Each Honours Specialization module has a maximum capacity in both Years 3 and 4, as determined by each department and indicated in the chart below, and an average of at least 75% on a particular group of courses is required for admission to each Honours Specialization module. If the number of students applying for a module is greater than the maximum capacity of the module, then the module will be filled with students having an average greater than 75%. The average of the last student admitted to the module for a given year is displayed below - information about admission to Year 3 is in the left-hand columns and information about Year 4 is in the right-hand columns.

**NOTE:** Students in Medical Sciences 2 who satisfy the conditions for assured admission to Year 3 BMSc receive priority placement in the Honours Specialization modules in Year 3. Students from the "competitive pool" are then considered for admission to the remaining spaces in the modules. Some Honours Specialization modules may fill in Year 3 before the ITR choices of the students applying from the competitive pool are considered.

### AVERAGES REQUIRED FOR ADMISSION TO HONORS SPECIALIZATION MODULES IN THE BMSc PROGRAM

Each Honors Specialization module in Years 3 and 4, is considered for admission to the Honors Specialization modules in Year 3, all students in Year 3 BMSc are considered equally for admission to the Honors Specialization modules in Year 4, provided the appropriate courses (i.e., those listed in the Weighted Average Chart) have been completed by the end of Year 3 BMSc.

**NOTE:** although students in Medical Sciences 2 who satisfy the conditions for assured admission to Year 3 BMSc are given priority placement in the Honors Specialization modules in Year 3, all students in Year 3 BMSc are considered equally for admission to the Honors Specialization modules in Year 4, provided the appropriate courses (i.e., those listed in the Weighted Average Chart) have been completed by the end of Year 3 BMSc.

For full details about admission to Year 3 BMSc and the Honours Specialization modules:

> See (i) MODULES OFFERED IN THE BMSc PROGRAM

For full details about admission to the Honours Specialization modules in Year 4 BMSc:

> See MODULES OFFERED IN THE BMSc PROGRAM

* The capacity represents the number of students admitted to this group of modules. For example, all students who apply to the Honors Specialization modules in Pharmacology, Physiology, and Physiology and Pharmacology for Year 3 are pooled together and the top 80 students are admitted regardless of which of the three Honors Specialization modules they requested.

** Some Year 4 research project supervisors are crosslisted in these departments so there may be some variation in the actual number of students accepted to each of the Honors Specialization modules in this group of modules. The total number of students admitted to this group of modules will not change.

FULL+: the module filled with students in Medical Sciences 2 who satisfied the conditions for assured admission.
