"Color Me Infected: Reprogramming of the Infected Cell by a Tumor Virus Oncoprotein"

Presenter:

Joe S. Mymryk, Ph.D.

Professor, Departments of Microbiology & Immunology, Oncology and Otolaryngology, Western University
Distinguished Oncology Scientist, London Regional Cancer Program
Scientist, Lawson Health Research Institute

Hosted by: Experimental Oncology

Objectives:

- Discuss the contribution of viral infection to the burden of human cancer
- Provide an overview of the utility of studying viral oncogenes as a means to investigate cellular regulatory pathways
- Discuss the role of the DYRK1A/B kinases in viral transformation.
