

Novell Migration Cutover

As you are aware, we have been working to migrate our data from our current Novell eDirectory environment to Western's Active Directory

The cutover target date is this **Friday June 15**. Someone from Schulich Information Services should have dropped by and added your workstation to the Western system (domain). If your computer hasn't been added and prepared for the switch please email the helpdesk at helpdesk@schulich.uwo.ca and provide your full name, Western ID, computer tag and location.

Note: Every effort was made to complete the preparations while you were present, however, if you were not available a sticky note was left to indicate it had been completed.

At approximately 5:00 p.m. on Friday June 15, we will be disabling access to the network drives in order to complete a final synchronization of data, this means you will not have access to your network drives until Monday morning.

We ask that you please shutdown your workstation at end of day Friday June 15th.

If you have any questions, please contact the Help Desk at helpdesk@schulich.uwo.ca or x81377.
