This work has been incorporated into the SNOMED-CT nomenclature that has been adopted by seven countries worldwide. This will allow clinical, research and quality assurance data to be unambiguously compared and combined between multiple hospitals and countries for large scale studies.

Locally, Dr. Steven Dain, Dr. Kevin Armstrong, Cindy Carnegie RN, and Carol Hemphill RN of Information Management have developed an electronic medical record and data collection system within PowerChart for the Acute Pain Service. This will be introduced in the fall of 2009 and will replace paper based records for Acute Pain Service visits and provide data for quality assurance initiatives. They are going to evaluate different means of data entry, from bedside tablet computers to WOWs.

Dr. Dain has been working with the citywide Information Management Department on a number of projects including wireless policy and procedures, use of smart phones and cellular phones on the hospital network, electronic learning management systems and Cisco unified communications systems.

Dr. Dain participated in the Healthcare Information and Management Systems Society Annual Meeting in Chicago, IL in May 2009 and helped demonstrate medical device interoperability at the Massachusetts General Hospital’s MD Plug and Play Scientific Exhibit.

**NEUROANESTHESIA**

The aim of the Neuroanesthesia Fellowship Program is to provide advanced training to those individuals who either plan to enter academic anesthesiology with an emphasis in neurosurgical anesthesia or those who wish to practice in a setting that has a large number of neurosurgical and neuroradiological procedures. Trainees gain knowledge not just through case experience, but also through an organized teaching program. The Fellowship is designed to provide expertise in the following areas:

**Clinical Neuroanesthesia**
*Cerebrovascular Surgery and Endovascular Treatment*
We are a national referral centre for the management of patients with cerebral aneurysms and arteriovenous malformations.
Surgery for Intractable Epilepsy
While we have been doing this type of surgery for more than two decades, it is only recently that neurologists and neurosurgeons worldwide have come to realize the therapeutic potential of such surgery and this has resulted in epilepsy surgery becoming one of the “fastest growth areas” in neurosurgery. Patients are done awake but sedated so that their speech and motor areas of the brain can be mapped prior to surgical excision.

Stereotactic Surgery
This is used for diagnostic biopsies, management of chronic pain and movement disorders, and the management of intractable epilepsy. Each of these requires different anesthetic approaches.

In addition to the above “special areas”, fellows will be exposed to a wide variety of the more usual neurosurgical procedures, including endoscopic neurosurgery, craniotomies for tumors and hemifascial spasm, carotid endarterectomy, and spinal instrumentation.

Monitoring/Diagnostic Skills
Fellows will have the opportunity to learn how to use Transcranial Doppler, Cerebral Oximetry, Evoked Potential and EEG monitoring during surgery.

Non-Anesthesia Experience
Fellows will spend a brief period on the epilepsy service to have a better understanding of the total management of patients with epilepsy and to learn (much) more about the reading, use and potential of EEG monitoring.

As well, a similar brief period will be offered in the Neuroradiology Department to learn more about the indications and uses of diagnostic and interventional neuroradiology and to become much more facile with the interpretation of CT scans, MRI, etc.

Research/Academic Activities
The Department offers a variety of clinical research opportunities.

It is our expectation that each fellow will complete at least one research project taking it from conception through to completion. In addition, each fellow is expected to write at least one review article/book chapter. Further participation in research and writing activities is always welcomed and encouraged.
Under supervision, fellows will also review manuscripts submitted to a variety of anesthesia journals, abstracts submitted to anesthesia scientific meetings, and grant applications. These activities together with the research activities outlined above will provide fellows with an excellent insider’s view of the entire research process.

For fellows interested in medical education, we encourage them to take the 2-day or the 5-day course “Teaching at the University Level” offered by The University of Western Ontario. For those who anticipate that teaching will be a major component of their career, we advise our 30-week teaching course for medical educators.

**OBSTETRICAL ANESTHESIA**

The past year’s volume of deliveries in the city approximated 6,500, a number that has been relatively stable for the past few years. There continues to be an increase in the relative number of complex maternal care patients at LHSC-VH. SJHC remains the tertiary obstetrical referral centre in the city, responsible for the majority of high-risk obstetrical anesthesia and neonatal care.

Internal work on The Grace Donnelly Women’s and Children’s Health Pavilion at LHSC-VH has begun. The structure template includes four dedicated c-section operating rooms, with all labour and delivery services concentrated in one wing of the building. Although budgetary pressures have never been higher, it is hoped that the design will be completed with the intended up-to-date, efficient, functional use of space. The current estimation for consolidation of obstetrical anesthesia services at this site is November 2011. Consolidation will mean a change in the approach to provision of obstetrical anesthesia services, necessitated by volume of cases. Organization of anesthetic workforce will likely mean that two consultants, supported by fellows and residents, will be dedicated to the birthing centre. One will be responsible for booked, elective c-sections, while the second one will remain responsible for labour analgesia and urgent and emergent c-sections. Discussions regarding the specific details of anesthetic coverage have begun, and will be further delineated once the consolidation date is closer.

Despite the corporate decision to forgo participation in the fourth phase of the MOREOB (Managing Obstetrical Risk Efficiently) program in London, the multi-disciplinary approach to obstetrical care has continued to flourish. Mock obstetrical emergency drills at both SJHC and LHSC-VH continue, as part of ongoing education.
and improving the team approach to patient safety.

The core resident rotations through the obstetrical unit at SJHC continued to be fully subscribed. Resident exposure to an educational experience with challenging obstetrical anesthesia cases occurs at both sites. Obstetrical cases continue to figure prominently in resident research and presentations. Resident exposure to obstetrical anesthesia in the city continues to thrive.

The Obstetrical Anesthesia Fellowship program has had Dr. Marcos Silva as a clinical fellow this year, and will welcome Dr. Kristine Marmai next year.

PALLIATIVE CARE IN CRITICAL CARE

Integrating Palliative Care for Critical Care patients has become a provincial, national and international initiative. The reasons London Health Sciences Centre has a systems approach to end of life, palliative care in critical care, and as sited in the literature, are: one in five deaths in the population occur in ICU; ICU providers need to know how to provide end of life care; a large proportion of ICU patients will die in or shortly after ICU discharge; palliative symptom management applies to ICU at risk of dying patients who survive, particularly if quality of life has been seriously affected; and palliative care principles and practices provide an opportunity to discuss care planning after discharge from critical care, and may determine the circumstances to return to ICU. Therefore, London Health Sciences Centre is integrating end of life care in our: Critical Care Trauma Centre, Medical Surgical Intensive Care Unit, Cardiac Surgery Recovery Unit, and Trauma Observation Unit settings.

LHSC Critical Care Program has a dedicated palliative medicine consultant available within the units. The role of the palliative medicine consultant in the ICU setting is based on clinical, educational, administrative and research objectives.

Clinically, consultations are provided in critical care settings for end of life care support, and symptom management. The Palliative Care Service in Critical Care links directly to the general palliative care service LHSC, for their ward consultations and transfers to a palliative care unit. Palliative care services support the Critical Care Outreach, Rapid Response Team.
Palliative care education is provided on each junior resident rotation, within the senior resident half day education, and directly through bedside education during consultations. The palliative medicine consultant is involved in Interdisciplinary Resource Groups for end of life care and humanistic care initiatives. These initiatives are designed to improve the quality of patient care, and the comfort in staff providing end of life care in critical care settings. Comprehensive groups encompass nurses, physicians, social workers, registered respiratory therapists, spiritual care providers, volunteers, critical care administrators, and our LHSC ethicist.

The palliative medicine consultant administratively collaborates with critical care personnel during end of life policy decision-making including policy development and implementation. As well, from a research perspective, Palliative Care in Critical Care supports national CIHR projects, and local research involving critical care residents.

LHSC values end of life care principles and practice as an integral service in delivering comprehensive care in the critical care. The London Health Sciences Centre integration of palliative medicine into the critical care initiative was made possible through the vision and support of the Department of Anesthesia and Perioperative Medicine.

**PEDIATRIC ANESTHESIA**

The Pediatric Anesthesia subspecialty group, aided by our capable anesthesia assistants, provided anesthesia support for over 1,600 out-of-OR cases. Demand for this service continues to grow, and future expansion is being considered.

The Department continues to actively pursue recruitment of a fellowship pediatric anesthesiologist, in order to enrich our clinical experience. In addition, one of our PGY4 residents has accepted a fellowship position at the Hospital of Sick Children, Toronto, ON. The subspecialty group will provide further training within the Department for this candidate, as required.

In January 2009, the pediatric complex pain and symptom management support team was implemented. So far the team has been consulted for 39 patients. Funding for 1.5 FTE physicians’ is being sought in a joint proposal from the Department of Pediatrics and the Department of Anesthesia and Perioperative Medicine.
As of July 1, 2009, Dr. Mohamad Ahmad will take over the leadership role of the pediatric subspecialty group. Upcoming challenges include creating new educational opportunities for residents and consultants, through conventional lectures, MM rounds and also simulator programs. Preparations for the next phase of consolidation of services, especially the relocation of the NICU will also be a priority.

**PERIOPERATIVE BLOOD CONSERVATION**

The Perioperative Blood Conservation Program continues to be integrated into the general management of all surgical patients that have a risk of requiring a perioperative blood transfusion. The medical directives for the use of preoperative intravenous iron, erythropoietin and preoperative autologous donations were passed by the Medical Affairs Committee and this had added to the streamlining of the program. A request to extend the program to cover St. Joseph’s Health Care was unable to be addressed due to inadequate personnel to cover this expansion. However, individual requests from any institution or surgical service are reviewed when time and resources permit.

The volume of patients reviewed by the PBCP each month continues to grow and is in excess of 200 patients per month. Services that use the program now include orthopedic, cardiac, urology, vascular, general and gynecological. In addition, all patients refusing blood products, whether for religious reasons or not, are seen by a member of the PBCP team and their management reviewed and any appropriate interventions initiated. Recently the program has expanded into the surgical area of patients undergoing resection for colon/rectal disease, including cancer, and hepatic resections. The use of a multi-model approach utilizing both preoperative hemoglobin augmentation and intraoperative cell sparing techniques such as acute normovolemic hemodilution and cell salvage has produced excellent results in reducing transfusion rates in these surgical populations.

Members of the PBCP have been very active academically and requests to present information regarding the program at LHSC are increasing. This is particularly prevalent for the use of intraoperative tranexamic acid for arthroplasty procedures after presentations of our results at several scientific conferences. In addition a manuscript describing these results has been submitted for publication. Other presentations have included lectures at the annual meeting of the Society for the Advancement of Blood Management, Canadian Orthopedic Association and at
the annual provincial transfusion committee forum. In addition, residents have been encouraged to participate in the various ongoing research projects run by the program. These include a) the introduction of a Blood and Blood Product Transfusion pre-printed order sheet with orthopedic surgery patients and b) utilization of fresh frozen plasma in the Cardiac Surgical Recovery Unit.

