Medical Biophysics Gives Back

Spearheaded by the Medical Biophysics Graduate Student Association, the Department Faculty and Staff were invited to donate a new toy, or pair of new socks to share with those less fortunate during the holidays.

Why Donate A Pair Of NEW Socks?
They keep feet warm & dry
They are the #1 requested item at shelters, but least donated
Over 20% of homeless medical issues are related to foot care
They are inexpensive to gift/donate

This year we collected a total of forty-four pairs of socks, seven toys, and even some cash donations.

Thank you, to all of those who participated in our Holiday, Medical Biophysics Gives Back” Campaign
