Department of Epidemiology and Biostatistics

CLINICAL EPIDEMIOLOGY
EPIDEMIO 4320A/9562A

FALL 2018

Janet Martin, PharmD, MSc(HTA&M)
Associate Professor, Department of Anesthesia & Perioperative Medicine
and Department of Epidemiology and Biostatistics
Director, Centre for Medical Evidence, Decision Integrity & Clinical Impact (MEDICI),
London Health Sciences Centre, St. Josephs Health Care, Lawson Health Research Institute,
and Schulich School of Medicine & Dentistry

Monday: 12:30-3:30pm (Room FNB 2220)
TA: TBA
Office: University Hospital, Room B3-412
TA Office hours: By appointment
Email: jmarti83@uwo.ca
TA Tutorials: By request
Tel: 519-685-8500 x34482
Office hours: By appointment

Contributing Lecturers & Curriculum Development Committee

Dr. Philip Jones, MD, MSc, FRCPC, Associate Professor, Department of Anesthesia & Perioperative Medicine,
Western University will contribute to the sessions on prognosis, diagnosis, screening, and research integrity. Other
guest lecturers will also contribute to case discussions, depending on their availability. Thanks also to the Clin Epi
Curriculum Development Committee, comprised of alumni from previous years of the course, who contribute to
refining content, incorporating your feedback, and further developing tools and teaching techniques.

Course Description

Students in this course develop basic and intermediate skills required for critical evaluation of the evidence from
clinical studies to support evidence-informed decision-making in health care. Through a combination of lectures,
videos, and interactive case-based approaches, students will find, filter, interpret and apply evidence from the
scientific literature to inform decisions about individual patients (patient-level clinical decision-making) and about
groups of patients (population level health policy-making).

Using a combination of cases from the real world of clinical practice and scenarios from published studies and
popular media, students will interact with each other in small-group case discussions and team-based learning.
Group activities will be interjected by mini-didactics to clarify concepts from the required readings. Students will
be required to complete readings, evidence explorations, and assignments before class. They will be expected to
demonstrate ability to apply the concepts from the readings during class. Evaluation will be highly dependent on
participation, supplemented by quizzes, and assignments.

Course Information

Undergraduate pre-requisites: Biostatistics 3100A and Epidemiology 3200A.
Unless you have either the requisites for this course or written special permission to enroll in it, you may be removed from this course and it will be deleted from your record. Undergraduate students may seek special permission from the Undergraduate Chair, and graduate students may seek special permission through the Graduate Chair. This decision may not be appealed. You will receive no adjustment to your fees in the event that you are dropped from a course for failing to have the necessary prerequisites or permissions.

**Course Syllabus**

**Learning Objectives:**

Upon successful completion of this course, students will be able to:

1. Describe the role of ‘evidence’ in decision-making in health care, and define the role of uncertainty in relationship to ‘evidence’.
2. Compare and contrast evidence-informed decision-making versus other forms of decision making for individual patients and for groups of patients.
3. Define and identify different types of bias in clinical research, and describe the role of appropriate study design and analysis to reduce the risk of bias.
4. Identify and formulate different types of clinical questions and policy questions in health care (diagnosis, prognosis, screening and prevention, therapy, harm).
5. Choose the best level of evidence to address different clinical and policy questions (case series, cohort studies, case-control studies, randomized controlled trials, systematic reviews, meta-analyses, economic analyses, health technology assessments, health policy analyses).
6. Critically appraise different types of studies (prognosis, diagnosis, therapy, harm, screening and prevention, meta-analysis, systematic review, health technology assessment, and cost-effectiveness analysis).
7. Apply evidence from different study types to resolve case-based clinical questions and policy scenarios.
8. Create and apply risk of bias tables and summary of findings tables using the GRADE approach to formulate evidence-informed recommendations for clinical scenarios.
9. Describe limitations in the evidence base, and the interdisciplinary role of epidemiologists, biostatisticians, clinical epidemiologists, clinicians, and policymakers to continuously improve the evidence base and its application.
10. Describe the barriers and facilitators of getting evidence from clinical studies into real world practice (knowledge translation: from evidence to impact).

