Practical Approaches to Addiction Medicine for the Generalist Physician

Objectives:

Identify patients with alcohol use disorder who would benefit from naltrexone, acamprosate and/or gabapentin

Identify patients with opioid use disorder who would benefit from a conventional, micro-dosing or macro-dosing buprenorphine induction

Identify patients with opioid use disorder who would benefit from methadone and/or slow-release oral morphine

Identify patients with stimulant use disorder who would benefit from Onaltrexone, bupropion and/or mirtazapine

Identify patients with benzodiazepine use disorder who would benefit from a structured benzodiazepine tapering protocol

Identify patients with cannabis use disorder who would benefit from gabapentin and/or varenicline

Dr. Chris Byrne

Dr. Byrne is a consultant emergency physician at London Health Sciences Centre and St. Joseph's Health Care London and an assistant professor in the Department of Medicine at the Schulich School of Medicine & Dentistry, Western University. He has an outpatient practice in addiction medicine and sees patients across Ontario.

The Medical Grand Rounds at University Hospital is a self-approved group learning activity (Section 1) as defined by the Maintenance of Certification program of the Royal College of Physicians and Surgeons of Canada.

Evaluations will be sent out and your attendance calculated automatically through One45.