Education into the appropriate ordering of all blood products has been one of the main focuses of the program this year. Lectures on blood management have now been incorporated into both the first year anesthesia and surgical resident curriculum lecture series. It is hoped that by educating the junior residents at the beginning of their training that they will develop good blood ordering practices during their residency and continue with these as consultants.

SIMULATION (CSTAR)

Medical Director - Dr. Richard Cherry
Education Director - Dr. Lois Champion
Research Director - Dr. Ron Butler
Instructors - Dr. Brian Church, Dr. Jeff Granton

The Simulation Program continued to thrive through its second academic year. In summary, we have continued to deliver simulation based crisis management training to anesthesia and critical care residents while expanding the program to include more undergraduate medical student exposure. Research collaboration has grown and alliances are being formed with other diverse faculties at the University. Locally, the general awareness and interest in simulation has expanded as a result of our Department’s work.

In the last academic year, the Simulation Program delivered and debriefed over 270 simulation scenarios to more than 300 participants. Development of novel and goal directed scenarios have progressed to accommodate the expanded student base.

Participants continue to be drawn from multiple areas of healthcare. Anesthesia residents and critical care junior residents make up the majority of simulation participants with the latter being composed of residents from almost every postgraduate program in the Schulich School of Medicine & Dentistry. The program also continues to deliver critical event simulation training to surgical junior residents, critical care fellows and other specialized training groups such as CCOT.
For the second consecutive year, we enjoyed providing a simulation experience to first year medical students during their consolidation week. This voluntary program afforded 84 students an opportunity to put their clinical assessment, decision-making and management skills into practice in the simulation environment. Additionally, we continued to provide an animated curriculum for the fourth year resuscitation course.

Feedback from participants continues to be overwhelmingly positive. The simulation experience is consistently rated as positive and beneficial for recognizing and managing critical events. Participants also find the experience useful for improving communication skills and overall clinical situation awareness.

During the last year, strategic research alliances have been made with the Department of Surgery, The Office of Inter Professional Health Education and Research, and the Ivey School of Business resulting in submission of several grant proposals related to the integration of various simulators and the use of simulation for multidisciplinary team training. In conjunction with Dr. Bob Kiaii, the Simulation Program has been funded through the American College of Surgeons to pursue this particular type of training with specialized cardiac operative teams.

We continue to make efforts to expand our instructor pool both from inside and outside the Department. Demand for this style of training continues to grow at an astounding rate. The Simulation Program currently has an excellent collaborative relationship with CSTAR and we look forward to completion of the Kelman Centre for Advanced Learning in 2010. The Kelman Centre will provide two dedicated, fully equipped simulation rooms and debriefing facilities with the capability to also handle large group simulations for team processes.
THORACIC AND VASCULAR ANESTHESIA

The academic Thoracic and Vascular Anesthesia Program continues to thrive and grow at an exponential rate in the Department of Anesthesia and Perioperative Medicine at The University of Western Ontario. Located at Victoria Hospital, it is an extremely busy program covering all types of complex elective and emergency cases, with the exception of lung transplantation.

Vascular surgery operates five times a week and Thoracic surgery four times a week. We have monthly morbidity, mortality and multi-disciplinary rounds with our surgical colleagues to assure quality control and to keep up on current events.

The majority of vascular and thoracic patients coming through our institution have multiple co-existing diseases including severe cardiorespiratory compromise. These patients have an extensive preoperative evaluation by anesthesia and/or internal medicine, cardiology and respirology. We have developed a multi-disciplinary perioperative high-risk clinic for optimization and follow up of these patients. The Thoracic and Vascular Surgical Programs have their own postoperative step-down monitored units with invasive monitoring capabilities.

Thoracic
The robotic and video-assisted thoracic surgical programs (VATS) are well developed at our institution and currently account for 80% of cases, the remainder being open thoracotomies or investigative procedures. On average, per year, we perform 300 major pulmonary resections and 80 esophagectomies. We have the largest experience with esophagectomies and VATS procedures in Canada. To enhance our clinical experience and improve our teaching program we have developed an advanced VATS surgery and anesthesia workshop using a pig model. Here, consultants can enhance their skills in fiberoptic bronchoscopy and management of one lung ventilation. The pediatric thoracic anesthesia program is evolving with the recruitment of a pediatric thoracic surgeon. Pediatric thoracic procedures include investigative, video-assisted and open procedures. Alongside this, is the adult and pediatric regional anesthesia and acute pain program, allowing for excellent perioperative pain management.
Vascular
The Vascular Division of Surgery at Victoria Hospital has and continues to be a pioneer in endovascular stenting of abdominal and thoracic aneurysms and claims one of the largest series in North America. Ruptured abdominal and thoracic aneurysms that have favorable anatomy are repaired by the endovascular route at our institution. The thoraco-abdominal aneurysm program is well developed and these aneurysms are now generally repaired using endovascular branched stents. The thoraco-abdominal aneurysms that cannot be repaired by using endovascular stents are repaired utilizing partial left heart bypass. Recently, we have started repairing aortic arch aneurysms via the endovascular route. We use rapid ventricular pacing to optimize surgical conditions before stent deployment. On average per year, we perform 150 open abdominal aneurysm repairs, 35 endovascular thoracic, 150 endovascular abdominal and 10 endovascular thoraco-abdominal aneurysm repairs.

Transesophageal Echocardiography (TEE)
Our Transesophageal Program is well developed with formal teaching and multi-disciplinary weekly rounds. TEE is specifically available for management of thoracic aneurysm stenting and for adjunctive management of the vascular patient with associated cardiac disease. While not every anesthetist involved in vascular anesthesia is experienced in TEE, there is usually one anesthetist experienced in TEE, available for guidance.

Research Projects in Progress
- Role of continuous positive airway pressure and positive end-expiratory pressure on PaO₂ during one-lung ventilation utilizing lung protective ventilation strategies
- Arterial pCO₂ changes during thorascopic surgery with CO₂ insufflation and one lung ventilation
- Use of near-infrared spectroscopy for monitoring spinal cord perfusion in endovascular repair of thoracic aortic aneurysms
- Biochemical markers of spinal cord ischemia in patients undergoing thoracic aortic endovascular repair

Residents Training
Our Residency Program includes two four-week blocks of subspecialty training in vascular and thoracic anesthesia. Educational objectives are clearly outlined and monitored through daily assessments. Reading material is provided and residents are encouraged to partake in clinical research. At the beginning and the end of their
rotations, the residents have an MCQ examination to assess improvement during their rotation. An oral examination is also administered at the end of the rotation.

**Fellowship**

Our Fellowship Program is well established with ongoing clinical research opportunities, in collaboration with our surgical colleagues. The program is one year in duration. Each week, the fellow will work two days independently in the operating room, one day in vascular and one day in thoracic with a consultant. The fifth day is for academic and research projects. The fellows are encouraged to attend x-ray rounds, thoracic/vascular rounds, fiberoptic bronchoscopy clinics and transesophageal rounds. Reading material is provided and fellows are encouraged to go to another centre for two weeks to broaden their experience. The Fellowship Program is extremely flexible, and is designed to accommodate the individual fellow’s needs.

**Summary**

Overall, the Thoracic and Vascular Program at Victoria Hospital is a very busy program with an incredible variety of interesting and complex cases. It is constantly evolving to keep up with medical and technological advances, to ensure that patients receive the most optimal perioperative care currently available. The program offers excellent opportunities for fellows to become proficient in adult and pediatric thoracic/vascular anesthesia and transesophageal echocardiography, both in a clinical and research setting. It is designed to meet the individual’s needs, along with the best exposure to the available clinical caseload.
Fellowships in cardiac, neurosurgical, transplantation, regional, obstetrics, pain management, and vascular & thoracic anesthesia are offered each year at the London Health Sciences Centre and St. Joseph’s Health Care, London. Fellowships are 12 months in duration.

Programs are individualized to meet the goals of successful applicants. Generally, clinical experience is the focus along with improvement in clinical research. Fellows spend approximately four days per week in clinical activities with one day per week protected for non-clinical activities, and participation in night call schedule (from home). Fellows are also encouraged to be actively involved in resident, medical student and nursing education, didactic lectures and to participate in anesthesia rounds and specialty conferences. Applications are usually considered 12 - 18 months prior to the start date.
POSTGRADUATE EDUCATION

As of July 2008 Dr. Sal Spadafora stepped down as Program Director and moved on to the challenging role of Associate Dean, Postgraduate Medical Education, for the Schulich School of Medicine & Dentistry. Dr. Jeff Granton has assumed the position of Program Director and is looking forward to continuing to build on the framework built by Dr. Spadafora. During the 2008 - 2009 academic year, the Postgraduate Education Program of the Department of Anesthesia and Perioperative Medicine at The University of Western Ontario had 42 anesthesia residents and over 30 off-service residents hosted from other residency training programs. In addition, we are pleased to be assisting with the training of Physician Assistants from the Canadian Forces.

The program continued to provide excellent teaching, clinical exposure, research opportunities and a comprehensive approach that involved virtually every member of the Department, citywide, in some capacity. The overall program continues to strive for excellence in training that prepares our candidates for a career of both clinical and scholarly activity.

Educational Activities

The program continues to offer high quality general and subspecialty rotations including

- Acute Pain
- Airway Management
- Ambulatory Anesthesia
- Cardiac Anesthesia
- Chronic Pain
- Neuroanesthesia
- Obstetric Anesthesia
- Palliative Medicine
- Pediatric Anesthesia
- Perioperative Medicine
- Preadmission Clinic
- Regional Anesthesia
- Thoracic Anesthesia
- Vascular Anesthesia
Resident Research Day
Our resident research day took place in Hamilton, Ontario on June 12, 2009. This full day event, held jointly with the Anesthesia Program at McMaster University, was a great success. The University of Western Ontario residents presented the following excellent work:

- Dr. Amanda Smitheram
  Anesthetic Management of a Child for Esophagectomy
- Dr. Collin Clarke
  Virtual Reality Imaging with Real Time Ultrasound for Facet Joint Injection
  A Proof of Concept
- Dr. Phil Kruger
  Anesthetic Management for Cesarean Delivery in a Patient with Anderson-Tawil Syndrome
- Dr. Tim Maxwell
  A Successful Anesthetic Technique in a Patient with Giant Bullous Emphysema
- Dr. Diem Tran
  Arterial PCO\textsubscript{2} Changes During Thoracoscopic Surgery with CO\textsubscript{2} Insufflation and One Lung Ventilation
- Dr. Kristine Marmai
  Anesthetic Considerations for a Femur Osteotomy in a Child with Congenital Insensitivity to Pain
- Dr. Kenneth Ryan
  The Frequency of Postoperative Hypoxemia in Patients with Obstructive Sleep Apnea Undergoing Major Surgery

Our residents also played an active role in presentations at the annual Canadian Anesthesiologists’ Society (CAS) meeting in Vancouver, BC in June 2009. We are very proud that Dr. Collin Clarke won second place in the national CAS Resident Research Competition for his project, Virtual Reality Imaging with Real Time Ultrasound for Facet Joint Injection – A Proof of Concept.

