Planning your Experience

Planning your Experience with BMSc in mind

Timelines/Requirements to Consider:

Completion of [admission criteria for Year 3 BMSc](#) (i.e. 2000-level admission requirements, course load considerations).

Completion of requirements for progression to year 4; see the module page or the courses identified in the [Weighted Average Chart](#)

Keep in Mind:

- **Requirements to progress to year 4:** This scenario works with modules/module combinations that require half year courses. We recommend you look at the feasibility of taking all of your required courses during your terms at Western and only taking options while away. Otherwise, you may be able to find exact equivalents for your required courses at your host institution.

Tip: If you are planning a double Major combination, be mindful of the prerequisite courses for your 4000-level requirements.
