

Enhanced Skills Orientation Session

July 6, 2018

Department of Family Medicine

Daniel H. Grushka, BSc., MSc., MD, CCFP(EM)

Associate Professor & Enhanced Skills Program Director

Program Vision

- The current vision of the Enhanced Skills Program is to provide residents with additional training in specialized fields of family medicine for a duration of 6 to 12 months in length.
- The aim is to attract ***exceptional residents*** who want to be leaders in these sub-specialized fields of family medicine while still adhering to the guiding principles of family medicine.
- It is our hope that these residents will then attempt to encompass these new skills within the practice of family medicine

See no evil, hear no evil, speak no evil....