Simulation
Simulation is now a core component of the Residency Training Program with regular sessions at all levels of residency training. Led by Dr. Richard Cherry, this program allows anesthesia residents to practice vital crisis resource management skills and is rapidly becoming one of the most popular aspects of the residency program.
2008 - 2009 PGE Committee

The following people have served the Postgraduate Education Program and I wish to acknowledge them for their help and thank all the faculty members for their hard work.

Each and every member of the Department of Anesthesia and Perioperative Medicine makes this program a success. A special thanks is extended to Ms. Linda Szabo, our Education Co-ordinator, who helps make every component of the program run smoothly and efficiently.

As I look back on my time as Program Director in anesthesia, I am overwhelmingly pleased by the broad base of support from all clinical faculty at all sites for our educational mandate. It has been a pleasure to lead such a dedicated group of teachers and learners.

PGE Committee Members for 2008 - 2009

- Dr. Kevin Armstrong - St. Joseph’s Health Care, London Site Co-ordinator
- Dr. Davy Cheng - Department Chair/Chief
- Dr. Richard Cherry - IT/Simulation Co-ordinator & Royal College Examiner
- Dr. Rooney Gverzdys - Victoria Hospital Site Co-ordinator
- Dr. Rosemary Craen - University Hospital Site Co-ordinator
- Dr. Sandra Katsiris - Associate Program Director and Royal College Examination Committee
- Dr. Ed Roberts - SWOMEN Windsor Representative
- Dr. Indu Singh - Research Co-ordinator
- Dr. Mark Soderman - Community Anesthesia Representative
- Dr. Jeff Granton - Program Director
- Ms. Linda Szabo - Education Co-ordinator

PGE Committee Resident Representatives

- Dr. Andreas Antoniou, Chief Resident
- Dr. Kenneth Ryan, PGY3 Junior Resident Representative
- Dr. Kevin McKeown, PGY2 Junior Resident Representative
The 2008-2009 academic year at the Schulich School of Medicine & Dentistry marked a year of significant change with restructuring and expansion to the University of Windsor program. As of September 2008, the complete undergraduate program began in Windsor with 24 first-year students, from a class 147-strong at UWO. This is a trend seen across Canada with medical schools developing partnerships with other universities and communities to extend the reach of medical education. The Windsor program is equipped with state-of-the-art videoconferencing technology and a highly motivated faculty. In the spring of 2009, the Ontario Government announced further medical school expansions, with the Schulich School of Medicine & Dentistry adding 24 new positions by 2011, bringing the first-year class to 171! Our Department of Anesthesia and Perioperative Medicine continues to play an important role in all four years of the undergraduate medical education program at UWO and Windsor. The popularity of our Anesthesia Clerkship rotation has led to a change in the nature of the rotation from a two week selective to a mandatory rotation as part of the surgical clerkship block in the coming academic year. The Department of Anesthesia and Perioperative Medicine, at UWO is committed to the education of medical students. The operating rooms continue to provide an enriched educational environment for one-on-one teaching with our highly motivated and skilled faculty. Our goal remains the same; to make the Anesthesia Clerkship rotation an excellent clinical learning experience.
CONTINUING MEDICAL EDUCATION

Citywide CME events for consultants, fellows, residents and Southwestern Ontario anesthesiologists were

**Departmental Citywide Grand Rounds**
- Perioperative Anesthesia Management for Periaortic/Transfemoral Valve Replacement
- Presentation
- Massimiliano Meineri, MD and Marcin Wasowicz, MD, PhD
- Assistant Professors, Department of Anesthesia
- University of Toronto
- Staff Anesthesiologists, University Health Network
- Toronto General Hospital
- June 24, 2009

**Outcomes XIII, 2009 – Barbados**
- Jointly Sponsored by
- The Department of Anesthesia and Perioperative Medicine
- The University of Western Ontario, Schulich School of Medicine & Dentistry
- London, ON;
- Wake Forest University School of Medicine, Winston-Salem, NC, USA;
- University of West Indies, Barbados, WI
- Organizers
- R. Clive Landis PhD, Barbados, WI
- John M. Murkin MD, London, ON
- David A. Stump PhD, Winston-Salem, NC, USA
- Barbados, WI
- May 27 - 30, 2009

**Perioperative Multidisciplinary Grand Rounds**
- The Management of Acute Pain in the Patient with Chronic Pain
- Presentation by
- Dr. Robert McMurtry - Hand and Upper Limb Department
- Dr. Kevin Armstrong - Department of Anesthesia and Perioperative Medicine
- Dr. Katherine Ower - Department of Anesthesia and Perioperative Medicine
- May 21, 2009
Departmental Citywide Grand Rounds
Dazed and Confused: Perioperative Cognitive Disorders
Presentation by
Greg Bryson, MD, FRCPC, MSc
Department of Anesthesiology
The Ottawa Hospital, Ottawa, ON
April 29, 2009

Multidisciplinary Dinner Lecture
Highlights of the 2nd American Fluid Debate
Presentation by
Anthony Michael Roche, MBChB, FRCA, MMed (Anaes)
Assistant Professor, Department of Anesthesiology
Duke University Medical Center, North Carolina
April 16, 2009

The Winter Cardiac Team Meeting 2009
Jointly Sponsored by
The Department of Anesthesia and Perioperative Medicine
The University of Western Ontario, Schulich School of Medicine & Dentistry
The Montreal Heart Institute, University of Montreal
Conference Chair
Dr. John M. Murkin
Scientific Committee
Drs. D. Bainbridge, D. Cheng, S. Dain, A. Denault, W. Dobkowski, I. Iglesias, B. Kiaii, and Mr. A. Cleland
Organizing Committee
S. Adams & M. Portokalis
Mont-Tremblant, QC
February 13 - 15, 2009

Departmental Citywide Grand Rounds
Research in Trauma and Emergency Situations
Presentation by
Prof Ian Roberts, MB, MRCP, PhD, FFPH
Professor of Epidemiology and Public Health
London School of Hygiene & Tropical Medicine
University of London, UK
February 11, 2009
**Departmental Citywide Grand Rounds**  
New Ways of Thinking About Complex Regional Pain Syndrome  
Presentation by  
Pat Morley-Forster MD, FRCPC  
Kate Ower, MD, FRCPC  
Collin Clarke, MD PGY4  
Department of Anesthesia and Perioperative Medicine  
London Health Sciences Centre, St. Joseph’s Health Care, London  
January 28, 2009

**Perioperative Multidisciplinary Grand Rounds**  
When Patients and Their Surrogates Say ‘No’  
Presentation by  
Mr. Robert Sibbald - Medical Ethics  
Dr. Kevin Coughlin - Neonatology  
January 21, 2009

**Departmental Citywide Grand Rounds**  
Microanatomy of Nerves: Implications for Regional Anesthesia  
Presentation by  
Andre P. Boezaart, MD, PhD  
Professor of Anesthesia & Orthopaedic Surgery and Rehabilitation  
University of Florida College of Medicine  
Gainesville, FL, USA  
December 3, 2008

**CSTAR’s Varkey Ultrasound Guided Anesthesia & Anatomy Update 2008**  
Jointly Sponsored by  
The Department of Anesthesia and Perioperative Medicine  
The University of Western Ontario, Schulich School of Medicine & Dentistry  
Canadian Surgical Technologies & Advanced Robotics (CSTAR)  
London Health Sciences Centre  
Course Director

Jacques E. Chelly, MD, PhD, MBA  
Professor of Anesthesiology and Orthopedic Surgery  
University of Pittsburgh School of Medicine  
Pittsburgh, PA, USA  
September 23, 2008

**Departmental Citywide Grand Rounds**

Tight Glucose Control in the Perioperative Period: Yes or No?  
Presentation by  
Phil Jones, MD, FRCPC  
Assistant Professor, Department of Anesthesia and Perioperative Medicine  
The University of Western Ontario, London Health Sciences Centre  
September 17, 2008

**RESIDENT RESEARCH**

UWO anesthesia residents continued to be active in research. They participated in local, national and international meetings.

Residents participated in the Midwest Anesthesia Residents Conference (MARC 2009) which was hosted by Northwestern University, Chicago, IL, USA. Resident presenters from UWO and their presentations included

- Dr. Amanda Smitheram  
  Anesthetic Management of a Child for Esophagectomy
- Dr. Phil Kruger  
  Anesthetic Management for Cesarean Delivery in a Parturient with Andersen-Tawil Syndrome
- Dr. Tim Maxwell  
  A Successful Anesthetic Technique in a Patient With Giant Bullous Emphysema
- Dr. Kristine Marmai  
  Anesthetic Considerations in a Child with Congenital Insensitivity to Pain

Dr. Kristine Marmai was awarded first prize for her presentation.
UWO residents presented at the Mac-Western Anesthesia Resident Research Day Exchange which was hosted by McMaster University on June 12, 2009. UWO presenters and their presentations included

- Dr. Amanda Smitheram
  Anesthetic Management of a Child for Esophagectomy
- Dr. Phil Kruger
  Anesthetic Management for Cesarean Delivery in a Parturient With Andersen-Tawil Syndrome
- Dr. Tim Maxwell
  A Successful Anesthetic Technique in a Patient With Giant Bullous Emphysema
- Dr. Marcos Silva
  Anesthetic Management of Cerebellar AVM During Pregnancy and Ultrasound Guided TAP Blocks for Post CS Pain Relief: A Pilot Study
- Dr. Collin Clarke
  Virtual Reality Imaging With Real Time Ultrasound for Facet Joint Injection A Proof of Concept
- Dr. Diem Tran
  Arterial pCO₂ Changes During Thoracoscopic Surgery With CO₂ Insufflation and One Lung Ventilation
- Dr. Kristine Marmai
  Anesthetic Considerations in a Child With Congenital Insensitivity to Pain

Dr. Collin Clarke was awarded first prize for his presentation

UWO anesthesia residents also presented at the CAS Annual Meeting in Vancouver, BC in June 2009. Resident presenters and their presentations were

- Dr. Phil Kruger
  Anesthetic Management for Cesarean Delivery in a Parturient With Andersen-Tawil Syndrome
- Dr. Tim Maxwell
  A Successful Anesthetic Technique in a Patient With Giant Bullous Emphysema
- Dr. Collin Clarke
  Virtual Reality Imaging With Real Time Ultrasound for Facet Joint Injection A Proof of Concept

Dr. Collin Clarke presented in the Resident Research Competition and won 2nd prize.
Junior residents received a lecture on Principles of Research Ethics by Dr. Singh during the Ethics series in June 2009.

During the Academic Core Lecture Series residents were given presentations by Drs. Railton, Dhir, and Singh to increase resident awareness of ongoing research projects.

