Principles for Elective Rotations

Principles for elective rotations:

- all postgraduate training programs established and accredited at UWO have the ability to deliver all elements of the program locally (unless Inter-University Agreement in place)

- resident match to UWO suggests that London and SWOMEN area is where all of postgraduate training will occur

- elective periods are permissible provided elective meets accreditation standards set by application College (Royal College of Physicians and Surgeons of Canada or College of Family Physicians of Canada)

- a three month elective rotation away from London/SWOMEN area is permissible and managed at the program level

- requests for elective periods of greater than three months must be made in writing by the resident to the program director. If acceptable to program director, a written request must be made to the PGE Dean, minimum of three months prior to the planned elective. Approval of PGE Dean must be granted prior to program approval of elective

* All mandatory components of training are expected to be met in London/SWOMEN area. Any mandatory rotations at locations without an Inter-University Agreement must be approved by the PGE Dean.
