Medical Biophysics 3518B – Introduction to Molecular Imaging
For W2021, the term runs from Mon Jan 11-Mon Apr 12

Although this academic year might be different, Western University is committed to a thriving campus. We encourage you to check out the Digital Student Experience website to manage your academics and well-being. Additionally, the following link provides available resources to support students on and off campus: https://www.uwo.ca/health/.

1. Course Information
An introduction to the discipline of Molecular Imaging. Research areas include genetic engineering of imaging contrast, molecular probes for positron emission tomography, cell tracking using magnetic resonance imaging and optical molecular imaging of tissue dynamics. Students will apply knowledge gained through the lectures by reading and critical analysis of original research articles in the field of Molecular Imaging, and student-led discussion.
Antirequisite(s): Medical Biophysics 4518B
Prerequisite(s): Biology 1001A and Biology 1002B, or the former Biology 1222 or 1223; Chemistry 1301A/B and 1302A/B or the former 1100A/B and 1200B, or the former Chemistry 1050; Calculus 1000A/B or 1500A/B or the former 1100A/B; Calculus 1301A/B or 1501A/B; Physics 1028A/B or 1301A/B or 1501A/B; Physics 1029A/B or 1302A/B or 1502A/B; Biochem 2280A, Biol 2581B
Pre-or Corequisite(s):
Extra Information: 3 lecture hours per week (Mon, Wed, Fri), 0.5 course.

This course is open to third-year students. Senior students interested in taking Biophysics 3518B as an elective may do so with permission of the course coordinator.

The objective of the course is to help students to apply and develop the knowledge gained in first year physics courses and second year biochemistry and biology to concepts in molecular imaging. Topics explored in this course will be supported by other third year courses (3505F, 3645A), and will provide the necessary background for 4518B.

Technical aids:

- Stable internet connection (for live discussion periods)
- Laptop or computer (required)
- Working microphone (suggested)
- Working webcam (suggested)

Senate regulation regarding the student’s responsibility regarding requisites:

Unless you have either the requisites for this course or written special permission from your Dean to enroll in it, you may be removed from this course and it will be deleted from your record. This decision may not be appealed. You will receive no adjustment to your fees in the event that you are dropped from a course for failing to have the necessary prerequisites.

3. Course Syllabus

General information

from http://www.uwo.ca/univsec/handbook/

“Unless you have either the requisites for this course or written special permission from your Dean to enroll in it, you may be removed from this course and it will be deleted from your record. This decision may not be appealed. You will receive no adjustment to your fees in the event that you are dropped from a course for failing to have the necessary prerequisites.”
“Scholastic offences are taken seriously and students are directed to read the appropriate policy, specifically, the definition of what constitutes a Scholastic Offence, at the following Web site: http://www.uwo.ca/univsec/handbook/appeals/scholoff.pdf.”

Course structure

The course consists of 25 lectures, 4 problem assignments and one in-class discussion. It will cover four topics within the discipline of molecular imaging: genetic engineering of imaging reporter genes, PET molecular imaging, cellular and molecular MRI, and optical molecular imaging.

**Topic 1: Genetic Engineering of Imaging Contrast**

Instructor: Dr. Donna Goldhawk
Lecture Dates: 8 lectures Jan 11-27

a. Jan 11: Introduction to molecular imaging  
   c. Jan 15: Using molecular cloning to image gene expression *in vivo*  
   d. Jan 18: Transcription factor/DNA interactions that regulate molecular imaging  
   e. Jan 20: Imaging reporter gene expression  
   f. Jan 22: Factors influencing detection of transcription factor activity  
   g. Jan 25: Measuring changes in gene expression using non-invasive modalities  
   h. Jan 27: Review lecture  
   i. Jan 29: Assignment #1 Due

**Topic 2: Detecting Cellular and Molecular Processes with MRI**

Instructors: Drs. Paula Foster and John Ronald
Lecture Dates: 7 lectures Feb 1-Feb 22

a. Feb 1: History of Biomedical Imaging (Foster)  
   b. Feb 3: Basic principles: The MRI Signal (Foster)  
   c. Feb 5: Basic principles: Contrast and Contrast Agents (Foster)  
   d. Feb 8: Cell Tracking with MRI (Foster)  
   e. Feb 10: Cell Tracking with MRI (Foster)  
   f. Feb 12: Discussion (Foster)  
   g. Feb 22: MRI Reporter Genes (Ronald)  
   h. Feb 24: Assignment #2 Due

