DIVISION OF CARDIOLOGY- SUMMARY OF WEEKLY ROUNDS

Monday, April 10:

8:00-9:00  Aud B UH, B2-116 VH & B2-075 St. Joseph's
OTN Event #: 63453522
Cardiovascular Grand Rounds  Presenter: R. Welsh
Title of Presentation: Antithrombotic Therapy in Coronary Artery Disease
Learning Objectives:
1. Review the literature and understand the rationale and limitations of the different approaches to the management of AF, AF-PCI and acute coronary syndrome patients.
2. Become familiar with new published data in this setting of AF-PCI and ACS.
3. Understand the importance of these new data and discuss their impact on current clinical practice.

12:00-1:00  B6-115 UH
OTN Event #: 64118609
Adult Congenital Cardiac Surgery Rounds  Videoconference from Toronto
Case-based presentation and discussion

Tuesday, April 11:

7:00-8:00  B6-115 UH
OTN Event #: 63494152
Complex Revascularization Rounds  Presenters: CV Surgeons & Interventionalists
Faculty Supervisors: D. Nagpal/P. Garg
Case-based presentation and discussion
Learning Objectives:
1. To develop a systematic approach to interpretation of coronary angiograms.
2. To discuss interesting case examples and their management.
3. To apply an evidence-based approach to complex revascularization cases in order to improve outcomes.

2:00-5:00  B6-128 UH
ACADEMIC HALF DAY/DIDACTIC EDUCATION SESSIONS:

2:00-3:00  The heart as a cause of stroke  Presenter: A. Huitema  Faculty Supervisor: L. Chow
Learning Objectives:
1. Discuss cardioembolic stroke.
2. Review atrial fibrillation as a cause of stroke.
3. Review other common causes of cardioembolic stroke.

3:00-4:00  Exercise physiology (BSS)  Presenter: A. Sachedina  Faculty Supervisor: J. Brown
Learning Objectives:
1. Review the changes in the cardiac system in response to exercise.
2. Review the changes in the peripheral circulatory system in response to exercise.
3. Review the changes in the cardiovascular system in response to endurance training.

4:00-5:00  ACHD: Ebstein’s malformation, including ECHO features  Presenter: B. Al-Sabeq
Faculty Supervisor: B. Dias
Learning Objectives:
1. Review the clinical manifestations of Ebstein’s anomaly.
2. Review the echocardiographic features of Ebstein’s anomaly.
3. Review the management of Ebstein’s anomaly.

6:00  Heart Failure Journal Club  Attendance open to members of the Heart Failure Service and Cardiology Residents. RSVP to Cathy Ward-Rollinson (Ext. 33428 or email cathy.wardrollinson@lhsc.on.ca)
Topic: Transitional Care in Heart Failure
Faculty Supervisor: S. De
Papers for Presentation:
1. K. Ballut: Improved Outcomes With Early Collaborative Care of Ambulatory Heart Failure Patients Discharged From the Emergency Department  D.S. Lee, MD, PhD, et al. Circulation. 2010;122:1806-1814
Learning Objectives:
1. To review the existing evidence for transitional care programs in patients with heart failure.
2. To appreciate the evidence regarding transitional care programs with respect to heart failure readmissions, and mortality in patients with heart failure.
3. To review the role for collaborative care of heart failure patients following discharge from the emergency room versus following hospitalization.

Wednesday, April 12:

8:00-9:00  B6-115 UH
OTN Event #: 63528087
Learning Objectives:
1. To develop a systematic approach to device tracings.
2. To discuss interesting case examples.
3. To review programming features and troubleshooting.
**Thursday, April 13:**
