Custom Biologics™ is an innovative large and small molecule contract testing laboratory that specializes in custom bioanalytical and bioassay method development and validation. We have an immediate opening for a Scientist in our Large Molecule/Bioassay Group. The position requires,

**Primary Responsibilities:**

- Hands-on technical expertise with ELISA, immunogenicity and cell-based bioassays.
- Cell culture experience.
- Working knowledge of Good Laboratory Practices (GLP) and Good Manufacturing Practices (GMP).
- Familiarity with testing methods that are in accordance with the appropriate regulatory guidelines.
- Preparing standard operating procedures, experimental records and technical documentation.
- Performing literature reviews to ensure knowledge of current practices, technologies and advances in this field.
- Willingness to work independently as well as part of a team.
- Compliance with company’s Quality System and GxP guidelines.

**Qualifications Required:**

- A minimum of an MSc in immunology, biochemistry, cell biology or related discipline.
- Strong analytical and problem solving skills.
- Positive ‘can-do’ attitude. Willingness to learn on the job.
- Careful conscientious worker with strong attention to detail.
- Well organized; ability to multi-task and prioritize.
- Excellent written and communication skills.
