

Competence Committee Chairs

VIRTUAL FORUM | Wednesday, Sept. 22 | 11-12:30 EST

Pearl and pitfalls in group decision making: avoiding the swamp of biases and conflicts

1. Outline common pearls and pitfalls of group decision making for competence committees (CC)
2. Identify evidence informed strategies to mitigate common biases that CCs may encounter
3. Share tips and resources within the chairs forum to bring back to your CC

In recognition of the important role that you and your Competence Committee Chair colleagues play in PGME, and on behalf of the Royal College, we are hosting a series of free 90-minute virtual events to foster online learning and connection for Canadian Competence Committee Chairs. The sessions are facilitated in English but may include breakout sessions in French based on registration.

Each virtual session includes a presentation on trending topics and moderated breakout room sessions targeted at level/need. These events are designed to answer questions, identify common challenges and

share ideas. To join discussions between sessions please join our Slack group at ccchairsforum.slack.com

Together we can learn and contribute to CBD in a meaningful and collaborative manner.

By bringing you together we hope to build, support and strengthen ties in this new and growing community of PGME leaders.

Building a Network of Competence Committee Chairs – It Takes a Village

Nov 26, 2020
