

COURSE CONSTRAINTS FOR PHARMACOLOGY COURSES

There are three enrollment periods for Fall/Winter Courses:

- **Priority Enrollment Period (July 4 - July 26):** most basic medical science courses have priorities in place during this period.
- **Adjustment Enrollment Period (July 27 - August 2):** some basic medical science courses have priorities in place during this period. These courses also have priorities in place during the Priority Enrollment Period.
- **General Enrollment Period (August 3 - September 16):** no basic medical science courses have priorities in place during this period.

Courses with a restriction in place (R in chart) are always restricted to the students registered in the modules indicated. Special permission will not be granted for other students to take these courses.

Priority Enrollment Period (July 4 - July 26):

Only students registered in the modules indicated by PEP, PEP-SR, PEP-SL will be able to register in the course, subject to spaces being available.

PEP: students in this module have priority access until end of day on July 26. Note: PEP+ students must also be registered in Honours Degrees with Double Majors.

PEP-SR: spaces have been reserved for students in this module until end of day on July 26.

PEP-SL: a limited number of spaces have been allocated to students in the module until the end of day on July 26. If the limited number of spaces become filled, then additional students in this module cannot register even if the course is not full. Note: PEP-SL+ students must also be registered in Honours Degrees with Double Majors.

- If students in a module that indicates PEP are unable to register in a course during the Priority Enrollment Period because R fills completely, then they can put themselves on a wait list. The Office of the Registrar will run processes daily to enroll students from the wait list should spots become available during the Priority Enrollment Period.
- If students in a module that indicates PEP-SL are unable to register in a course during the Priority Enrollment Period because the limited spaces allocated to them have been filled, then they can put themselves on a wait list. The Office of the Registrar will run processes daily and enroll students from the wait list should spots open up in the block of limited spaces allocated to them during the Priority Enrollment Period.
- If students are registered in a module for which priority access is not given (blank in the constraint charts), then they can put themselves on a wait list. The priority enrollment condition will expire at the end of day on July 26 when the Priority Enrollment Period ends. On July 27, the Office of the Registrar will enroll students on the wait list in order of their wait list position number but only if spaces are available and students satisfy the conditions for enrollment from a wait list.

By start of business day on July 28, any student with the prerequisite will be able to register in basic medical science courses for which a priority was in place only for the Priority Enrollment Period, subject to spaces being available.

Adjustment Enrollment Period (July 27 - August 2):

There are no spaces reserved for students in particular modules during the Adjustment Enrollment Period

July 27: subject to spaces available in the course, the Office of the Registrar will enroll students who put themselves on a wait list during the Priority Enrollment Period and have priority access to the course for the Adjustment Enrollment Period (AEP in the constraint charts). Students will be enrolled in order of their wait list position number as long as they satisfy the conditions for enrollment from a wait list.

July 28 - August 2: if spaces are still available in the course, then students registered in the modules indicated in the constraint charts by AEP will be able to register from start of business day on July 28 to end of day on August 2.

August 3: students cannot enroll in a course on this day since the Office of the Registrar will enroll students from existing wait lists, subject to spaces available in the course and conditions for enrollment from a wait list.

By start of business day on August 4, any student with the prerequisite will be able to register in basic medical science courses for which a priority was in place for both the Priority Enrollment Period and the Adjustment Enrollment Period.

General Enrollment Period (August 4 - September 16):

By start of business day on August 4, students will be able to register in any basic medical science course, with the exception of courses which have restricted access, provided they have the prerequisite and space is available in the course.

To use this chart:

Check the row immediately below the headings for the courses to find out the enrollment period(s) during which priorities are in place. Courses with PEP, PEP-SR and/or PEP-SL have priorities in place during the Priority Enrollment Period - see information above for the Priority Enrollment Period for the meaning of these acronyms, the dates associated with this enrollment period, and using the wait list for a class during this period. If courses also have AEP in this row, then priorities are in place for both the Priority Enrollment Period and the Adjustment Enrollment Period - see information above for details and dates associated with the Adjustment Enrollment Period. Only students registered in modules indicated by R in the chart below can register for these restricted courses.

Locate the module in which you are registered for the upcoming Fall/Winter in the left-hand column and follow the row across until you find the cell that intersects with the course in which you wish to register. If there is nothing in the cell and there are priorities in place (indicated in the row below the course number), then you do not have priority for the course and will have to wait until the priority lifts. If you find PEP, PEP-SR, PEP-SL and/or AEP in the cell, then find these acronyms above in the Priority Enrollment Period and/or the Adjustment Enrollment period for details on the type or priority in place for students in your module.

Wait Lists for courses (a course and a class are the same thing).

Students will have the option to place themselves on a wait list for a class/course during all three enrollment periods if the course is either full or they do not have priority access (indicated by an error message during an attempt to register that begins with "available spaces are reserved..."). Once you put yourself on a wait list, you stay on the wait list unless you "drop" yourself from the wait list.

See [Wait List a Class](#) for details about how to join a wait list, how to enroll/drop from a wait list, things to consider before joining a wait list, and FAQs.

See the chart of Reserved Spaces in 4000-level basic medical courses at: https://www.ichulch.uwo.ca/bmc/academic_resources/courses/access_to_courses.html
