This email message is being sent to all students who submitted an ITR for Medical Sciences 2. A copy of this email messages is posted on the landing page for Medical Sciences 2. I would ask that you please read it carefully as it contains a lot of important information (and I will refer you back to it if you email me with a question that is answered below).

I will begin the adjudication process later this week for students who requested Medical Sciences 2 and have not been “automatically adjudicated” by the Office of the Registrar.

- Some students already have their adjudication decision because they passed all the markers for automatic adjudication (e.g., students with transfer credits from IB courses in high school do not get automatically adjudicated and are in my adjudication queue)

Please do not email me, the Academic Counselling Office of any departments about your adjudication decision. Be patient! Registration for second-year students doesn’t begin until July 19.

Adjudication decisions should be available for most Medical Sciences 2 students by June 18.

I would ask that you be patient as you wait for your results. Your adjudication decision will be posted in your Grade Report:
- Go to Student Center > My Academics > View My Grades
- Click on the “Grade Report” tab at the top and make sure that 2020 Fall/Winter shows up in Select Term (if not, then change the term)
- Look for Remarks under the listing of courses and marks – this is your adjudication decision

How to interpret your Remarks:

One of the comments below will indicate that you are eligible for Medical Sciences 2:
- Eligible for Medical Sciences 2
- Not eligible for Medical Sciences 2 (Western Scholars). Eligible for Medical Sciences 2 – you will be registered in Medical Sciences 2 but not with the Western Scholars designation

You will see the following Remark if you are not eligible for Medical Sciences 2:
- Not eligible to progress to Medical Sciences 2. This is usually accompanied by the following Remark - Degree and/or module(s)/program changed per Faculty decision. Review registration for coming year in Student Center > My Academics > My Program – and the Office of the Registrar will update your program as soon as possible.

Remarks about summer courses:
To register in Medical Sciences 2 next year, you must successfully complete (pass) any summer course in which you are registered and you may see one of the following remarks:
- Program is dependent on successful completion of summer course – you simply have to pass your summer course to remain registered in Medical Sciences 2. Dropping the course by the deadline will not impact your registration in Medical Sciences 2.
- Program is dependent on successful completion of summer course(s) with min mark of 65% or min avg of 70% - assigned for students who are in Western Scholars and Scholar’s Electives since all courses must be completed with marks of at least 65%, etc. Dropping the course by the deadline will not impact your registration in Medical Sciences 2.

What happens next:
Registration for Fall/Winter courses:
Western is planning on offering courses in-person during the Fall/Winter and the Fall/Winter timetable has been posted. There may be changes over the next month so make sure you check for updates.
The Office of the Registrar will post your Enrollment Date for Fall/Winter course registration in mid-July since second-year students don’t begin registration until July 19.
**Course Selection:**
Review the information about [Course Selection for Year 2](https://bmsc website) on the BMSc website.

**Zoom meeting/presentation about Medical Sciences 2 – course selection:** I’ve scheduled a Zoom meeting for July 12 from 2:30-3:30 to go over course selection for Medical Sciences 2. Details are on the webpage for [Course Selection for Year 2](https://bmsc website). This meeting will be recorded and posted on this webpage later in the day on July 12.

**What I’ll be working on this month:**

**Finishing up Adjudication:** it’s a lengthy process since it is all done manually for students who request BMSc, Neuroscience, and a good chunk of Medical Sciences 2.

**Constraints:** I’ll be updating the [constraint charts](https://bmsc website) after I’ve completed all my adjudication.

**Worksheets for Double Majors and Honours Specialization modules:** I’ll be updating these [worksheets](https://bmsc website) and re-posting before registration begins.

**Zoom meetings with me:**
I’ve opened up the [booking for Zoom meetings](https://bmsc website) with me in June/July. If you book a meeting with me, then either show up for the meeting or cancel it at least 24 hours in advance (so that someone else can book that spot).

**One last thing** – this is my busiest time of the year. I’m finishing up adjudication for over 2,000 students and preparing for registration. I will do my best to answer all email messages as quickly as I can. I need all of you to do your best to find the information that is relevant to you on the BMSc website and in the Academic Calendar. And practise your patience skills!

... Kathy
