Program Description

The Resident Training Program in the Management of Spasticity is a national educational initiative designed to enhance residents' experience with the treatment and management of spasticity. It is intended for Canadian PM&R and Neurology Residents in their final training years.

Program Objectives

By the end of the program, it is expected that resident will have an increased understanding of, and experience with, the treatment and management of spasticity including pathophysiology and specific treatment modalities.

Program Eligibility

The Resident Training Program in the Management of Spasticity is open to Canadian PGY 4 and PGY 5 residents of PM&R and Neurology. Enrolment is limited to 50 residents on a first-come-first-serve basis.
