COURSE CONSTRAINTS FOR MICROBIOLOGY AND IMMUNOLOGY COURSES

There are three enrolment periods for Fall/Winter Courses:

1. Priority Enrollment Period (July 5 – July 27): Some basic medical science courses have priorities in place during this period. These courses also have priorities during the General Enrollment Period.
2. Adjustment Enrollment Period (July 28 – August 4): Some basic medical science courses have priorities in place during this period.
3. General Enrollment Period (August 5 – September 16): Some basic medical science courses have priorities in place during this period.

Priority Enrollment Period (July 5 – July 27):
Students are pre-enrolled in the modules indicated as PEP-SL, PEP-SR, PEP-G, and must be registered in these modules until the end of day on July 27. If the number of spaces in a course is limited, students who enrol in that course until the end of day on July 27 will be able to register in that course, subject to spaces being available. Students who enrol in a course after the end of day on July 27 will not be able to register in that course, subject to spaces being available.

Students must be registered in the modules indicated as PEP-SL, PEP-SR, PEP-G, to be able to register in the courses indicated in these modules.

Adjustment Enrollment Period (July 28 – August 4):
Some basic medical science courses have priorities in place during this period. These courses also have priorities during the Priority Enrollment Period.

General Enrollment Period (August 5 – September 16):
Some basic medical science courses have priorities in place during this period. These courses also have priorities during the Priority Enrollment Period.

Students will have the option to place themselves on a wait list for a class/course during all three enrollment periods if the course is either full or they do not have priority access (indicated by an error message during an attempt to register). Special permission will not be granted for other students to take these courses.

By start of business day on July 28, any student with the pre-enrollment will be able to register in basic medical science courses for which a priority was in place only for the Priority Enrollment Period, subject to spaces being available.

By start of business day on August 5, any student with the pre-enrollment will be able to register in basic medical science courses for which a priority was in place for both the Priority Enrollment Period and the Adjustment Enrollment Period.

By start of business day on August 16, any student will be able to register in any basic medical science course, with the exceptions of courses which have restricted access, provided they have the pre-enrollment and space is available in the course.

To use this chart:

Each module in which you are registered in the current term(s) is indicated in the cell with an asterisk (*) symbol.

The chart is divided into three sections:

- Microbiology and Immunology Courses
- Immunology and Immunopathology Courses
- Microbiology and Immunopathology Courses

Each section contains a list of courses with their respective prerequisites, credits, and description.

Students will have the option to place themselves on a wait list for a class/course during all three enrollment periods if the course is either full or they do not have priority access (indicated by an error message during an attempt to register). Special permission will not be granted for other students to take these courses.

See the chart of Reserved Spaces in the Fall/Winter basic medical courses on [link to course chart].