**Course Materials**

**Required Textbook:**

  
  Note: The text will be available from the bookstore. **Be careful to buy the manual for evidence-based clinical practice** and **NOT** the “essentials” of evidence-based clinical practice (which is a shorter version, also by Gordon Guyatt).

**Optional Textbook:**

**Electronic Devices:**

Laptops and internet-enabled devices are recommended for in-class use, and will also be useful during group exercises and between-class group work. Access to video-recording devices is recommended for selected out-of-class assignments and for submitting vlogs.

**Methods of Evaluation**

40% Participation + 50% Assignments + 10% Quizzes
Participation (40%)

Attendance in class is expected. The professor and TA should be notified of any extenuating circumstances that preclude a student from attending class. Active participation during interactive case discussions, lectures, and group assignments is expected. In addition, active participation in team-based case preparation between classes is expected. Readings and recommended videos should be reviewed prior to class so that the student is prepared to contribute to class discussion. As appropriate, student-initiated and instructor-initiated online discussions on OWL and the voluntary submission of student teaching or reflections by vlog/blog will also be considered in the participation grade.

Participation Rubric (the following are typical milestones along a continuum of possible grades):

<table>
<thead>
<tr>
<th>Rubric benchmarks</th>
<th>Unsatisfactory &lt;65%</th>
<th>Satisfactory 65-75%</th>
<th>Very Good 75-85%</th>
<th>Excellent 85-95%</th>
<th>Brillant 95-100%</th>
<th>Max. Mark</th>
</tr>
</thead>
<tbody>
<tr>
<td>Attendance</td>
<td>Attends &lt; 65% of classes</td>
<td>Attends 65-75% of classes</td>
<td>Attends 75-85% of classes</td>
<td>Attends 85-95% of classes</td>
<td>Attends &gt; 95% of classes</td>
<td>4%</td>
</tr>
<tr>
<td>In-Class Participation (+/- blogs/vlogs)</td>
<td>Contributes rarely in-class or via vlogs/blogs, often with less than satisfactory content knowledge, and often shows difficulty in application to cases. Displays lack of interest in class.</td>
<td>Contributes sometimes in-class and/or via vlogs/blogs, with satisfactory display of content and often able to apply to cases. Displays interest in class.</td>
<td>Contributes regularly in-class and/or via vlogs/blogs with a very good display of content knowledge and usually able to apply to cases. Displays positive interest in class.</td>
<td>Contributes frequently in-class and/or via vlogs/blogs, with excellent discernment of content and consistently able to apply to cases across contexts. Displays keen enthusiasm in class.</td>
<td>Contributes frequently in-class and/or via vlogs/blogs, with excellent discernment of content and consistently able to apply to even the most complex cases and contexts with breadth of perspective, often with brilliance. Displays keen enthusiasm and expert level engagement in class.</td>
<td>20%</td>
</tr>
<tr>
<td>Team-Based Participation</td>
<td>Displays less than satisfactory group participation in content contribution, professionalism, and collaboration. Often rejects feedback. Does not consistently facilitate equal opportunity for group members. Is not well-prepared for group meetings, and/or does not attend meetings.</td>
<td>Displays tentative but generally positive group participation, and professionalism which reflects ‘satisfactory’ level collaboration and contribution. Often accepts feedback. Agrees with equal opportunity of group members. Is generally prepared for group meetings.</td>
<td>Displays consistently positive group engagement, leadership, and professionalism which reflects ‘very good’ level of collaboration and contribution. Generally accepts and incorporates feedback. Provides group members equal opportunity to excel. Is well-prepared for group meetings.</td>
<td>Displays consistently positive group engagement, leadership, and professionalism which reflects ‘excellent’ level of collaboration and contribution. Seamlessly accepts and incorporates feedback. Provides group members equal opportunity to excel. Is well-prepared for group meetings.</td>
<td>Displays consistently positive group engagement, leadership, and professionalism which reflects ‘expert’ level collaboration and contribution. Seamlessly accepts and incorporates feedback. With exceptional skill, builds up other group members to ensure they excel and facilitates a well-functioning team. Is exceptionally well-prepared for group meetings.</td>
<td>16%</td>
</tr>
</tbody>
</table>

