1. Course Information

**Medical Biophysics 3501A:**
**Biophysics of Transport Systems**
**Fall Term 2017**

This course describes the physiology and biophysics of the cardiovascular system (in health and
disease), blood flow control and red blood cell distribution, and vascular mechanics in the
microcirculation and large vessels, surface energy and interactions at biological interfaces such as
the lung, diffusive and convective transport and exchange.

**Antirequisite(s):** Medical Biophysics 3302E.
**Prerequisite(s):** one of Calculus 1000A/B, 1100A/B, Mathematics 1225A/B, Applied
Mathematics 1413 or the former Mathematics 030; 1.0 course from Physics 1020, 1024, 1028A/B
and 1029A/B, or the former Physics 022 or 025. Typically taken in third or fourth year, this
course is also open to second-year students with an overall average of at least 70% in first year.
**Extra Information:** 2 lecture hours, 1 tutorial hour, 0.5 course.

**Lectures**
Tuesday and Thursday: 1:30 -2:30 NS-1

**Tutorial**
Tuesday Group: 12:30 - 1:30 pm KB-K208
Wednesday Group: 11:30 am – 12:30 pm HSB-236

**Senate regulation regarding the student’s responsibility regarding requisites:**
Unless you have either the requisites for this course or written special permission from your Dean
to enroll in it, you may be removed from this course and it will be deleted from your record. This
decision may not be appealed. You will receive no adjustment to your fees in the event that you
are dropped from a course for failing to have the necessary prerequisites **Senate regulation
regarding the student’s responsibility regarding requisites:**
Unless you have either the requisites for this course or written special permission from
your Dean to enroll in it, you may be removed from this course and it will be deleted
from your record. This decision may not be appealed. You will receive no adjustment to
your fees in the event that you are dropped from a course for failing to have the necessary
prerequisites.

*Please contact the course instructor if you require material in an alternate format or if
any other arrangements can make this course more accessible to you. You may also
wish to contact Services for Students with Disabilities (SSD) at 661-2111 x 82147 for
any specific question regarding an accommodation.*

TEACHING ASSISTANTS:
Tracy Ssali: tssali@uwo.ca
Kent Lemaster: klemaste@uwo.ca

OWL (Formerly WebCT):
Students with Owl issues should contact the Computer Support Centre at 519 661-3800

3. Course Syllabus

This course replaces the first half of the former Medical Biophysics 3302E with tutorials and extra assignments instead of the laboratories. It is used together with Medical Biophysics 3503G and 3970Z (lab) to replace 302E in the Medical Biophysics modules. This course is also cross-listed with Biomedical Engineering 9501A and serves as the first half of Medical Biophysics 9500.

General information:
(from: http://www.uwo.ca/univsec/pdf/academic_policies/exam/courseoutlines.pdf)
“Unless you have either the requisites for this course or written special permission from your Dean to enroll in it, you may be removed from this course and it will be deleted from your record. This decision may not be appealed. You will receive no adjustment to your fees in the event that you are dropped from a course for failing to have the necessary prerequisites.”

LEARNING OUTCOMES
By the end of the course students will be able to:
(i) Use the concepts of vascular pressure, geometry and elasticity along with blood viscosity and velocity to assess energy storage and convective transport throughout the body. Use the concepts of partial pressure, diffusion, and microvascular geometry and blood flow to assess diffusive transport in tissues. Analyze series and parallel circuits to determine the effects of the control of vascular resistance on blood pressure and flow under normal and pathological conditions.
(ii) Use problem solving to integrate concepts from each lecture in an effort to understand and describe the biophysics of the circulation in healthy and diseased states.

APPROACH
Lecture-discussion periods: Presentation of material supported by class discussion and demonstrations. Frequent ‘in class’ quizzes are provided to apply knowledge and to help students and lecturers assess progress.
Tutorials: Review of lecture material and exam preparation.

EXAM REVIEW

QUIZ #4 (November 30, Beginning of class)

FINAL EXAM (time set by Registrar) - 2 hours (covers all topics)

4. Course Materials
   There is no formal text for the course. Instructional material will be provided electronically on OWL and students may be directed to on-line references.

