## COURSE CONSTRAINTS FOR MICROBIOLOGY AND IMMUNOLOGY COURSES

There are three enrollment periods for Fall/Winter Courses:

1. **Priority Enrollment Period (July 6 - July 28):**
   - Students registered in the module indicated by PEP, PEP-SL, or PEP-SR, will be able to register for courses in this module until end of day on July 28.
   - There are no spaces reserved for students in particular modules during the Adjustment Enrollment Period.

2. **Adjustment Enrollment Period (July 29 – August 5):**
   - If students in a module that indicates PEP-SR on their registration slide during the Adjustment Enrollment Period because 6 fail completely, then they can put themselves on a wait list. The Office of the Registrar will send a notification daily of available spaces to students on the wait list and they can put themselves on a wait list. The Office of the Registrar will run a process daily and students whose names are on the wait list will be able to register for courses in their module. If the limited number of spaces allocated above becomes filled, then additional students in this module cannot register even if the course is not full.

3. **General Enrollment Period (August 6 - September 17):**
   - Any student with the prerequisite will be able to register in basic medical science courses for which a priority was in place only for the Priority Enrollment Period, subject to space being available.
   - Any student with the prerequisite will be able to register in basic medical science courses for which a priority was in place for both the Priority Enrollment Period and the Adjustment Enrollment Period.

### General Enrollment Period (August 6 – September 17):

- Prior to the start of business day on August 5, all students will be able to register in basic medical science courses, with the exceptions of courses which have restricted access, provided they have the prerequisite and space is available in the course.

- To use this chart:
  - The course has a restriction in place for students to register (indicated by a blank cell in the chart). Students must register at the time of the class registration to be eligible to register for the course.
  - Students will have the option to place themselves on a wait list for a class/course during all three enrollment periods. If the course is either full or they do not have priority access (indicated by an error message during an attempt to register that requests students to " consult the chart of reserved spaces..."), then they must put themselves on a wait list. The Office of the Registrar will enroll students from existing wait lists, subject to spaces available in the course and conditions for enrollment from a wait list.

- See the chart of Reserved Spaces in 4000-level basic medical courses at:
  - For more details about how to join a wait list, how to enroll in a wait list, things to consider before joining a wait list, and FAQs, see the chart of Reserved Spaces in 4000-level basic medical courses at:

### Wait Lists for Courses

- Students will have the option to place themselves on a wait list for a class/course during all three enrollment periods. If the course is either full or they do not have priority access (indicated by an error message during an attempt to register that requests students to " consult the chart of reserved spaces..."), then they must put themselves on a wait list. The Office of the Registrar will enroll students from existing wait lists, subject to spaces available in the course and conditions for enrollment from a wait list.

- For more details about how to join a wait list, how to enroll in a wait list, things to consider before joining a wait list, and FAQs, see the chart of Reserved Spaces in 4000-level basic medical courses at:
