

GRADUATE STUDIES 2023/24 INFORMATION SHEET

PATHOLOGY AND LABORATORY MEDICINE

GDip

Graduate Diploma program in Pathology and Laboratory Medicine bridges undergraduate and advanced graduate training. The aim of the program is to develop and expand student's research skills, and to facilitate developing tomorrow's scientists who will make significant contributions to the advancement towards the understanding of disease.

Students in the Graduate Diploma program carry out mentored, intensive basic science research in the laboratory of a graduate faculty member. In addition to developing and expanding research skills, students enroll in courses specifically designed to introduce them to research terminology, theoretical research underpinnings, modern experimental models of human disease, and critical appraisal of scientific literature.

CAREERS

Graduate Diploma aims to develop competencies, techniques and expertise in biomedical research that is recognized both nationally and internationally. Our graduates will have the opportunity to select a diverse set of careers including academia, government, and pharmaceutical industry.

GRADUATE STUDIES 2023/24 INFORMATION SHEET
