12:00 — 1:00pm
Auditorium B, University Hospital

Hypertension in 2019: Using Informatics to deliver Specialty Level care to the Masses

Objectives

1. Describe the current state of hypertension care in Ontario

2. Discuss how an Informatics approach might be applied to current HTN guidelines

3. Present the methods for a pilot study engaging patients in their HTN care using internet survey methodology

Dr. George Dresser is an Associate Professor at the Schulich School of Medicine and Dentistry, Western University in the divisions of Clinical Pharmacology/ Toxicology and General Internal Medicine.
