Thursday, January 24, 2019
12:00 — 1:00pm (lunch at 11:30am)
Auditorium B, University Hospital

Deciphering the Molecular Code in Myeloid Malignancies

Objectives:

- Learn about the various significant mutations in myeloid malignancies
- Explain the clinical relevance attached to these mutations
- Discuss the potential clinical impact in prognosis and treatment

Dr Uday Deotare is Hematologist, the Assistant Director of the Blood and Marrow Transplant Program at the London Health Sciences Centre as well as an Assistant Professor in the Department of Medicine, Schulich School of Medicine and Dentistry at University of Western Ontario.
