COURSE CONSTRAINTS FOR BIOSTATISTICS & EPIDEMIOLOGY COURSES

here are three enrollment periods for Fall/Winter Courses:

Priority Enrollment Period (July 7 - July 29): most basic medical science courses have priorities in place during this period.

Adjustment Enrollment Period (July 30 - August 5): some basic medical science courses have priorities in place during this period. These courses also have priorities in place during the Priority Enrollment Period.

General Enrollment Period (July 30 - August 5): some basic medical science courses have priorities in place during this period.

These courses also have priorities in place during the Priority Enrollment Period.

General Enrollment Period (July 30 - August 5): some basic medical science courses have priorities in place during this period.

These courses also have priorities in place during the Priority Enrollment Period.

These courses also have priorities in place during the Priority Enrollment Period.

These courses also have priorities in place during the Priority Enrollment Period.

These courses also have priorities in place during the Priority Enrollment Period.

These courses also have priorities in place during the Priority Enrollment Period.

These courses also have priorities in place during the Priority Enrollment Period.

These courses also have priorities in place during the Priority Enrollment Period.

These courses also have priorities in place during the Priority Enrollment Period.

These courses also have priorities in place during the Priority Enrollment Period.

These courses also have priorities in place during the Priority Enrollment Period.

The Priority Enrollment

ourses with a restriction in place (R in chart) are always restricted to the students registered in the modules indicated. Special permission will not be granted for other students to take these courses.

rronty Enrollment Period (July 7 - July 29): inly students registered in the modules indicated by PEP, PEP-SR, PEP-SL, and PEP-SL* will be able to register in the course, subject to spaces being available.

EP students in all modules with PEP indicated have the same priority access until end of day of the last day of the priority enrollment period.

PEP-SIR spaces have been reserved for students in this module until end of day of the last day of the priority enrollment period.

PEP-SIR spaces have been reserved for students in this module until end of day of the priority enrollment period.

PEP-SIR spaces have been reserved for students or this module until end of day or have a priority of the priority enrollment period.

PEP-SIR spaces have been reserved for students in this module until end of day or have a priority of the priority enrollment period.

PEP-SIR spaces have been reserved for students in this module until end of day or have a priority enrollment period. EP-SLs a limited number of spaces have overn ancouncy we suscend an account of trill.

EP-SL* - similar to PEP-SL but students must also be registered in Honours Degrees with Double Majors to access this block of reserved spaces.

If students in a module that indicates PEP are unable to register in a course during the Priority Enrollment Period because it fills completely, then they can put themselves on the walt isst. The Office of the Registrar will run processes daily to enroll students from the wait st should spots become available during the Priority Enrollment Period (in the waltised section of the course, if there are multiple sections), and students satisfy the conditions for enrollment from the waltist.

If students in a module included by PEPS—Lar enuable to register in a course during the Priority Enrollment Period decause the initivities opposited to them thave been filled, then they can put themselves on the walt list. The Office of the Registrar will run processes that the control in the students from the walt list should spots open up in the block of limited spaces allocated to them thave been filled, then they can put themselves on the walt list. The Office of the Registrar will run processes that the processes the register in a course processes the register in

from the walker
Adjustment Enrollment Period (July 30 - August 5):
The reserved spaces in basic medical science courses that were in place during the Priority Enrollment Period will no longer be in place. Priorities in some courses will be lifted entirely, but some courses will have priorities in place during the Adjustment Enrollment Period.

First Day of the AEP: students cannot access online enrollment on the first day of the AEP. Subject to spaces available in the course (and in the specific section of the waitlisted course, if there are multiple sections), students on waitlists will be enrolled in courses (and in the relationship) and the waitlisted section, only, if multiple sections exist in the course) in order of their wait list position if either no priorities are in place or they have priority access for the Adjustment Enrollment Period (AEP in the constraint charts), and they satisfy the conditions for enrollment from the wait list.

Second day of the AEP: By start of business day on the second day of the AEP, any student with the prerequisite will be able to register in basic medical science courses for which a priority was in place only for the Priority Enrollment Period, subject to spaces being

dents registered in the modules indicated in the constraint charts by AEP will be able to register themselves from start of business day on the second day of the AEP through the end of the perioreral Enrollment Period (August 6 – September 12):

tudents cannot access online enrolment on the first day of the GEP. Subject to spaces available in the course (and in the specific section of the waitlisted course, if multiple sections exist), students on waitlists will be enrolled in courses (and in their waitlisted section, nly, if multiple sections exist in the course) in order of their wait ist position if they satisfy the conditions for enrollment from the wait list.

To use this chart:

Theck the row immediately below the headings for the courses to find out the enrollment period(s) during which priorities are in place. Courses with PEP, PEP-SR and/or PEP-SL have priorities in place during the Priority Enrollment Period - see information above for the row immediately below the headings for the courses to find out the enrollment period - see information above for the row immediately below the heading of these acrosymms, the disca associated with the enrollment period. If courses with the period, If courses also have AEP in this row, then priorities are in place for both the Priority Enrollment Period and the period - see information above for the period - see information above for the discardance in the period of the period of the period - see information above for the period of t

Valit Lists for courses (a course and a class are the same thing).

Rudents will have the option to place themselves on a walt list for a class/course during all three enrollment periods if the course is either full or they do not have priority access (indicated by an error message during an attempt to register that begins with "available paces are reserved.". Once you but yourself on a walk list, you stay on the wait list unless you "drop" yourself from the wait list.

ee Wait List a Class for details about how to join a wait list, how to enrol/drop from a wait list, things to consider before joining a wait list, and FAQs.
