

McGill

International Clinical Dissection Program

Summer 2016

Improve your gross anatomy and dissections skills

- McGill University's Clinical Dissection Summer Program, offered through the Department of Anatomy & Cell Biology, is one of the only programs of its kind in Canada
- Our course caters to health care practitioners or students who wish to deepen their knowledge and understanding of anatomy, as well as demonstrate a higher competency in dissection skills
- Weekly modules focus on regional subspecialties: Head & Neck, Trunk, Limbs & Back
- 5 hours of dissection/day, 2 participants/cadaver
