Or, you can open <u>https://teams.microsoft.com/</u> directly in your browser or open the desktop app. Below is a screenshot of the desktop app.

The chat feature functions like Slack, so you can have a separate individual or group chat on the left-side menu. Or, if you post in a Team's channel (default page is 'Posts' when you go to a team), you can also direct a message at someone using '@' and then typing in their name. They will get a notification within the app and an email too if default notification settings are in place.
