ZLS – A New Class of Restorative Material
BOBBY CHAGGER, DDS

PROGRAM OUTLINE
Digital Dentistry has contributed to many advancements in dentistry. In particular, CAD/CAM dentistry was the initiator for the development of a Zirconia Lithium Silicate (ZLS) restorative material. The goal of every practitioner is to utilize a restorative material that is extremely strong, not prone to fracture, and beautiful aesthetically. The incorporation of Zirconia with glass ceramics has led to a new class of restorative material and is commonly referred to as Zirconia Lithium Silicate (ZLS). ZLS, also called Celtra DUO, and is available in many dental environments. Celtra DUO is available in the dental environment as a clinical chairside CAD/CAM material, and traditional laboratory or CAD/CAM laboratory processing environments. The end result being a material that is available to all dentists, regardless of the fact if a digital impression system was utilized. Celtra DUO, a hybrid porcelain, has unique and remarkable aesthetic characteristics with class leading material characteristics.

LEARNING OBJECTIVES
- To review the indications and benefits of the incorporation of a ZLS material in the clinical sphere.
- To integrate the aspects of Digital Dentistry necessary to create clinical excellence.
- To review this unique approach to practice development as it is coupled with Celtra DUO and Digital Dentistry.

ABOUT THE SPEAKER
BOBBY CHAGGER, DDS

Dr. Bobby Chagger graduated from the University of Waterloo and obtained a DDS from the University of Toronto. He is focused on enhancing clinical quality through the thoughtful use of advanced dental technology. Dr. Chagger has a deep clinical interest in Chairside Economical Restoration of Esthetic Ceramics (CEREC) and Implantology, which has led to roles as a CEREC Educator and CEREC Software Beta Tester. He is frequently invited to publish articles and to speak to global audiences on issues related to the future role of technology in dentistry. Dr. Chagger has a unique business approach which led to the creation and expansion of Chagger Dental, a multi-office practice with locations across Southern Ontario. Chagger Dental emphasizes CEREC and Implantology, and uses state of the art dental technology to facilitate clinical quality and exceptional business results.
