Tooth or Implant – What Do You Prefer?

DR. LIRAN LEVIN

PROGRAM OUTLINE

The perio-prosthetic implant treatment plan is based on the evaluation of the tooth prognosis versus the anticipated long-term survival of an implant. Consequently, the use of osseointegrated implants has become the foundation for tooth replacement, including diseased teeth. Unfortunately, 30-50% of implant cases will exhibit peri-implant diseases, which presents an important aspect of informed consent for our patients.

In order to evaluate a tooth prognosis, prevent and treat peri-implant diseases, there is a need to understand the risk factors and sequelae of the disease. We, as dental professionals, should avoid basing our treatment options on thoughts and beliefs and rely on evidence-based practice. This lecture will provide an evaluation of our paradigms, beliefs and knowledge for both tooth prognosis evaluation and long-term implant success. By reviewing treatment planning dilemmas, the causes and risk factors of peri-implant diseases, ways to prevent its occurrence and the currently available treatment options, you will leave this lecture with the knowledge to manage this current and prevalent issue.

LEARNING OBJECTIVES

▪ To understand the prognostic systems for teeth and implants, including the risk factors and prevention methods of peri-implant disease
▪ To explore treatment alternatives for periodontally involved teeth
▪ To understand peri-implant disease: its definition and prevalence
▪ To apply an evidence-based approach to determine the best treatment options for teeth with questionable prognosis, and the surgical and nonsurgical options for peri-implant disease

ABOUT THE SPEAKER

LIRAN LEVIN, DMD.

Professor Liran Levin is the Head of the Periodontology Division at the Faculty of Medicine and Dentistry at the University of Alberta. He is also a visiting professor at the Harvard School of Dental Medicine, Boston, MA. He received his DMD degree with distinction at Tel Aviv University and completed the Post Graduate Periodontology Program at the Department of Periodontology, Rambam Health Care Campus. He also received his Periodontology Specialist Certificate from the European Federation of Periodontology and is a Fellow of the Royal College of Dentists of Canada in Periodontology.

Prof. Levin serves as an Associate Editor for the International Dental Journal, Scientific Associate Editor for the Quintessence International, Associate Editor for the Dental Traumatology and as an Editorial Board Member and a manuscript reviewer for some of the leading international professional Journals in the fields of periodontology, dental implants, dental trauma and general dentistry. He has published more than 230 articles and book chapters in the international professional literature and is involved in research mainly in periodontology, dental implants and dental trauma. He has been lecturing extensively both nationally and internationally in the fields of dental implants and periodontal diseases.
