

(Memo sent by email November 3, 2009)

To all Postgraduate Residents and Clinical Fellows

In order that both the hospitals, Schulich School of Medicine and Dentistry and your program can address staffing issues due to resident/fellow respiratory illness, we are asking each of you to report to your Program Director's office by 0900 daily if you are unable to work due to a respiratory illness. Please note, you must report to your Program Director office regardless of your training location. This information will then be collated on a program by program basis and reported at noon each day. With this information in hand we hope to be in a better position to plan to fill any gaps as required. Please help us by reporting to your Program Director starting tomorrow (Wednesday Nov 4).

Thanks for your assistance and ongoing commitment to patient care during these difficult and rapidly changes times.

Dr. Gillian Kernaghan, Integrated VP Medicine Education & Medical Affairs
Dr. Sal Spadafora, Associate Dean, Postgraduate Medical Education