Plume Scavenging Coverage – “When you think of smoking, the hospital probably doesn’t come to mind, but for decades many health-care workers have been exposed to dangerous smoke in the operating room.”
Dr. John Semple, Surgeon and Dr. Steven Dain, The University of Western Ontario

Dr. Achal Dhir

- M3 Seminars
  Pre Anesthetic Checkup
  April 7, 2009
  January 6, 2009
  September 16, 2008
- Resident Teaching
  Core Knowledge Lecture: Heart Failure
  November 26, 2008
- Resident Academic Day
  Co-ordinator/Moderator
  Anesthesia for Off-Pump CABG (OPCAB) Surgery by Dr. Danielle Stothart
  November 26, 2008
- PACU/OR Nurses’ In-Service/Talks
  PAC Nurses at Victoria Hospital: Good Health and Graceful Aging
  September 10, 2008
- OR Nurses’ In-Service
  Patient Safety Issues in Perioperative Care
  August 13, 2008
- TEE Rounds Presenter
  Advanced Diastolic Dysfunction and its Management
  May 27, 2009
- Diastolic Function and Dysfunction
  May 6, 2009
- Comprehensive 2D TEE Exam
  April 1, 2009
- 2D Comprehensive TEE Examination
  December 10, 2008
- Department Rounds Presenter
  Pick Pockets in Anesthesia
  July 23, 2008
- Workshop (Lab) Conductor and Demonstrator on Simulator
  Fanshawe College, London, ON
• Heart Disease and Anesthesia  
  April 17, 2009  
• Induction of Anesthesia  
  March 13, 2009  
• Workshop Organizer  
  Canadian Medical Hall of Fame, UWO  
  May 8, 2009  
• Workshop Conductor  
  Canadian Medical Hall of Fame, UWO  
  May 8, 2009  

Dr. Shalini Dhir  
• Core Seminar for Anesthesia Residents  
  Outcomes After Regional Anesthesia  
  Current Research in Regional Anesthesia at UWO  
  June 3, 2009  
• Anesthesia Residents’ Thursday Morning Rounds  
  Complications of Regional Anesthesia  
  May 14, 2009  
• Complications of Regional Anesthesia  
  December 11, 2008  
• Nerve Injuries After Peripheral Nerve Blocks  
  December 4, 2008  
• Anesthesia for EXIT Procedures  
  November 20, 2008  
• HULC Seminar for Orthopedic and Plastic Surgery Residents  
  Postoperative Analgesia for Peripheral Orthopedic Surgery  
  July 31, 2008  
• Anesthesia Assistant Program  
  Local Anesthetics and Regional Anesthesia  
  Fanshawe College and The University of Western Ontario  
  March 27, 2009
Dr. Sugantha Ganapathy
- Ultrasound Guided Blocks in Fresh Cadavers Followed by Dissection of the Cadavers at CSTAR
- Hands on Workshop Session
- Organizer
  Drs. Armstrong, Dhir, Rachinsky and Tureanu were teachers at this workshop
  this anatomy session has been incorporated into the curriculum of the Varkey Workshop since this was the first of its kind in Canada
  September 6, 2008

Dr. Jeff Granton
- Anesthesia Residency Training Program
  Program Director
  The University of Western Ontario
- Canadian Critical Care Society
  Education Chair
- Cardiac Physiology, Community Health, Emergency Care and Resuscitation Medicine
  Undergraduate Lecturer
  Schulich School of Medicine & Dentistry

Dr. Ngozi Imasogie
- Resident Rounds
- Heart and Circulation
  Week 1 ‘Cause we are Living in a Multicultural World
  February 13, 2009
  Week 2 Nature, Nurture and Prevention
  February 20, 2009
  Week 3 Congenital Heart Disease
  February 27, 2009
- Neonatal Anesthesia
  PDA, TOF, Diaphragmatic Hernia, Gastrochisis, Omphalocele
  January 22, 2009
- Neonatal Anesthesia Basics
  January 15, 2009
• PCCIA
  Respiration and Airways
  Week 1 Tobacco Use
  January 8, 2009
  Week 2 Palliative Care/Euthanasia
  January 15, 2009
  Week 3 Obstructive Sleep Apnea
  January 22, 2009
  Week 4 Hoarseness
  January 29, 2009
  Week 5 Cleft Lip and Palate
  February 6, 2009
• Neonatal Anesthesia
  PDA, TOF, Diaphragmatic Hernia, Gastrochisis, Omphalocele
  September 18, 2008
• Neonatal Anesthesia
  Basics
  September 11, 2008

Dr. Philip Jones
• UH Departmental Rounds
  When Should Tricuspid Regurgitation be Repaired?
  June 2009
• UH Departmental Rounds
  Anesthesia for Tran Catheter Aortic Valve Replacement
  June 2009
• TEE Rounds
  Paravalvular Leak Following AVR
  November 2008
• TEE Rounds
  Hypoxemia Following CABG
  October 2008
• Grand Rounds
  Tight Glucose Control in the Perioperative Period, Yes or No?
  Department of Anesthesia and Perioperative Medicine
  September 2008
Dr. Ian McConachie

- Southwestern Ontario Airway Workshop
  Gum Elastic Bougie
  London, ON
- Assessing Cardiac Risk for Non-Cardiac Surgery
  Resident Lecture
  London, ON
- Reducing Cardiac Risk for Non-Cardiac Surgery
  Resident Lecture
  London, ON
- Quality and Complications Following Ambulatory Anesthesia
  Resident Lecture
  London, ON
- Maximizing Efficiency and Effectiveness in Ambulatory Anesthesia
  Resident Lecture
  London, ON

Dr. Patricia Morley-Forster

- Hypogonadism with Chronic Opioid Therapy
  Endocrine Update
  London Hospitals
  April 2009
- Management of Pain in the Head and Neck Region
  ENT Resident’s Seminar
  March 2009
- Topical Analgesics, Chronic Pain Refresher Course
  Canadian Pain Society, Toronto, ON
  February 2009
- Developments in Treatment of CRPS
  Citywide Department of Anesthesia Rounds
  January 2009
- Abdominal Wall Pain – An Unrecognized Source of Chronic Pain
  In-Service to 8N, University Hospital Surgical Nurses and Residents
  January 2009
- Treatment of Chronic Pain Problems in the Emergency Department
  Meds IV Pain and its Management Selective
  2008
Dr. John Murkin
• UH Site Specific Rounds
  Clinical Cerebral Oximetry Program
  Patient Selection and an Algorithm for Intervention
  Lecture
  April 8, 2009
• UH Site Specific Rounds
  Genetic Susceptibility to Neurocognitive Injury: An Investigation
  Lecture
  October 8, 2008

Dr. Valerie Schulz
• End of Life Care Education
  Critical Care Lectures on Palliative and End of Life Care
  The lectures are provided to physicians, fellows, residents, and medical students through routine lectures, individual teaching and consultations in Critical Care at London Health Sciences Centre, at both University Hospital and Victoria Hospital, and the Schulich School of Medicine & Dentistry
• Lead Undergraduate Palliative Medicine Educator
  Schulich School of Medicine & Dentistry
• Palliative/End of Life Care (P/EOLC) in Critical Care Workshop
  Speaker
  Hospice Palliative Care Conference
  April 21, 2009

Dr. Indu Singh
• Obstetric Anesthesia PCL Rounds to SJHC Anesthesia Residents
  Anesthesia for the Morbidly Obese Parturient
  May 12, 2009
• Lecture to Anesthesia Residents
  Neuraxial Anesthesia
  May 6, 2009
• Obstetric Anesthesia PCL Rounds to SJHC Anesthesia Residents
  Anesthetic Management of the Parturient with Aortic Stenosis
  April 21, 2009
• Obstetric Anesthesia PCL Rounds to SJHC Anesthesia Residents
  Anesthesia for Non-Obstetrical Surgery in the Pregnant Patient
  March 10, 2009
• Obstetric Anesthesia PCL Rounds to SJHC Anesthesia Residents
  Anesthetic Management of the Parturient with Abnormal Placenta
tion
  February 3, 2009
• Lecture to Schulich School of Medicine Undergraduate Students
  Nonsurgical Management of Upper Airway Obstruction
  January 27, 2009
• Obstetric Anesthesia PCL Rounds to SJHC Anesthesia Residents
  Anesthesia for Fetal Distress
  November 18, 2008
• Obstetric Anesthesia PCL Rounds to SJHC Anesthesia Residents
  Anesthetic Management of the Bleeding Parturient
  November 4, 2008
• Obstetric Anesthesia PCL Rounds to SJHC Anesthesia Residents
  Anesthesia for the Parturient with MS
  October 21, 2008
• Lecture to Obstetric Residents
  Management of Peripartum Hemorrhage
  October 8, 2008
• Obstetric Anesthesia PCL Rounds to SJHC Anesthesia Residents
  Anesthesia for the Parturient with Marfan Syndrome
  September 30, 2008
• Obstetric Anesthesia PCL Rounds to SJHC Anesthesia Residents
  Management of PDPH
  September 8, 2008
• Obstetric Anesthesia PCL Rounds to SJHC Anesthesia Residents
  Anesthesia for Non-Obstetrical Surgery in the Pregnant Patient
  August 26, 2008
• Lecture to Anesthesia Residents
  Principles of Research Ethics
  August 25, 2008
• Obstetric Anesthesia PCL Rounds to SJHC Anesthesia Residents
  PCA Remifentanil for Labour
  August 12, 2008

Dr. Luminita Tureanu
Anesthesia Residents – OB Teaching Session
• Cesarean Section in the Parturient with Recent Cocaine Intake
  May 26, 2009
• The Management of the Parturient with Failed Epidural Block
  April 28, 2009
• The Preeclamptic Parturient with a Non-reassuring FHR Pattern

• The Parturient with Peripartum Cardiomyopathy
  March 17, 2009
• The Parturient with Multiple Sclerosis
  March 3, 2009
• The Preeclamptic Parturient with a Non-reassuring FHR Pattern
  December 9, 2008
• Cardiac Arrest in Pregnancy
  November 25, 2008
• The Management of the Parturient with Failed Epidural Block
  October 28, 2008
• Anesthesia for Nonobstetric Surgery in Pregnancy
  September 23, 2008
• Cesarean Section in the Parturient with HIV and Cocaine Intake
  September 9, 2008
• Anesthetic Considerations for the Parturient with Multiple Gestations
  August 19, 2008
• Anesthetic Management of Placenta Accreta
  August 5, 2008

Anesthesia Residents – Thursday Rounds
• Nitrous Oxide, A Review of the Biologic Effects
  May 7, 2009
• Local Anesthetic Toxicity
  April 9, 2009
• Local Anesthetic Toxicity
  November 27, 2008

Dr. Timothy Turkstra
• Southwestern Ontario Anesthesia Airway Conference
  Instructor and Course Organizer
  Instruction and Supervision of Novel Intubation Techniques
  The University of Western Ontario
• Department Journal Club, Co-ordinator
• Anesthesia Question of the Week, Co-ordinator
• Friday Morning Resident Case Rounds
  Instructor
• Physics for Anesthesia
  Anesthesia Resident Teaching Rounds
  April 2009
• Anesthesia for Neurovascular Cases
  Anesthesia Resident Teaching Rounds
  February 2009
• Resident Research
  Anesthesia Resident Teaching Rounds
  November 2008
• Anesthesia Update
  London Health Sciences Centre Anesthesia Rounds
  October 2008
**Dr. Daniel Bainbridge**
- 2009 Awards for the Canadian Anesthesiologists’ Society
  - New Investigators Award (CAS-018-2009)
  - Dr. Ronit Lavi and Dr. Daniel Bainbridge, Department of Anesthesia and Perioperative Medicine, London Health Sciences Centre
  - Dr. Shahar Lavi, Division of Cardiology, London Health Sciences Centre
  - January 8, 2009