Feb 15-19 Reading Week

**Topic 3: Molecular Imaging with Positron Emission Tomography**

Instructor: Dr. Savita Dhanvantari
Lecture Dates: 7 lectures Feb 26- Mar 12

a. Feb 26: Principles of radioactivity  
   b. Mar 1: Basic principles of positron emission tomography (PET) (part 1)
c. Mar 3: The steps in PET image formation and analysis (part 2)
d. Mar 5: PET imaging of metabolism
e. Mar 8: Targeted PET molecular imaging using designer probes
f. Mar 10: PET reporter genes
g. Mar 12: Review and discussion
h. Mar 15: Assignment #3 Due

**Topic 4: Optical Molecular Imaging of Tissue**
Instructor: Dr. Mamadou Diop
Lecture Dates: 8 lectures Mar 17-31
a. Mar 17: Light and tissue interaction
b. Mar 19: High resolution optical imaging: Optical Coherence Tomography
c. Mar 22: High resolution optical imaging: Optical Coherence Tomography
d. Mar 24: High resolution optical imaging: Confocal Microscopy
e. Mar 26: High resolution optical imaging: Confocal Microscopy
f. Mar 29: Super-resolution optical imaging: Optical nanoscopy
g. Mar 31: Review lecture
h. Apr 5: Assignment #4 Due

**Topic 5: Devising solutions to problems in molecular imaging**
Instructors: All
Lecture Dates: Apr 7, 9
a. Apr 7: Small group discussions on developing molecular imaging strategies to detect molecular and cellular functions in vivo.
b. Apr 9: Each group presents their ideas to the class as a 3 min “elevator pitch”.

4. **Course Materials**

**Course website**

**Textbook**
none

**Laboratory Tours**
none

**Contact with Instructors regarding course materials**
We encourage students to approach and discuss any course-related problems with the relevant instructor. Please make an appointment (via OWL message) utilizing the contact information provided above.
Collaborative work

Students are encouraged to work together, but each student must take total responsibility for their submitted work. **Note on Plagiarism**: “Students must write their essays and assignments in their own words. Whenever students take an idea, or a passage from another author, they must acknowledge their debt both by using quotation marks where appropriate and by proper referencing such as footnotes or citations. Plagiarism is a major academic offence” (see Scholastic Offence Policy in the Western Academic Calendar).

5. Evaluation

The final grade will be based on a 23.75% contribution from Modules 1-4, and 5% from Module 5 (see “Course Syllabus” section above). The mark will be obtained from problem assignments, and a final set of group problem-solving exercises.

**Final grade breakdown**

Assignments: 23.75% X 4 = 95%
Module 5: 5%

Assignments will be in written format, in short-answer style. Module 5 will be evaluated based on group participation and presentation.

**Information about late or missed evaluations:**

- Late assessments without self-reported absences will be subject to a late penalty of 5%/day
- Late assessments with self-reported absences should be submitted within 24 hours of the end of the 48-hour period
- An assessment cannot be submitted after it has been returned to the class; the weight will be transferred to the final grade
- If a make-up assessment is missed, the student will receive an INC and complete the task the next time the course is offered

**Assignment Schedule**

<table>
<thead>
<tr>

<td>Mar 15</td>
</tr>
<tr>
<td>Assignment 4</td>
<td>Topic 4</td>
<td>Mar 12</td>
<td>Apr 5</td>
</tr>
</tbody>
</table>

**Communication:**
Students should check the OWL site every 24 – 48 hours
A weekly update will be provided on the OWL announcements
Students should email their instructors using OWL “messages”
Emails will be monitored daily; students will receive a response in 24 – 48 hours
This course will use Zoom for live discussions
Students should post all course-related content on the discussion forum so that everyone can access answers to questions
The discussion forums will be monitored daily by instructors or teaching assistants

Office Hours:
Students will be able to email the instructors using OWL “messages”

Resources
All resources will be posted in OWL

Professionalism & Privacy:
Western students are expected to follow the Student Code of Conduct. Additionally, the following expectations and professional conduct apply to this course:

- Students are expected to follow online etiquette expectations provided on OWL
- All course materials created by the instructor(s) are copyrighted and cannot be sold/shared
- Recordings are not permitted (audio or video) without explicit permission
- Permitted recordings are not to be distributed
- All recorded sessions will remain within the course site or unlisted if streamed

How to Be Successful in this Class:
Students enrolled in this class should understand the level of autonomy and self-discipline required to be successful.

