CURRENT RESEARCH OPPORTUNITY FOR PHD APPLICANTS

Posting Identification #: 201909001

Graduate Program: Epidemiology and Biostatistics

Research Cluster(s): Health Services Research, Chronic Disease and Multimorbidity

Supervisor(s): Amit Garg MD, FRCPC, PhD

Supervisor's Affiliations: Department of Medicine - Division of Nephrology
Department of Epidemiology and Biostatistics

Vacancies: (Number of students you are seeking for this specific position)

Term: 4 Years

Description: Seeking a Doctoral student to work with an interdisciplinary team of physicians, epidemiologists, biostatisticians, patients and policy-makers to improve the practice of living kidney donor transplantation. The student will develop research skills (e.g. analysis of large healthcare databases) and business skills (e.g. communicating research to patients and policy-makers). Prior graduate students' projects have had a substantial impact advancing the practice and safety of living kidney donation (e.g. NEJM 2014, BMJ 2012).

To Apply: Applicants must independently apply to the Epidemiology and Biostatistics graduate program using the online Western application portal, including a clear reference to this research project, using the posting identification number, in the Statement of Academic Interest.

Application Deadline: January 15

Contact Information: Questions regarding the application process, or inquiries about the Epidemiology and Biostatistics program may be addressed to the Academic Programs Coordinator.

Questions about this posting may be addressed to Sean.Leonard@ices.on.ca