**Dr. Davy Cheng**
- The Outstanding Contribution Award
  - Honoured at the 30th Anniversary Meeting of the Chinese Society of Anesthesiology & Chinese Medical Association
  - For the Outstanding Contribution to the Development of Anesthesiology in China
  - 2009

**Dr. Rosemary Craen**
- Fellow Teacher of the Year Award
  - 2009

**Dr. Steven Dain**
- CSA Member Appreciation Award
  - Presented by Canadian Standard’s Association, President Suzanne Kiraly
  - Recognition of 16 Years of Leadership Excellence and Participation in the Development of the Canadian National and International Standards for Medical Equipment and Clinical Engineering
  - March 1, 2009
• Joint Canadian Psychiatric Association-COPCE Award
  Award for Most Outstanding Continuing Education Activity in Psychiatry in Canada (Community/Rural)
  Awarded by Canadian Psychiatric Association
  Collaborator in the Development of the DVD “Understanding Pain” (Chronic Pain)
  Through a DVD and Supporting Website, to Educate Residents in Training, Practicing Psychiatrists and Other Clinicians About the History of Chronic Pain and Current Management Approaches
  Collaborators: Dr. Harold Merskey and Dr. Laurence Jerome
  July 2008

**Dr. Sugantha Ganapathy**

• Recipient of the London YMCA Women of Distinction Award in the Area of Health, Science and Technology

**Dr. Jeff Granton**

• Canadian Anesthesiologists’ Society, John Bradley Young Educator Award
  June 2009

**Dr. Ronit Lavi**

• Canadian Anesthesiologists’ Society, David S. Sheridan Research Award

**Dr. John Murkin**

• Canadian Anesthesiologists’ Society – Research CAS Recognition Award – 2008
  In Recognition of Outstanding Contributions to the Knowledge Base of our Specialty Through Research into Protection of the Brain During Cardiac Surgery

**Dr. Indu Singh**

• Certificate of Recognition for Exemplary Leadership as a Member of Core Team From MORE OB

**Dr. Timothy Turkstra**

• 2008 Society for Airway Management Annual Meeting Top Research Presentation
**Faculty Participation Nationally and Internationally**

**Conference Chair/Moderator/Organizer**

**Dr Miguel Arango**
- Colombian Congress of Anesthesia
  Co-chair
  Neuroanesthesia Module
  Medellin, Colombia
  March 2009
- Second Congress of Neuroanesthesia, Neurocritical Care and Neurosurgery Meeting
  Session Moderator
  Medellin, Colombia
  December 2008

**Dr. Daniel Bainbridge**
- The Winter Cardiac Team Meeting 2009
  Member, Scientific Committee
  Moderator, Session I - Mitral Valve and Minimal Access Surgery
  Mont-Tremblent, QC
  February 13 - 15, 2009
- Bedside Ultrasound in the ICU
  Member, Organizing Committee
  London, ON
  December 15, 2008
- 4th Annual Southwestern Ontario Anesthesia Meeting
  Airway Workshop
  Member, Organizing Committee
  London, ON
  October 25, 2008
Dr. Davy Cheng

- Canadian Anesthesiologists’ Society Annual Meeting
  Co-chair
  Resident Research Competition
  Vancouver, BC
  June 29, 2009

- International Medical Congress on Perioperative Care for the Geriatric Patient
  Co-chair
  Cardiac Surgery 2
  Co-chair
  Poster Sessions
  Mt. Sinai School of Medicine, New York, USA and
  Czech Society of Anaesthesiology and Intensive Care Medicine
  Prague, Czech Republic
  June 15, 2009

- Best of Meeting Abstract Session
  Co-chair and Judge
  IARS Meeting
  San Diego, CA, USA
  March 16, 2009

- The Winter Cardiac Team Meeting
  Moderator and Judge
  Resident/Fellow Abstract Competition
  Moderator
  Pharmacologic Strategies
  Mont-Tremblant, QC
  February 15, 2009

- 27th Annual Symposium
  Clinical Update in Anesthesiology, Surgery and Perioperative Medicine
  Moderator
  Cardiac Anesthesia and Surgery
  Fajardo, Puerto Rico
  January 23, 2009
• 11th International Congress of Cardiothoracic and Vascular Anesthesia
  Co-chair and Judge
  Best Abstract Prize Competition – Oral Presentation Session
  Session Chair
  Fast Track Cardiac Anesthesia Techniques and Recovery: Same in All Countries?
  Berlin, Germany
  September 17, 2008

• 11th International Congress of Cardiothoracic and Vascular Anesthesia
  Workshop Chair
  What You Need to Know About Evidence-Based Publications
  and Their Translation into Practice
  Berlin, Germany
  September 14, 2008

Dr. Steven Dain
• Outcomes XIII Barbados
  Director
  Multimedia and Organizing Committee
  Barbados, West Indies
  May 27 - 30, 2009

• The Winter Cardiac Team Meeting 2009

Dr. Shalini Dhir
• Master Class
  Torso Workshop
  Canadian Anesthesiologists’ Society Annual Meeting
  Faculty Instructor
  Vancouver, BC
  June 26 - 30, 2009
• Ultrasound Guided Regional Block Workshop
  Instructor
  Jai Prakash Narayan Apex Trauma Centre
  All India Institute of Medical Sciences
  New Delhi, India
  February 14, 2009

• TEE and Ultrasound Guided Nerve Blocks
  Guest Faculty and Instructor
  Banaras Hindu University, India
  February 12, 2009

• 1st International Conference on Recent Advances In Anaesthesiology
  Guest Faculty and Overseas Co-ordinator
  New Delhi, India
  January 30 - February 1, 2009

• Ultrasound Guided Regional Anesthesia Workshop
  Instructor
  Indian Society of Anaesthesia Annual Meeting
  Jodhpur, India
  December 26 - 29, 2008

• Ultrasound Guided Nerve Blocks
  Preconference Workshop
  Instructor
  Jodhpur, India
  December 25, 2008

• CSTAR’s Varkey Ultrasound Guided Anesthesia and Anatomy Update
  Co-chair and Instructor
  The University of Western Ontario
  November 29 - December 1, 2008

• 53rd Annual Ontario Anesthesia Meeting
  Instructor
  Niagara Falls, ON
  October 3 - 5, 2008

• Introductory Fresh Cadaver Dissection Workshop
  Instructor
  The University of Western Ontario
  September 6, 2008
**Dr. Sugantha Ganapathy**
- Master Class On “Torso”
  Chair
  Canadian Anesthesiologists’ Society Annual Meeting
  Vancouver, BC
  June 29, 2009
- Oral Poster Session on Regional Anesthesia and Acute Pain
  Moderator/Facilitator
  Annual ASA Meeting
  Orlando, FL, USA
  October 18, 2008
- Reorganized the Scientific Committee of the Varkey Workshop and incorporated Professor Chan from the University of Toronto in the organizing group and scientific committee of the workshop. CSTAR co-ordinated this program in their world class facility. Key international faculty taught at this workshop with major collaboration with the Department of Anatomy. Professor Bernhard Moriggl from Innsbrook, Austria and Dr. Marjorie Johnson from the UWO Department of Anatomy, played a major role in the anatomy sessions and dissections. The invited faculty included Professor Andre Boezaart, Dr. Peter Cheng, Dr. Jose Carvalho, Dr. Anahi Perlas and Prof Krishna Boddu. The contents of the workshop were much appreciated by the registrants who considered this workshop as a one of a kind.

**Dr. Jeff Granton**
- Canadian Critical Care Review Course
  Co-chair
  May 2009
- National Critical Care Resident’s Day
  Co-chair
  October 2008

**Dr. Ngozi Imasogie**
- Refresher Course 4
  Chair
  The Triple Challenge of Ambulatory Anesthesia Education
  Surgeons, Residents and Staff
  Canadian Anesthesiologists’ Society Annual Meeting
  Vancouver, BC
  June 2009
Dr. Ian McConachie

- Ambulatory Program
  Organizer
  Canadian Anesthesiologists’ Society Annual Meeting
  Vancouver, BC
  June 2009
- Debate
  Single Shot Blocks Should Not be Performed in the Ambulatory Patient
  Chair
  Canadian Anesthesiologists’ Society
  Vancouver, BC
  June 2009

INVITED LECTURES/VISITING PROFESSORSHIPS/WORKSHOPS

Dr. Miguel Arango
• Colombian Congress of Anesthesia
  Lecture
  Near Infrared Spectometry in Neuroanesthesia
  Lecture
  Intraoperative Complications in Neuroanesthesia
  Lecture
  Problem Based Learning Discussion in Head Injury
  Cundinamarca, Colombia
  March 19, 2009
• Second Neuroanesthesia, Neurocritical Care and Neurosurgery Meeting
  Lecture
  Intraoperative Isquemia in Neuroanesthesia
  Lecture
  Anesthesia for Head Injury Patients
  Medellin, Colombia
  December 7, 2008
• Airway Workshop
  Invited Speaker
  Workshop Demonstrator
  Fiberoptic
  London, ON
  October 2008

Dr. Kevin Armstrong
• Canadian Anesthesiologists’ Society Annual Meeting
  Pro/Con Debate
  Singleshot Peripheral Nerve Blocks Should Not be Performed on
  Ambulatory Patients
  Vancouver, BC
  June 28, 2009
Dr. Daniel Bainbridge

- The Winter Cardiac Team Meeting 2009
  Lecture
  What’s Hot and What’s Not: A Review of Literature From 2008
  Case Conference
  Challenges in Minimal Access Surgery: TEE for Minimally Invasive Mitral Valves
  Mont-Tremblent, QC
  February 13 - 15, 2009

- Anaesthetic Management for Heart Transplantation
  Invited Speaker
  Max Healthcare Institute
  New Delhi, India
  January 2009

- 1st Annual INCRAA
  Invited Speaker
  Management of Low CO in the ICU
  Anesthesia for Robotic Surgery
  Glycemic Control in the ICU
  New Delhi, India
  January 30, 2009

- 6th Annual Toronto Perioperative TEE Symposium
  Invited Speaker
  Introperative Stroke and TEE
  Toronto, ON
  November 2008

- Ontario Anesthesia Meeting, Regional Meeting
  Invited Speaker
  The Naturopathic Anesthesiologists: Designing the All Natural Anesthetic
  for the ‘Green’ Generation
  The Bainbridge Report
  Niagara Falls, ON
  October 3 - 5, 2008