1. Invest in a planner or app to keep track of your courses. Populate all your deadlines at the start of the term and schedule time at the start of each week to get organized and manage your time.
2. Make it a daily habit to log onto OWL to ensure you have seen everything posted to help you succeed in this class.
3. Follow weekly checklists created on OWL or create your own to help you stay on track.
4. Take notes as you go through the lesson material. Treat this course as you would a face-to-face course. Keeping handwritten notes or even notes on a regular Word document will help you learn more effectively than just reading or watching the videos.
5. Connect with others. Try forming an online study group and try meeting on a weekly basis for study and peer support.
6. Do not be afraid to ask questions. If you are struggling with a topic, contact your instructors.
7. Reward yourself for successes. It seems easier to motivate ourselves knowing that there is something waiting for us at the end of the task.

Western Academic Policies and Statements

Absence from Course Commitments

Policy on Academic Consideration for Student Absences

If you are unable to meet a course requirement due to illness or other serious circumstances, you must seek approval for the absence as soon as possible. Approval can be granted either through a self-reported absence or via the Academic Counselling unit. Students have two self-reports to use throughout the academic year; absence from course commitments including tests, quizzes, presentations, labs, and assignments that are worth 30% or less can be self-reported. Self-reported absences cover a student for 48 hours (yesterday + today or today + tomorrow). Your instructor will receive notification of your consideration; however, you should contact your instructor immediately regarding your absence. Students are expected to submit missed work within 24 hours of the end of the 48-hour period. Please review details of the university's policy on academic consideration for student absences.

If you have used both their self-reported absences or will miss more than 48 hours of course requirements, a Student Medical Certificate (SMC) should be signed by a licensed medical or mental health practitioner and you should contact academic counselling. Academic Counselling will be operating virtually this year and can be contacted at scibmsac@uwo.ca.

Accommodation for Religious Holidays

The policy on Accommodation for Religious Holidays can be viewed here.

Special Examinations

A Special Examination is any examination other than the regular examination, and it may be offered only with the permission of the Dean of the Faculty in which the student is registered, in consultation with the instructor and Department Chair. Permission to write a Special Examination may be given on the basis of compassionate or medical grounds with appropriate supporting documents. To provide an opportunity for students to recover from the circumstances resulting in a Special Examination, the University has implemented Special Examinations dates. These dates as well as other important information about examinations and academic standing can be found here.

Academic Offenses

“Scholastic offences are taken seriously, and students are directed here to read the appropriate policy, specifically, the definition of what constitutes a Scholastic Offence.
Accessibility Statement

Please contact the course instructor if you require material in an alternate format or if you require any other arrangements to make this course more accessible to you. You may also wish to contact Accessible Education (AE) at 661-2111 x 82147 for any specific question regarding an accommodation or review The policy on Accommodation for Students with Disabilities.

Correspondence Statement

The centrally administered e-mail account provided to students will be considered the individual’s official university e-mail address. It is the responsibility of the account holder to ensure that e-mail received from the University at his/her official university address is attended to in a timely manner. You can read about the privacy and security of the UWO email accounts here.

Turnitin and other similarity review software

All assignments will be subject to submission for textual similarity review to the commercial plagiarism detection software under license to the University for the detection of plagiarism. Students will be able to view their results before the final submission. All papers submitted for such checking will be included as source documents in the reference database for the purpose of detecting plagiarism of papers subsequently submitted to the system. Use of the service is subject to the licensing agreement, currently between Western University and Turnitin.com.

1. BMSUE Academic Policies and Statements

Copyright and Audio/Video Recording Statement

Course material produced by faculty is copyrighted and to reproduce this material for any purposes other than your own educational use contravenes Canadian Copyright Laws. You must always ask permission to record another individual and you should never share or distribute recordings.

Rounding of Marks Statement

Across the Basic Medical Sciences Undergraduate Education programs, we strive to maintain high standards that reflect the effort that both students and faculty put into the teaching and learning experience during this course. All students will be treated equally and evaluated based only on their actual achievement. Final grades on this course, irrespective of the number of decimal places used in marking individual assignments and tests, will be calculated to one decimal place and rounded to the nearest integer, e.g., 74.4 becomes 74, and 74.5 becomes 75. Marks WILL NOT be bumped to the next grade or GPA, e.g. a 79 will NOT be bumped up to an 80, an 84 WILL NOT be bumped up to an 85, etc. The mark attained is the mark you achieved, and the mark assigned; requests for mark “bumping” will be denied.
