Medical Grand Rounds

Thursday, September 28, 2017
12:00 — 1:00pm
Auditorium B, University Hospital

Personalized Medicine Update: Optimizing drugs for GERD, Cancer, and IBD

Objectives:

1. Outline the importance of CYP2C19 genotype to PPI metabolism and response
2. Demonstrate the importance of DPYD genotyping to capecitabine and 5-FU-based chemotherapy
3. Demonstrate the clinical relevance of a newly identified HLA genotype for predicting risk to azathioprine-induced pancreatitis

The Medical Grand Rounds at University Hospital is a self-approved group learning activity (Section 1) as defined by the Maintenance of Certification program of the Royal College of Physicians and Surgeons of Canada. Evaluations will be sent out and your attendance calculated automatically through One45.
