## ENDOMETRIAL NEOPLASIA

---

---

A 61 years old woman presents with post menopausal bleeding.

- What is your differential diagnosis?
- What history will you elicit?
- What physical examination will you perform?
- What investigations will you order?
- What treatment options would be available based on the diagnosis?

## PELVIC MASS

---

---

A 41 years old woman comes to you after an ultrasound shows a 5 cm ovarian cyst

- What is your differential diagnosis?
- What history and physical examination will you obtain?
- What additional information do you want about the ultrasound?
- What investigations would you order?
- What treatment options will you discuss?

## OVARIAN CANCER

---

---

A 70 years old woman complains of early satiety and abdominal distension

- What is your differential diagnosis?
- What pertinent history will you elicit?
- What focused physical examination will you perform?
- What investigation will you order?
- What treatment options are recommended?