5. Evaluation:

   Component % of Final Mark
   In class quizzes: 20%
   Midterm test: 30%
   Final exam: 50%

6. Additional Information/Statements
   Statement on Academic Offences
“Scholastic offences are taken seriously and students are directed to read the appropriate policy, specifically, the definition of what constitutes a Scholastic Offence, at the following website:
http://www.uwo.ca/univsec/handbook/appeals/scholastic_discipline_undergrad.pdf.”

“Plagiarism: Students must write their essays and assignments in their own words. Whenever students take an idea, or a passage from another author, they must acknowledge their debt both by using quotation marks where appropriate and by proper referencing such as footnotes or citations. Plagiarism is a major academic offence (see Scholastic Offence Policy in the Western Academic Calendar).”

THE USE OF ELECTRONIC DEVICES
All cellular telephones and recording devices must be turned off during class time. In addition, while laptops are useful classroom tools, specifically for taking notes, using laptops and cellular telephones for personal enjoyment (i.e. Facebook, email, texting, Twitter, Snapchat, etc) during the class is unacceptable. Furthermore, usage of computers for purposes that are not related directly to class participation during class time (i.e. note taking) will result in restricting the use of computers in class. Finally, students are not permitted to record lectures using any electronic recording devices. Lectures are the intellectual property of the professor and unauthorized recording of lectures is considered an academic offence. Students who require assistance with note taking should consult the Student Development Centre.

EMAIL CORRESPONDENCE
For security reasons, emails will only be answered when they come from your official UWO email account. Please keep all correspondence professional and concise.

Absence from course commitments
A. Absence for medical illness:
Students must familiarize themselves with the Policy on Accommodation for Medical Illness: https://studentservices.uwo.ca/secure/index.cfm

Statement from the Dean's Office, Faculty of Science
If you are unable to meet a course requirement due to illness or other serious circumstances, you must provide valid medical or other supporting documentation to the Dean's office as soon as possible and contact your instructor immediately. It is the student's responsibility to make alternative arrangements with their instructor once the accommodation has been approved and the instructor has been informed. In the event of a missed final exam, a "Recommendation of Special Examination" form must be obtained from the Dean's Office immediately. For further information please see: http://www.uwo.ca/univsec/handbook/appeals/medical.pdf

A student requiring academic accommodation due to illness, should use the Student Medical Certificate when visiting an off-campus medical facility or request a Record's Release Form (located in the Dean's Office) for visits to Student Health Services.
The form can be found at:
https://studentservices.uwo.ca/secure/medical_document.pdf

**B. Absence for non-medical reasons:**
A clear indication of how **non-medical absences** from midterms, tutorials, laboratory experiments, or late essays or assignments, will be dealt with must be provided. If documentation is required, such documentation must be submitted by the student directly to the appropriate Faculty Dean`s Office and **not** to the instructor. It will subsequently be the Dean`s Office that will determine if accommodation is warranted.

**C. Special Examinations**
A Special Examination is any examination other than the regular examination, and it may be offered only with the permission of the Dean of the Faculty in which the student is registered, in consultation with the instructor and Department Chair. Permission to write a Special Examination may be given on the basis of compassionate or medical grounds with appropriate supporting documents.

A Special Examination must be written at the University or an Affiliated University College no later than 30 days after the end of the examination period involved. To accommodate unusual circumstances, a date later than this may be arranged at the time permission is first given by the Dean of the Faculty. The Dean will consult with the instructor and Department Chair and, if a later date is arranged, will communicate this to Registrarial Services. If a student fails to write a scheduled Special Examination, permission to write another Special Examination will be granted only with the permission of the Dean in exceptional circumstances and with appropriate supporting documents. In such a case, the date of this Special Examination normally will be the scheduled date for the final exam the next time the course is offered.

**Students that are in emotional/mental distress** should refer to Mental Health@Western, [http://www.uwo.ca/uwocom/mentalhealth/](http://www.uwo.ca/uwocom/mentalhealth/), for a complete list of options about how to obtain help.

**Support Services:**
Registrarial Services: [http://www3.registrar.uwo.ca/index.cfm](http://www3.registrar.uwo.ca/index.cfm)

Academic Counselling (Science and Basic Medical Sciences):