- ICCVA 2008
  Invited Speaker
  Robotic Coronary Revascularization and Hybrid Procedures
  TEE for Percutaneous Mitral Valve Procedures: Experience from Applications in Animals
  Berlin, Germany
  September 14 - 18, 2008
Dr. Davy Cheng

- Canadian Journal of Anesthesia Symposium
  Improving the Reporting of Clinical Research
  Lecture
  Applying Levels of Evidence in Scholarly Publications
  Canadian Anesthesiologists’ Society Annual Meeting
  Vancouver, BC
  June 28, 2009

- International Medical Congress on Perioperative Care for the Geriatric Patient
  Lecture
  OPCAB Surgery in Geriatric Patients: Evidence of Benefits?
  Mount Sinai School of Medicine, New York, NY, USA and
  Czech Society of Anaesthesiology and Intensive Care Medicine
  Prague, Czech Republic
  June 14 - 16, 2009

- 5th International Chinese Cardiovascular Anaesthesia Forum (ICCAF)
  Invited Honourable Speaker
  Plenary Lecture
  Controversies of Antifibrinolytic Agents in Cardiac Surgery
  Plenary Lecture
  TEE Certification for Anesthesiologists: A Formality or a Necessity?
  Panel Speaker
  Echocardiography Workshop Transesophageal Echocardiography in a Nutshell
  Certification: Expert Panel Discussion
  Hong Kong, China
  May 2 - 3, 2009

- 31st Society of Cardiac Anesthesiologists (SCA) Annual Meeting and Workshops
  Refresher Course Speaker
  Lecture
  Cardiac Surgery and Anesthesia: Past, Present and Future
  San Antonio, TX, USA
  April 18 - 22, 2009

- American College of Cardiology’s Innovation in Intervention: i2 Summit
  Invited Presentation
  Endovascular Versus Open Surgical Repair of Thoracic Aortic Disease: A Meta-
  Regression Analysis (Video Interview by the Cardiosource Video Network - CVN)
  American College of Cardiology’s 58th Annual Scientific Meeting
  Orlando, FL, USA
  March 30, 2009
• The Winter Cardiac Team Meeting 2009
  Lecture
  The Aprotinin Story
  Mont-Tremblant, QC
  February 15, 2009
• Mount Sinai School of Medicine 27th Annual Symposium
  Clinical Update in Anesthesiology, Surgery and Perioperative Medicine
  Lecture
  Cardiac Surgery: Past, Present and Future
  Fajardo, Puerto Rico
  January 19 - 24, 2009
• European Workgroup of Cardiothoracic Intensivists Annual Meeting
  Lecture
  Controversy of Antifibrinolytic Agents in Cardiac Surgery
  Lecture
  Perioperative Management and Recovery in Hybrid Robotic Coronary
  Revascularization Surgery
  Lecture
  Robotic Surgery: When, Why and Are We There Yet?
  Martinique, Fort de France
  November 29 - December 2, 2008
• ISMICS Winter Meeting
  Lecture
  OPCAB Surgery – Clinical Outcomes and Management
  Okinawa, Japan
  November 13 - 16, 2008
• American Society of Anesthesiologists (ASA) Annual Meeting
  Panel Speaker
  Off Pump and Robotic CABG - What is the Evidence of Benefit?
  Orlando, FL, USA
  October 20 - 22, 2009
• International Symposium on Hybrid Approach to Heart Diseases
  Lecture
  Perioperative Management and Recovery of Hybrid Coronary
  Revascularization Surgery
  Beijing, China
  October 15 - 19, 2008
• 11th International Congress of Cardiothoracic and Vascular Anesthesia (ICCVA) Lecture
Past, Present and Future of Cardiac Surgery and Anesthesia
Lecture
Indication for Antifibrinolytic Agents: Lessons Learned from the Aprotinin Story
Lecture
Interpreting Research Data and Study Design
Lecture
Fast Track Cardiac Anesthesia in North America
Berlin, Germany
September 15 - 19, 2008

• 2009 Yonsei International Symposium of Critical Care Visiting Professor Lecture
Right Ventricular Failure
Severance Hospital, Yonsei University College of Medicine
Seoul, Korea
July 5, 2008

• Cardiac Anesthesia Annual Meeting Lecture
Fast Track Perioperative Management in CABG, OPCAB and Robotic Surgery
Anesthesia Agents and Techniques
The Korean Society of Anesthesiologists
Seoul, Korea
July 4, 2008

• Kyongbuk National University Hospital Visiting Professor Lecture
Fast Track Perioperative Management in CABG, OPCAB and Robotic Surgery
Taegu, Korea
July 3, 2008

Dr. Rosemary Craen

• Lecture
Making a Mark
Neuroanesthesia
Toronto, ON
February 2009
• Lecture
  Second Congress of Neuroanesthesia, Neurosurgery, and Neuro Critical Care
  Anesthesia for Supratentorials Tumors
  Hypothermia in Neuroanesthesia
  Medellin, Colombia
  December 2008

Dr. Steven Dain
• COACH Meeting
  Abstract Presentation by Dr. Steven Dain and Dr. Julian Goldman
  The Need for Interoperability of Medical Devices and the Electronic Health
  Record: Extending the Reach
  Vancouver, BC
  May 4, 2009

• Educational Presentation
  Physicians, Research and Development Engineers
  ISO Technical Committee 121 Subcommittee 3
  Application of Health Informatics to Critical Care Ventilators, Liaison Report
  With IHE, International Organization for Terminology in Anesthesia and HL7
  Kyoto, Japan
  January 27, 2009

• 1st Annual Biomedical - Information Management Leadership Forum
  Invited Speaker
  Presentation
  Applying Human Factors Engineering Principles to Strengthen
  Technology Management
  London Health Sciences Centre
  London, ON
  November 18, 2008

• Continuing Medical Education Presentation
  Visiting Professor
  Lecture
  What’s New in Fluid Management?
  Hôtel-Dieu Grace Hospital
  Windsor, ON
  July 4, 2008
Dr. Achal Dhir

- Visiting Professor
  Perioperative TEE Exam
  Department of Anesthesiology, Banaras Hindu University
  Varanasi, India
  February 12, 2009

- Visiting Professor
  Postoperative Cardiac ICU Care
  Department of Cardiothoracic and Vascular Surgery, Ram Manohar Hospital
  New Delhi, India
  February 3 - 4, 2009

- Visiting Professor
  Anesthesia for Orthotopic Liver Transplantation
  Max Hospital
  Saket, New Delhi, India
  February 3, 2009

- 1st International Conference on Recent Advances in Anaesthesia
  Lecture
  Simulators in Anesthesia Training
  All India Institute of Medical Sciences
  New Delhi, India
  January 30, 2009

- 1st International Conference on Recent Advances in Anaesthesia
  Lecture
  What’s New in Liver Transplantation
  All India Institute of Medical Sciences
  New Delhi, India
  January 30, 2009

- Department of Cardiothoracic and Vascular Surgery, Ram Manohar Hospital
  Visiting Professor
  Trans Esophageal Echocardiography
  New Delhi, India
  October 11, 2008

- G B Pant Hospital
  Visiting Professor
  Recent Advances in Anesthesia
  New Delhi, India
  October 6, 2008
Dr. Shalini Dhir

- Ultrasound Guided Regional Blocks
  Jai Prakash Narayan Apex Trauma Center
  All India Institute of Medical Sciences
  New Delhi, India
  February 14, 2009
- TEE and Ultrasound Guided Nerve Blocks Workshop
  Recent Advances in Obstetric Anesthesia
  Banaras Hindu University
  Varanasi, India
  February 12, 2009
- Ultrasound Guided Regional Anesthesia
  Recent Advances in Postoperative Pain Management
  1st International Conference on Recent Advances in Anaesthesiology
  New Delhi, India
  January 30 - February 1, 2009

Dr. Sugantha Ganapathy

- Teaching Faculty
  Advanced USGRA Workshops and Lectures
  Lecture and Demonstrations
  A Number of Advanced Blocks Such As LFCN, IIN, TAPB and Obturator Blocks
  University of Toronto
  Toronto, ON
  June 21 - 22, 2009
- Blockit Workshop
  Visiting Professor and Guest Faculty
  Lecture
  Upper Limb and Lower Limb Ultrasonographic Anatomy for Regional Anesthesia
  Workshop
  Clinically Demonstrated on Patients Upper Limb, Lower Limb and Ilioinguinal Nerve Blocks as a Live Demonstration
  University of Hull
  Hull, UK
  June 17 - 18, 2009
• Ultrasound Esoterica Workshop
  Lecture and Workshop
  LFCN, Obturator and Saphenous Nerves Ultrasonographically
  Canadian Anesthesiologists’ Society Annual Meeting
  Vancouver, BC
  June 2009

• Excellence in Regional Anesthesia
  Workshop
  Ultrasound Guided Regional Anaesthesia
  Organized by American Society of Regional Anesthesia and Pain Medicine
  San Francisco, CA, USA
  May 30 - 31, 2009

• Visiting Professor - Ultrasound and Anesthesia
  Lecture
  Ultrasound Guided Regional Anaesthesia – Grand Rounds
  University of Calgary
  May 27 - 29, 2009

• Advanced Regional Anesthesia 2009
  Invasive Pain Management Techniques and Regional Anesthesia
  Hands on Workshop
  Lecture
  Ultrasound and Regional Anesthesia
  Workshop
  Paravertebral, Lateral Femoral Cutaneous and Spine Imaging
  Organized by Wayne State University
  Wayne State University, Detroit, MI, USA
  May 2009

• American Society of Regional Anesthesia and Pain Medicine Meeting
  Lecture
  Ultrasound Guided Saphenous, Obturator, LFCN Blocks and Ultrasound Guided
  TAPB, IIN And IH Blocks
  Workshop
  Supervised Hands On Workshop of the Same Topics
  May 3, 2009
• International Symposium on Spine and Paravertebral Sonography for Anaesthesia and Pain Medicine
  Lecture
  Periarticular Infiltration Analgesia for Arthroplasty
  Chinese University of Hong Kong
  Shatin, Hong Kong
  April 9 - 11, 2009

• American Society of Regional Anesthesia and Pain Medicine Annual Meeting
  Guest Faculty
  Workshop
  Lower Limb and Truncal Blocks
  Phoenix, AZ, USA
  April 2009

• Advanced Ultrasound Guided Regional Anesthesia Workshops
  Teaching Faculty
  Lecture and Workshop
  Number of Advanced Blocks Such As LFCN, IIN, TAPB and Obturator Blocks
  University of Toronto
  Toronto, ON
  April 24 - 25, 2009

• Ultrasound Guided Regional Anesthesia
  Hands On Workshop
  Regina, MB
  January 2009

