Subject: Med Sci 2: adjudication update and Upcoming Information Sessions

This email message is being sent to all students who submitted an ITR for Medical Sciences 2. A copy of this email messages is posted on the [landing page for Medical Sciences 2](#). I would ask that you please read it carefully as it contains a lot of important information (and I will refer you back to it if you email me with a question that is answered below).

The adjudication process is ongoing for students who requested Medical Sciences 2 and have not been “automatically adjudicated” by the Office of the Registrar.

- Some students already have their adjudication decision because they passed all the markers for automatic adjudication (e.g., students with transfer credits from IB courses in high school do not get automatically adjudicated and are in my adjudication queue)

Please do not email me, the Academic Counselling Office of any departments about your adjudication decision. Be patient! Registration for second-year students doesn't begin until the week of July 18.

Adjudication decisions *should* be available for most Medical Sciences 2 students in the next couple of weeks.

Please be patient as you wait for your results. Your adjudication decision will be posted in your Grade Report:

- Go to Student Center > Academics > Program Status
- Click on the “Grade Report - Progression” tab at the top right and make sure that 2022 Fall/Winter shows up in Select Term (if not, then change the term)
- Look for **Remarks** under the listing of courses and marks – this is your adjudication decision

How to interpret your Remarks:

You will see the following comment if you *are eligible for Medical Sciences 2*:

- *Eligible for Medical Sciences 2*

You will see the following remark if you *are not eligible for Medical Sciences 2*:

- *Not eligible to progress to Medical Sciences 2. This is usually accompanied by the following Remark - Degree and/or module(s)/program changed per Faculty decision. Review registration for coming year in Student Center > Academics > Program Status– and the Office of the Registrar will update your program as soon as possible.*

Remarks about summer courses:

To register in Medical Sciences 2 next year, you must successfully complete (pass) any summer course in which you are registered and you may see one of the following remarks:

- *Program is dependent on successful completion of summer course* – you simply have to pass your summer course to remain registered in Medical Sciences 2. Dropping the course by the deadline will not impact your registration in Medical Sciences 2.
- *Program is dependent on successful completion of summer course(s) with min mark of 65% or min avg of 70% - assigned for students who are in Western Scholars and Scholar's Electives since all courses must be completed with marks of at least 65%, etc. Dropping the course by the deadline will not impact your registration in Medical Sciences 2.*

What happens next:

Registration for Fall/Winter courses:

The Fall/Winter timetable has been posted. There may be changes over the next month so make sure you check for updates.

The Office of the Registrar will post your Enrollment Date for Fall/Winter course registration in mid-July since second-year students don't begin registration until July 18.

Course Selection:

Review the information about [Course Selection for Year 2](#) on the BMSc website.

Zoom meeting/presentation about Medical Sciences 2 – course selection:

I've scheduled Zoom Info Sessions the following dates to go over course selection for Medical Sciences 2.

[June 23: 10:00-11:00am](#)

[July 6: 1:30-2:30pm](#)

What We're working on this month:

Constraints: The [constraint charts](#) will be updated after adjudication has been completed and should be available on the BMSc website late next week.

Worksheets for Double Majors and Honours Specialization modules: The [worksheets](#) will be updated and re-posted before registration begins.

Zoom meetings with me:

I've opened up the [booking for Zoom meetings](#) with me in June/July. If you book a meeting with me, then either show up for the meeting or cancel it at least 24 hours in advance (so that someone else can book that spot).

One last thing – this is the busiest time of the year for the BMSUE Office. We will do our best to answer all questions submitted to the [BMSUE Question Portal](#) as quickly as we can. Please do your best to find the information that is relevant to you on the BMSc website and in the Academic Calendar.

I will be in touch by email in a few weeks to all students who progressed to Med Sci with more information leading up to course registration in mid-July.

Thanks and take care,

Jen
