Moderate Conscious Sedation: Nitrous Oxide and Oral Sedation
DR. PETER NKANSAH and DR. MICHELLE TANG

PROGRAM OUTLINE
There are a number of stress reduction techniques in dentistry available to us today. Few, if any, carry the advantages that nitrous oxide and benzodiazepines do. Dentists will leave this course with the knowledge of how to safely and effectively incorporate nitrous oxide and oxygen into their practice, as well as, oral benzodiazepines alone or in combination with nitrous oxide. There is a written examination for certification with the RCDSO. This is a limited enrolment course.

NO PRE-REQUISITES REQUIRED

LEARNING OBJECTIVES
Course content includes a review of:

- RCDSO standard of practice; patient monitoring requirements; respiratory and cardiovascular system physiology; pharmacology of nitrous oxide and benzodiazepines; conscious sedation armamentarium;
- Oral sedation regimens; nitrous oxide administration; medical emergencies and airway management; incorporation of moderate conscious sedation into your practice.
- Each participant will get experience in the clinical application of nitrous oxide sedation.

ABOUT THE SPEAKERS

PETER NKANSAH, BSc (Hon), DDS, MSc, Dip Anaes, FADSA, Cert. Specialist in Dental Anaesthesia
Dr. Nkansah is a certified specialist in Dental Anaesthesia (Ontario) in private practice in Toronto. He teaches at Western University and is assistant professor at the University of Toronto. He is a Course Director for ACLS at Sunnybrook Health Sciences Centre and on the editorial board of Oral Health.