• Annual Orthopedic Anesthesia, Pain and Rehabilitation Society Pre American Society of Anesthesiologists Meeting
  Lecture
  A Pro/Con Lecture on Wound Infiltration Analgesia
  Workshop
  Guest Faculty Teacher
  Ultrasound Guided Lower Limb and Neuraxial Imaging
  University of Toronto
  Toronto, ON
  October 17, 2008
• Regional Anesthesia and Pain Medicine Conference
  Teaching Faculty
  Lecture
  Periarticular Infiltration for Fast Track Lower Limb Arthroplasty
  Pro/Con Debator
  Workshop
  Neurostimulation Guided Upper Limb Blocks
  University of Toronto
  Toronto. ON
  September 2008

Dr. Ngozi Imasogie
• Canadian Anesthesiologists’ Society Annual Meeting
  Workshop Presenter
  Basic Ultrasound Guided Regional Anesthesia - Lower Limb
  Vancouver, BC
  June 2009
• Varkey Regional Anesthesia
  Workshop Presenter
  The University of Western Ontario
  London, ON
  December 2008

Dr. Philip Jones
• Lecture
  Currents in Critical Care - Heparin-Induced Thrombocytopenia
  London Health Sciences Centre
  London, ON
  February 2009
• Making a Mark
  Examiner
  February 2009

Dr. Ian McConachie
• Canadian Anesthesiologists’ Society Annual Meeting
  Laryngeal Mask Airways Should Not be Used for Controlled Ventilation - A Debate
  Vancouver, BC
  June 2009
• Grand Rounds
  Blackpool Victoria Hospital
  Anaesthesia for Robotic Surgery
  Blackpool, UK
  April 2009

• 1st International Conference on Recent Advances in Anaesthesiology
  Recent Advances in Ambulatory Anesthesia
  New Delhi, India
  January 2009

• 1st International Conference on Recent Advances in Anaesthesiology
  Identification of Deterioration in the Perioperative Period
  New Delhi, India
  January 2009

Dr. John Murkin

• Canadian Anesthesiologists’ Society Annual Meeting
  Lecture
  Navigating Through the Funding Agencies for Research Dollars
  Vancouver, BC
  June 27, 2009

• Outcomes XIII Barbados
  Lecture
  Cerebral Oximetry and Outcomes in Cardiac and Vascular Surgery
  Lecture
  Panvascular Inflammation: Perioperative CNS Outcomes 20 Years On
  Barbados, West Indies
  May 27 - 30, 2009

• Annual Swedish Cardiovascular Spring Meeting
  Distinguished Speaker – 2009 Lars Werkö Lecture
  Neurological Outcomes After Cardiac Surgery: What Have We Learned and
  Where to From Here
  Hosted by the Swedish Heart Association
  Uppsala, Sweden
  April 22, 2009
• The Winter Cardiac Team Meeting 2009
  Lecture
  Genetics: The Role in Perioperative Injury in Cardiac and Vascular Patients?
  Lecture
  Applied Neuromonitoring in Cardiac Surgery
  Mont-Tremblent, QC
  February 12 - 15, 2009
• Dalhousie University
  Visiting Professor
  Cerebral Oximetry and Systematic Outcomes in Cardiac Surgery
  Halifax, NS
  May 20, 2009
• 7th Current Trends in Aortic and Cardiothoracic Surgery
  Hosted by
  Baylor College of Medicine and the
  Texas Heart Institute
  Continuing Medical Education Presentation
  Neurocognitive Dysfunction Following Cardiac Surgery
  Houston, TX, USA
  May 2, 2009
• 6th International Course on Extracorporeal Perfusion Technologies (INTERCEPT)
  Hosted by the IRCSS Policlini S. Donato Milanese - Milano
  Continuing Medical Education Presentation
  Near-Infrared Spectroscopy for Brain Function Monitoring
  Lecture
  One Year Without Aprotinin
  Milan, Italy
  April 16 - 17, 2009
• Mount Sinai School of Medicine
  Continuing Medical Education Presentation – Grand Rounds
  Cerebral Oximetry and Systematic Outcomes in Cardiac Surgery
  New York City, NY, USA
  April 1, 2009
• New Horizons in Anesthesiology
  Emory University School of Medicine - The Department of Anesthesiology
  Lecture
  Genetic Susceptibility to Cognitive Injury, Inflammation
  and Adverse Outcomes
  Lecture
  The Ventilator: PaCO₂ and the Clinical Implications of Ventilatory Management
  Lecture
  Near Infrared Cerebral Monitoring
  Lecture
  The Aprotinin Story
  Cozumel, Mexico
  March 23, 2009
• 3rd International Congress on Aortic Surgery and Anesthesia
  How To Do It
  Hosted by San Raffaele Congress Centre, Department of Cardiovascular &
  Thoracic Surgery
  Lecture
  Near-Infrared Spectroscopy (NIRS) Monitoring in Aortic Arch Surgery
  Milan, Italy
  December 11 - 13, 2008
• Leonard M. Miller School of Medicine at the University of Miami
  Department of Anesthesiology
  Continuing Medical Education Presentation – Grand Rounds
  Cerebral Oximetry Improves CNS and Systematic Outcomes in
  Cardiac Surgery
  Miami, FL, USA
  October 23, 2008
• 2nd Biennial Meeting – Cardiac Surgery Care 2008
  Neuroprotection During Cardiac Surgery
  Hosted by the University of Lübeck
  Department of Anesthesiology and Department of Cardiac Surgery
  Lecture
  Cerebral Oxygenation Monitoring
  Lecture
  Perfusion Concepts to Decrease Neurological Complications – Best Practice
  Bypass
  Lübeck, Germany
  October 3 - 4, 2008
• Evening Dinner Presentation
  Lecture
  Cerebral Oximetry Improves CNS and Systematic Outcomes in Cardiac Surgery
  Chattanooga, TN, USA
  August 19, 2008

• Perfusion Downunder Winter Meeting 2008
  Lecture
  NIRS - A Standard Care For CPB?
  Lecture
  Biovariability of Pulsatile Perfusion During CPB?
  Lecture
  Genetic Susceptibility to Inflammatory Injury and Various Adverse Outcomes
  Queenstown, New Zealand
  August 7 - 10, 2008

Dr. Valerie Schulz
• Palliative Care Pain Conference
  Lecture
  Difficult Palliative Care Cases
  SWOMEN
  Windsor, ON
  June 5, 2009

Dr. Michael Sharpe
• Increasing Access and Reducing Wait Times for Transplantation in Ontario
  The Path Forward
  The MaRS Centre
  Donation after Cardiocirculatory Death
  Toronto, ON
  May 4, 2009

• Critical Care Grand Rounds
  Vancouver General Hospital
  Donation after Cardiocirculatory Death
  Vancouver, BC
  December 11, 2008
• Critical Care Canada Forum  
  Continuous EEG Monitoring in the ICU  
  Toronto, ON  
  November 11, 2008

• Trillium Gift of Life Provincial Clinical Co-ordinators  
  Teleconference Lecture  
  Neurological Determination of Death and New Ancillary Testing Guidelines  
  London, ON  
  August 27, 2007

**Dr. Indu Singh**  
Poster Presentations

• Kruger P, Singh SI  
  Anesthetic Management For Cesarean Delivery in a Parturient with Andersen-Tawil Syndrome  
  2009 Midwest Anesthesia Residents Conference  
  Chicago, IL, USA  
  March 2009  
  Mac-Western Resident Research Day 2009  
  Hamilton, ON  
  June 12, 2009  
  Canadian Anesthesiologists’ Society Annual Meeting 2009  
  June 2009  
  Vancouver, BC

• Silva M, Singh SI  
  Prospective Feasibility Study of Low Dose Hyperbaric Spinal Bupivacaine for Cesarean Section  
  2009 Midwest Anesthesia Residents Conference  
  Society for Obstetric Anesthesia and Perinatology Annual Meeting 2009

• Silva M, Arango M, Singh SI  
  Anesthetic Management of Cerebellar AVM During Pregnancy: A Case Report  
  2009 Midwest Anesthesia Residents Conference  
  Society for Obstetric Anesthesia and Perinatology Annual Meeting 2009  
  Washington, DC, USA  
  April 29 - May 3, 2009
BOARDS/COMMITTEES/OTHER

Dr. Robert Banner
- Canadian Journal of Integrative Medicine
  Editorial Board
- Applying Functional Medicine in Clinical Practice, San Antonio, TX, USA
  Qualification in Functional Medicine
- Ontario Society of Physicians for Complementary Medicine
  President Elect
- Journal of Prolotherapy
  Editorial Board
- American Holistic Medical Association
  Member

Dr. Davy Cheng
- International Anesthesia Research Society (IARS) Board of Trustees
  Teaching Awards Committee
  Research Awards Committee
  Scientific Program Committee
- Society of Cardiovascular Anesthesiologists (SCA)
  International Committee
- Canadian Society for the Advancement of Blood Management (SABM)
  Editor-in-Chief
  Selection Committee
  Board of Directors
  Chair, Bylaws Task Force
  Communications Committee Member
  Co-editor, Newsletter
- Council on Cardiovascular Surgery and Anesthesia
  Member
- Council on Cardiopulmonary, Critical Care, Perioperative and Resuscitation
  Member
- American Stroke Association
  Member
- American Heart Association
  Member
- Association of Canadian University Departments of Anesthesia (ACUDA)
  Secretary-Treasurer
• Safety and Monitoring Committee, Multi-Centers POISE Trial Member
• Canadian Anesthesiologists’ Society Cardiovascular and Thoracic Section Executive Committee
• Schulich Council, The University of Western Ontario Executive Committee Member
• Chair/Chief Department of Surgery, Schulich School of Medicine & Dentistry, The University of Western Ontario Selection Committee
• Admissions and Student Affairs, Schulich School of Medicine & Dentistry, The University of Western Ontario Advisory Committee on Assessment of Associate Dean
• Equity and Gender Issues, and Faculty Health, Schulich School of Medicine & Dentistry, The University of Western Ontario Advisory Committee on Assessment of Associate Dean
• Medical Advisory Executive Committee, LHSC Member
• Anesthesia Care Team Evaluation Panel Ministry of Health and Long-Term Care (MOHLTC)
• Canadian Surgical Technologies & Advanced Robotics (CSTAR) Education Committee Member
• South West LHIN Health Human Resources Advisory Group Member
• Ontario Blood Advisory Committee to the Ministry of Health and Long-Term Care (MOHLTC) Member
• Seminars in Cardiothoracic and Vascular Anesthesia Editorial Board
• Innovations: Technology and Techniques in Cardiothoracic and Vascular Surgery Editorial Board Official Journal of the International Society for Minimally Invasive Cardiac Surgeons (ISMICS)
• Canadian Journal of Anesthesia Editorial Board
• Journal of Cardiothoracic and Vascular Anesthesia Editorial Board
• Anesthesiology Clinics Guest Editor
Dr. Ian McConachie
- CPD Anaesthesia
  Editorial Board
- Canadian Anesthesiologists’ Society Ambulatory Section
  Chair
- Canadian Anesthesiologists’ Society
  Abstract Review Committee

Dr. Patricia Morley-Forster
- OMA Committee on Guidelines
  Chair
  May 2009
- National Opioid Use Guideline Group (NOUGG)
  Invited Member
- National Task Force Addressing Tertiary Pain Clinic Wait Times
  Invited Member
- OMA Section of Chronic Pain Physicians
  Elected to Executive
- Royal College Accreditation of Pain Medicine as a Subspecialty Task Force
  Chair

Dr. Michael Sharpe
- Premier’s Organ and Tissue Transplantation Wait Times Expert Panel
  Ministry of Health and Long-Term Care
  Member

Dr. Jim Watson
- OMA Section of Anesthesiology
  Executive Member

Dr. Steven Dain is Head of the Canadian Delegation, Organization for International Standardization (ISO Technical Committee 121 Anaesthetic and Respiratory Equipment). He is also Chairman of the Canadian Advisory Committee to ISO TC 121. He sits on numerous national and international committees related to the writing of biomedical engineering standards for medical electrical equipment, and adoption of these international standards for the Standards Council of Canada. Such standards are used by manufacturers in the design, risk management and verification of performance of medical devices and equipment and by national regulatory agencies such as Health Canada and the US FDA for licensing purposes.

