

November 6, 2009

As influenza activity continues to be prevalent in London and the surrounding community and with the recent release of new visitor restrictions in London Hospitals, as the Undergraduate Dean at Schulich School of Medicine & Dentistry, I have made the decision to suspend Clinical Observerships at this time for all Year 1 & 2 students *effective immediately* until further notice.

The Undergraduate Medical Education office will notify the affected facilitators as well as Clinical Departments of the decision to suspend Observerships.

We will contact you immediately as soon as we are able to reinstate Observerships.

Sincerely,

Margaretha Rebel, MD M Ed FRCSC  
Associate Dean  
Undergraduate Medical Education  
Schulich School of Medicine  
The University Of Western Ontario
