ONTARIO

Byron Family Medical Centre

Dr. Sonny Cejic grew up in Windsor before coming to London to study at Western University. He graduated with a MSc (Reproductive Physiology) and BEd (High School). He then attended medical school in Toronto, graduating in 1996. Dr. Cejic returned to Schulich Medicine & Dentistry for family medicine residency and completed two six-month rotations at the Byron Family Medicine Centre. He stayed on at Byron Family Medicine Centre after residency and covered each team for several months before settling.

Dr. Cejic has an interest in technology, especially the use of computers in medicine (Medical Informatics) and electronic medical records. This passion has led him to help design/author medical websites and teach about Medical Informatics to both residents and faculty and to help the urban medical centres use electronic medical records. Dr. Cejic is a member on several provincial IT committees.

Dr. Cejic is happily married with two teenage daughters and two Italian water dogs. In his spare time he enjoys spending time with family, especially relaxing at the cottage and boating.

At the Schulich School of Medicine & Dentistry, you're more than just another resident. We specialize in training comprehensive family physicians and future leaders in family medicine. We do this through a highly adaptable program that includes tailor-made curriculum and educational programs for residents.
