There are three enrollment periods for Fall/Winter Courses:

1. **Priority Enrollment Period (July 4 – July 16):** Most basic medical science courses have priorities in place during this period. These courses also have priorities in place during the Priority Enrollment Period.
2. **Adjustment Enrollment Period (July 27 – August 2):** Courses with a restriction in place in the cell are only available to students registered in modules indicated in the constraint charts during this period. If spaces are still available in the course, then students registered in modules indicated in the constraint charts during this period will be able to register from start of business day on August 3 to end of day on August 2.
3. **General Enrollment Period (August 4 – September 16):** Students will be able to register in any basic medical science course, with the exception of courses which have restricted access, provided they have the prerequisite and space is available in the course.

**To use this chart:**

- Students are automatically placed on a wait list for courses to which they have been admitted. Students assigned to a wait list will be enrolled in order of their wait list position number as long as they satisfy the conditions for enrollment from a wait list.
- Students registered in modules indicated by **AEP** will have priority access during the Priority Enrollment Period.
- Students registered in modules indicated by **PEP** will be able to register in a course during the Adjustment Enrollment Period because the limited spaces allocated to these modules have been filled. These students will have priority access during the Adjustment Enrollment Period.
- Students registered in modules indicated by **PEP-SL** and **PEP-SR** have priority access during the Adjustment Enrollment Period.
- Only students registered in modules indicated by **R** will be able to register in a course during the Adjustment Enrollment Period.

**Wait List a Class:**

Students who are unable to register in a course during the Adjustment Enrollment Period because it fills completely, then they can put themselves on a wait list. The Office of the Registrar will run processes daily to enroll students from the wait list should spaces open up in the block of limited spaces allocated to them during the Priority Enrollment Period.

**Course Constraints for Pathology Courses**

Students will be able to register in any basic medical science course, with the exception of courses which have restricted access, provided they have the prerequisite and space is available in the course.
