Family Medicine

Program Director: Dr. Darren Van Dam, djvdmd@gmail.com
Clerkship and Electives Coordinators: Dr. Jessica Howard, dr.jessica.howard@gmail.com, Dr. Shiraz Malik, shiraz.malik@lhsc.on.ca
Program Coordinator: Michele Vanderspank, Michele.vanderspank@schulich.uwo.ca, 519-661-2111 ext. 86683
Office Location: The Western Centre for Public Health and Family Medicine, 1st floor, Western

Family Medicine Elective Website:

Electives in Family Medicine can be two - four weeks long, and take place in London or one of the surrounding communities.

The request period opens on March 1st each year for the fall time period. Electives are booked on a first come, first served basis.

Electives can be arranged for London or surrounding rural sites. Travel and accommodation expenses will be reimbursed for travel outside of London (see the expenses page for more information). Our Department is independent from electives through the Distributed Education program.

After you review the Community Sites (https://www.schulich.uwo.ca/familymedicine/undergraduate/community_sites.html) available, please complete the online request form indicating what your top three choices are (dates, location, preceptor). Your request will be sent to the physician, and once confirmed, the Program Coordinator will contact you by email.

Available Electives: Please see below for a list of available clinical electives in Family Medicine. Link to our community site page: http://www.schulich.uwo.ca/familymedicine/undergraduate/community_sites.html. Students can arrange their own electives with other family physicians not listed below, but are required to send the Program Coordinator the preceptor name, location and electives dates.

- **Academic Teaching Centres** (Byron Family Medical Centre, St. Josephs Family Medical Centre, Victoria Family Medical Centre, Southwest Middlesex Health Centre - Mt. Brydges, Ilderton Medical Clinic - Ilderton)
- **London Community**
- **Rural Communities**

Learning Objectives: The central goal of the Family Medicine clerkship is to help you to enhance your skills in applying the Patient-Centred Clinical Method to understand the patient’s personal experience of their illness and find common ground regarding management decisions. This includes:

- Becoming effective in interviewing patients
- Conducting a skilled and sensitive physical assessment
- Enhancing your clinical reasoning skills
• Finding and using the best evidence available
• Applying the principles of prevention whenever possible
• Understanding each patient in the context of the “big picture” – the patient as a person, their family and community and their ecosystem
• Demonstrating professional behaviour when interacting with patients, colleagues and staff.

OBJECTIVES:
1) Present a pertinent history and conduct a relevant physical exam, under supervision, on an adult or elderly patients presenting with the following complaints:
   i. new or chronic cough
   ii. fatigue
   iii. low back pain
   iv. fever
   v. shortness of breath
   vi. abdominal or pelvic pain
   vii. headache
   viii. dizziness
   ix. chest pain
   x. lower leg swelling

2) Present a relevant and focused differential diagnosis to your supervisor, on an adult or elderly patient presenting with the following complaints:
   i. new or chronic cough
   ii. fatigue
   iii. low back pain
   iv. fever
   v. shortness of breath
   vi. abdominal or pelvic pain
   vii. headache
   viii. dizziness
   ix. chest pain
   x. lower leg swelling

3) Describe (to your supervisor and/or the patient) an approach to the management of the following presenting complaints in an adult or elderly patient:
   i. new or chronic cough
   ii. fatigue
   iii. low back pain
   iv. fever
   v. shortness of breath
   vi. abdominal or pelvic pain
   vii. headache
   viii. dizziness
   ix. chest pain
   x. lower leg swelling

4) The student will conduct (under supervision) a relevant history and physical exam for an adult or elderly patient with established diabetes presenting to the out-patient family medicine clinic for a diabetic check-up.
5) The student will manage (under supervision) an adult or elderly patient with established diabetes presenting to the out-patient family medicine clinic for a diabetic check-up. The student should also list the pertinent screening procedures done for a patient with diabetes.

6) The student will manage (under supervision) an adult or elderly patient presenting to the out-patient family medicine clinic with either established hypertension or established dyslipidemia. The management should include a discussion with the patient and/or supervisor of the appropriate medications, their common side effects and alternative treatments.

7) The student will participate in the care of an elderly patient, either in a long-term care facility, the acute care setting (i.e., the emergency department) or the out-patient family medicine clinic under the direction of their supervisor.

8) The student will demonstrate a prenatal exam (under supervision) on a female adult patient (as measured by completion of appropriate procedures and examination as directed by the antenatal flow sheets).

9) Given an infant, child or adult presenting to the out-patient family medicine clinic, the student will administer an intramuscular or subcutaneous immunization under supervision.

10) Given an infant presenting to the out-patient family medicine clinic, the student will demonstrate a well-baby exam under supervision.

11) Given an adult female patient presenting to the family medicine out-patient clinic, the student will perform a pap smear where appropriate.

12) Given an adult between the ages of 50-70 presenting to the out-patient family medicine clinic, the student will demonstrate a periodic health exam under supervision and will list to the supervisor relevant screening procedures appropriate for the patient in question.

13) Given a patient of any age presenting to the out-patient family medicine clinic or acute care setting (i.e., the emergency department), the student will demonstrate skill in finding common ground when differences of opinion exist.

14) Conduct patient-centered interviews that explore the patient's feelings, ideas, impact on function, and expectations.
