A NEW AGE IN DENTURE MAKING
DR. JOSEPH MASSAD

PROGRAM OUTLINE
Successful denture making is a culmination of accurate data collection and contemporary impression techniques that result in a denture that is compatible with the patient’s physiology. A paradigm shift in record making allows the provider to increase accuracy while eliminating the fear of delivering a case with mismatched occlusion. Dr. Massad’s unique approach to impression-taking provides stable and sustainable results regardless of changes in musculature and neurological deficits. With the use of slides and videos, Dr. Massad will discuss implant cases that include jaw recordings, implant placement and prosthetics placement. With the latest evidence-based studies, you will feel confident delivering removable prosthetics to your patients.

LEARNING OBJECTIVES
- Learn the methods of assessment, including the use of an iPad app
- Learn the advancements in impression techniques that will allow the clinician to determine denture retention at time of impression
- Learn the framework for both vertical and horizontal record taking
- Learn how to optimize esthetics with a 5-minute shell teeth review
- Learn how the neutral zone provides a natural feeling denture

ABOUT THE SPEAKER
JOSEPH MASSAD, DDS

Dr. Massad is in private practice in Tulsa, Oklahoma. He also holds faculty positions at Tufts University School of Dental Medicine in Boston, Mass; the department of Comprehensive Dentistry at the University of Texas Health Science Center Dental School in San Antonio, Texas; Adjunct Associate Professor, Department of Restorative Dentistry, Loma Linda University; Associate Professor in the Department of Prosthodontics, the University of Tennessee Health Science Center, College of Dentistry, Memphis, Tennessee and Clinical Assistant Professor, University of Oklahoma College of Dentistry, Oklahoma City, OK.