Overall Participation Mark 40%
Student Vlog/Blog Instructions:

Unless otherwise specified, student-initiated video blogs (vlogs) or written blogs are a voluntary contribution (not mandatory), but are highly encouraged as a learning and reflective tool. Students who contribute meaningful vlogs/blogs tend to gain a richer learning experience. Vlogs/blogs provide the opportunity for students to “teach a concept”, reflect on “surprising findings”, or other “topics that resonate with you” from class or from your group work. Vlogs/blogs can also be used as a tool to provide your own reflections or feedback to the course instructor on the interactive case-based teaching style used in this course. Vlogs/blogs are provided as an alternative or additional mode of participation for students who wish to participate more freely outside of the classroom setting in order to increase their participation contribution. Any vlogs/blogs submitted will be considered as complementary to in-class participation, and provide an opportunity to increase overall participation contribution. If you opt to submit vlogs/blogs, any submissions that you wish to be considered for your interim participation mark should be submitted at least 1 week prior to mid-term participation evaluations (week 7). Similarly, any submissions that you wish to be considered for your final participation mark should be submitted at least 1 week prior to final participation evaluations before December 21.

There is no standard format for vlogs/blogs. The most advanced submissions will provide an educational “short take” or primer on a key concept related to class or from the readings, with an applied example. Other examples of advanced submissions include personal reflections on the learning from class, or the readings, or from the group work with a well-constructed overview of prior thinking versus new understanding, and remaining uncertainties that you grapple with. There is no limit to the number of blogs/vlogs you can submit. Typically, vlogs will be less than 5 minutes in length. Group vlog or blog submissions are welcome, as long as the credits briefly explain the role of the members of the group in creating the vlog content.

Please upload your vlogs to YouTube as 'Unlisted videos'. This means that only people directly provided with the link to the video will be able to view it. Please refer to the OWL course site for further instructions.

All blogs or vlogs must be submitted directly to Dr. Martin and the TA through OWL Dropbox. Use the following Subject line for your submission: Student Name – Reflections Week # (example: Jane Doe – VLOG Week 3). Copy and paste the link to your video in the message body. You are responsible for making sure your link works. Please check that it does before you submit, since dead links commonly occur. If you choose to submit a written response instead of a vlog, type your response in the message body or submit it as an attachment.

Assignments (50%)

Individual or small group work assignments must be uploaded to OWL Dropbox as an attachment. **Note: Assignments submitted after the deadline will be deducted 25% per day late.**

- **Assignment #1** (5%) – Critical Appraisal of Treatment Article (RCT)  Due: October 8 at 12:00 noon
- **Assignment #2** (10%) – Critical Appraisal of Evidence Synthesis (SR-MA) Due: October 22 at 12:00 noon
- **Assignment #3** (20%) – GRADE & Recommendations (GUIDELINE) Due: November 26 at 12:00 noon
- **Assignment #4** (15%) – Applied Case or Teaching Vignette  Due: December 20 at 11:59 pm.

