The **Hebb Laboratory** is accepting applications for a 1-2 year Research Fellowship to investigate translational molecular and cell biology in neurological disease. Studies will utilize tissues from living human and animal brain, and involve a broad range of cellular, molecular, imaging and in vivo investigations. For those interested, there will also be opportunities for clinical exposure to a host of human neurological disease.

The ideal candidate will have a background in Cell and Molecular Biology, a record of scientific publications and excellent oral and written communication skills. Previous experience with cell culture, animal surgery and histopathology are all preferred. Successful candidates would be highly motivated and have a good degree of independence.

**Essential Qualifications:**
- Ph.D. or equivalent degree in a relevant discipline; Cell or Molecular Biology preferred;
- A strong understanding of research design, research methodology and data analysis;
- Advanced knowledge of statistical software packages;
- Excellent oral communication and technical writing skills;
- Experience in preparation and publication of manuscripts;
- Excellent computer skills (e.g., Microsoft Office, Reference Manager, EndNote, SPSS);
- Ability to take guided initiative and to work in an organized fashion within a fast-paced research environment, including flexibility in shifting between independent and collaborative work;
- Demonstrated collegiality, professionalism and interpersonal skills.

Interested candidates should submit a cover letter of intent describing your research interests and career goals and accompanying curriculum vitae, along with the names and addresses of three references to be contacted, to: cheryl.johnson@lhsc.on.ca.