   Endotracheal Tube Cuff Pressure Protocol to Reduce Dysphagia Following Anterior Cervical Spine Surgery, Co-Investigator  
   • AANS/CNS Apfelbaum Research Award  
     $14,821 ($5,557 Year 3)  
     2008-2009; Academic Year  
   • Lawson Health Research Institute, Research Fund  
     $13,821 ($5,182/Year)  
     2008-2009; Academic Year

3. **St. Lawrence K, Arango M, Bolton M**  
   Reducing the Risk of Stroke During Aneurysm Surgery by Intra Operative Monitoring of Cerebral Blood Flow, Co-Investigator  
   Lawson Health Research Institute  
   $15,000 ($9,000 Year 2)  
   2008-2009; Academic Year
4. **Badner N**  
ENIGMA-II Nitrous Oxide Anesthesia and Cardiac Morbidity After Major Surgery: A Randomized Controlled Trial, Collaborator and Site Principal Investigator  
Australian and New Zealand College of Anaesthetists Trial Group (ANZCA TG) and the NHMRC Centre for Clinical Research Excellence in Therapeutics  
$10,000 (site)  
2008 - 2009; Academic Year  

5. Patel RV, **Bainbridge D**, Kiaii B, Naish MD, Peters TM, Ross I  
An Optimal Planning Strategy for Robot-Assisted Minimally Invasive Cardiac Surgery, Co-Investigator  
- Canadian Institute of Health Research Grant  
  $66,681  
  2008 - 2009; Academic Year  
- NSERC Grant  
  $66,682  
  2008 - 2009; Academic Year  

6. **Cheng D** (Principal Investigator), **Martin J**  
Evidence-Based Perioperative Drug Therapy: Getting Evidence into Policy and Practice  
The Academic Medical Organization of Southwestern Ontario (AMOSO)  
Ministry of Health & Long Term Care Innovation Fund  
$205,000 ($112,500 Year 1)  
2008 - 2009; Academic Year  

7. **Dhir S**  
Success Rate of Infraclavicular Blocks: Comparison of Ultrasound vs. Neurostimulation Guided Catheter Placement, Principal Investigator  
Physicians Services Incorporated Foundation  
$60,000 ($30,000 Year 1)  
2008 - 2009; Academic Year  

8. **Herrick I** (Principal Investigator), **Cheng D**  
Evidence Embedded Clinical Decision Support and Collaboration to Enhance Patient Safety and Outcomes  
The Academic Medical Organization of Southwestern Ontario (AMOSO)  
Ministry of Health & Long Term Care Innovation Fund  
$415,000 ($227,500 Year 1)  
2008 - 2009; Academic Year
9. **Imasogie NN** (Principal Investigator), **Singh I, Watson J, Morley-Forster PK**
The Effect of the Combined Use of Naloxone Infusion and Oral Tramacet on Post-Operative Analgesia in Elderly Patients Undergoing Joint Replacement Surgery
Lawson Health Research Institute, 2009 Spring Lawson IRF Award
$15,000
2008 - 2009; Academic Year

10. **Imasogie NN** (Principal Investigator)
Pain and Postoperative Cognitive Dysfunction in the Elderly
The Academic Medical Organization of Southwestern Ontario, AMOSO Opportunities Fund
$52,000 ($22,000 Year 3)
2008 - 2009; Academic Year

11. Temple C, Ross D, **Imasogie NN**, Brackstone M
Postoperative Cognitive Dysfunction After Major Reconstructive Surgery, Co-Investigator
PSI Foundation Grant
$16,000
2008 - 2009; Academic Year

12. **Lavi R** (Principal Investigator), Lavi S
Sevuflorane Sedation During Primary Percutaneous Coronary Intervention A Randomized Pilot Trial
The Academic Medical Organization of Southwestern Ontario (AMOSO) Grant for Randomized Pilot Trial
$195,000 ($32,500 Year 1)
2008 - 2009; Academic Year

13. Swartzman L, Lavinge G, **Morley-Forster P**
Disentangling the Placebo Effect: The Relative Roles of Pharmacology and Response Expectancies in Pain and Sleep, Co-Investigator and UWO Collaborator
Canadian Institute of Health Research, New Emerging Team Grant
$1,200,000 ($248,000 Year 6)
2008 - 2009; Academic Year

14. **Morley-Forster P** (Co-Investigator)
Pain and Fatigue of Osteoarthritis, Canadian Arthritis Network
$1,500,000 ($150,000 Year 5)
2008 - 2009; Academic Year
15. **Murkin JM, Walley KR**  
Genetic Determinants of Neurocognitive Dysfunction Following Cardiopulmonary Bypass, Principal Investigator  
Heart and Stroke Foundation of Canada  
$258,592 ($85,328 Year 1)  
2008 - 2009; Academic Year  

16. **Railton C (Principal Investigator), Cheng D**  
Anesthesia and Clinical Pharmacology Academic Joint Recruitment Fund  
The Academic Medical Organization of Southwestern Ontario (AMOSO)  
$120,000 ($40,000 Year 3)  
2008 - 2009; Academic Year  

17. Watling C, Zibrowski E, Kenyon C, Goldzsmidt M, **Schulz V, Singh I, Lingard L**  
Engagement in the In-Training Evaluation (ITE) Process: An Exploration of Faculty Perspectives, Co-Investigator(s)  
RCPSC 2008 Medical Education Research Grant  
$13,200  
2008 - 2009; Academic Year  

18. Hagan N, **Schulz V**  
A Multidisciplinary Cancer Pain Research Network to Improve the Classification, Assessment, and Management of Difficult Cancer Pain Problems  
Co-Investigator  
Canadian Institute of Health Research Grant  
$1,363,586 ($227,264 Year 5)  
2008 - 2009; Academic Year  

19. Ellis CG, Goldman D, **Sharpe MD**  
Oxygen Supply Dependency: Mechanisms and Modulation, Co-Investigator  
Canadian Institute of Health Research (CIHR)  
$255,330 ($63,832 Year 3)  
2008 - 2009; Academic Year  

20. **Sharpe MD, Levstik M, House A, Butler R**  
Treatment of Acute or Ahronic Liver Decompensation with Molecular Adsorbent Recirculation System (MARS) in Patients Awaiting Liver Transplantation  
Co-Investigator  
Physicians’ Services Incorporated Foundation - $83,000 ($13,833 Year 3)  
2008 - 2009; Academic Year
NON-PEER REVIEWED GRANTS
AND FUNDING

1. Karkouti K, Cheng D
   A Randomized, Double Blind, Placebo-Controlled, Multi-Centre Study to Evaluate the Efficacy of Activated Recombinant Factor VII for Early Control of Memorrhage in High-Risk Cardiac Surgery (USA and Canada), Principal Investigator for Site
   Novo-Nordisk Inc. Grant for Clinical Trials
   $15,000 ($3,750 Year 3)
   2008 - 2009; Academic Year

   Multi-Centre Neuropathic Pain Database Study
   Long-Term Outcome of the Pharmacologic Management of Neuropathic Pain
   $853,088 Over 3 Years, Pfizer Canada ($284,362 Year 2)
   2008 - 2009; Academic Year

3. Ralley F
   ONTraC and Ontario Government
   Funding for Two Nurses
   Chart Review of Utilization of Allogeneic Blood Transfusion and Alternatives to Allogeneic Blood Transfusion in High Blood Loss Elective Surgical Procedures for ONTraC Off Site Database
   $84,000/Year (2005 - 2010)
   2008 - 2009; Academic Year

4. Sharpe MD (Principal Investigator), Young GB, Butler R
   Development of an Automated, Bedside EEG Classification System
   GE-Healthcare Technologies
   $128,560 ($21,422 Year 3)
   2008 - 2009; Academic Year

5. Sharpe MD (Principal Investigator), Sprenger H
   The Use of Oxandrolone, an Anabolic Steroid, to Augment Positive Nitrogen Balance
   Medbuy Corporation Research, Education and Development Fund
   $7,500 ($3,750 Year 1)
   2008 - 2009; Academic Year
INTERNAL GRANTS AND FUNDING

1. **Dhir S**
   Local Anesthetic Dilution for Peripheral Nerve Blocks, Principal Investigator
   Department Grant, Internal Research Fund
   $5,500
   2008 - 2009; Academic Year

2. **Imasogie NN (Principal Investigator), Singh I, Watson J, Morley- Forester PK**
   The Effect of the Combined Use of Naloxone Infusion and Oral Tramace on Post-Operative Analgesia in Elderly Patients Undergoing Joint Replacement Surgery
   Department Grant, Internal Research Fund
   $10,000 ($3,636 Year 2)
   2008 - 2009; Academic Year

3. **Lavi R (Principal Investigator), Bainbridge D**
   Remote Endothelial Preconditioning Before CABG
   Department Grant, Internal Research Fund
   $10,000
   2008 - 2009; Academic Year

4. **Lavi R (Principal Investigator), Lavi S, Bainbridge D**
   Remote Ischemic Preconditioning Before Coronary Artery Bypass Grafting Surgery and the Prevalence of Perioperative Atrial Fibrillation
   Academic Development Fund, The University of Western Ontario
   $8,500
   2008 - 2009; Academic Year

5. **Singh I (Principal Investigator), Dhir S**
   Multi-Centred Randomized Controlled Trial Examining the Effect of Small Versus Large Tuohy-Type Epidural Needles on the Incidence and Severity of Postdural Puncture Headache
   Department Grant, Internal Research Fund
   $10,000 ($5,000 Year 2)
   2008 - 2009; Academic Year

6. **Taneja R (Principal Investigator)**
   Focused Bedside Ultrasound Curriculum Development in the ICU
   The University of Western Ontario 2008, Instructional Innovation and Development Fund
   $6,000
   2008 - 2009; Academic Year
7. Turkstra T
Comparison of Flex-It Stylet to Malleable Stylet for GlideScope Intubation
A Randomized Controlled Trial
Department Grant, Internal Research Fund
$1,500
2008 - 2009; Academic Year
