CURRENT RESEARCH OPPORTUNITY FOR PHD APPLICANTS

Posting Identification #: 201909017
Graduate Program: Epidemiology and Biostatistics with a Collaborative Specialization in Biostatistics
Research Cluster(s): Biostatistics
Supervisor(s): Yun-Hee Choi
Supervisor's Affiliations: Department of Epidemiology and Biostatistics
Vacancies: 1
Term: 4 Years
Description: Seeking one to two doctoral students to work in statistical methods for developing joint models for correlated survival outcomes with genetic data. The students will develop and evaluate the joint models for various types of events and their dynamic prediction accuracies using the data from families at high genetic risk and via simulation studies. I am looking to work with students with strong statistics background and computational skills. Funding will be available.
To Apply: Applicants must independently apply to the Epidemiology and Biostatistics PhD graduate program using the online Western application portal, including a clear reference to this research project, using the posting identification number, in the Statement of Academic Interest.
Application Deadline: January 15
Contact Information: Questions regarding the application process, or inquiries about the Epidemiology and Biostatistics program may be addressed to the Academic Programs Coordinator.

Questions about this posting may be addressed to Yun-Hee Choi (ychoi97@uwo.ca).