- Use the following naming convention for your submissions: SURNAMEFirst name_Assignment# (example: MARTINJanet_Assignment1)
- Individual submissions should include the student name as a header on each page. Team submissions should include the student names of all team members as a header on each page.
- All written submissions must be either in Word Document format or PDF

Quizzes (10%)

In-class or OWL-enabled quizzes will occur at the beginning of most classes (valued at approximately 1 or 2% per quiz). Quizzes will focus on key concepts covered in the readings and discussions from prior class.
Policy on Accommodation for Medical and Non-Medical Absences
The University’s policy on Accommodation for Medical Illness may be found at:

The University has a new policy on Accommodation for Medical Illness, which states that “in order to ensure fairness and consistency for all students, academic accommodation for work representing 10% or more of the student’s overall grade in the course shall be granted only in those cases where there is documentation indicating that the student was seriously affected by illness and could not reasonably be expected to meet his/her academic responsibilities. Documentation shall be submitted, as soon as possible, to the appropriate Dean’s office…” (i.e., the Associate Dean, Graduate Studies). This same policy applies for work representing less than 10% of the student’s overall grade.

All non-medical absences must be approved in advance. In the case of an unexpected absence on compassionate grounds, documentation may be requested. If documentation is required by the instructor for either medical or non-medical academic accommodation, then such documentation must be submitted by the student directly to the appropriate Faculty Dean’s office and not to the instructor. It will be the Dean’s office that will determine if accommodation is warranted.

Statement on Academic Offences
Scholastic offences are taken seriously and students are directed to read the appropriate policy, specifically, the definition of what constitutes a Scholastic Offence:

OR

http://www.uwo.ca/univsec/pdf/academic_policies/appeals/scholastic_discipline_grad.pdf

Additionally:

a) If written work will be assigned in the course and plagiarism-checking software might be used, the following statement to this effect must be included in the course outline:
“All required papers may be subject to submission for textual similarity review to the commercial plagiarism detection software under license to the University for the detection of plagiarism. All papers submitted for such checking will be included as source documents in the reference database for the purpose of detecting plagiarism of papers subsequently submitted to the system. Use of the service is subject to the licensing agreement, currently between The University of Western Ontario and Turnitin.com (http://www.turnitin.com)."
b) If computer-marked multiple-choice tests and/or exams will be given, and software might be used to check for unusual coincidences in answer patterns that may indicate cheating, the following statement must be added to course outlines:
“Computer-marked multiple-choice tests and/or exams may be subject to submission for similarity review by software that will check for unusual coincidences in answer patterns that may indicate cheating.”

Support Services
Students seeking help regarding mental health concerns are advised to speak to someone they feel comfortable confiding in, such as their faculty supervisor, their program director (graduate or undergraduate chair), or other relevant administrators in their unit.

Students who are in emotional/mental distress should refer to Mental Health@Western http://www.uwo.ca/uwocom/mentalhealth/ for a complete list of options about how to obtain help. Western has a new Wellness Education Centre located in UCC, room 76.

To help you learn more about mental health, Western has developed an interactive mental health learning module, found here: http://www.health.uwo.ca/mental_health/module.html. This module is 30 minutes in length and
provides participants with a basic understanding of mental health issues and of available campus and community resources. Topics include stress, anxiety, depression, suicide and eating disorders. After successful completion of the module, participants receive a certificate confirming their participation.

As part of a successful student experience at Western, we encourage students to make their health and wellness a priority. Western provides several on campus health-related services to help you achieve optimum health and engage in healthy living while pursuing your degree. For example, to support physical activity, all students, as part of their registration, receive membership in Western’s Campus Recreation Centre. Numerous cultural events are offered throughout the year. Please check out the Faculty of Music web page http://www.music.uwo.ca/, and our own McIntosh Gallery http://www.mcintoshgallery.ca/. Information regarding health- and wellness-related services available to students may be found at http://www.health.uwo.ca/

Department & Faculty Offices
The Epidemiology & Biostatistics main office is located in K201 in the Kresge Building on Main campus.

For undergraduate academic counseling assistance, students will need to speak with the Bachelor of Medical Sciences Office: http://www.schulich.uwo.ca/bmsc/general-counselling.

Technology Requirements
You are responsible for all required course materials and announcements posted to the course’s OWL website. Please ensure after the first class that when you log in you are able to access the course site. A copy of the course outline will be available on both OWL and the departmental website.
