

Dental Curriculum Equivalency Summary Form

Once completed save this file with your name in the following format: "Last name, First Name DDS Equivalency Summary" and upload to your application.

Applicant Name (Last name, First Name) as indicated in application: _____

Current Dental School: _____

Provide a summary, in the table below, of all courses you have taken that you wish to be considered for equivalency to meet each of Schulich Dentistry's 1st year courses.

Schulich Dentistry 1 st Year Courses	Course(s) for Equivalency Consideration
	List each course in this format: Course Code_Course Name_ Institution Example: DBS 8220_Pharmacology I_Detroit Mercy
<p>5102 Dental Pharmacology: A component of the General Medicine unit, this systems-based course runs sequentially with Human Physiology, Systemic Anatomy, Pathology and Medicine, and will cover those pharmacological concepts and the actions of drug classes relevant for dental clinicians. Lectures 36 hours</p>	
<p>5125 Operative Dentistry: An introduction to operative dentistry that lays the foundation of fine psychomotor skills, knowledge, and professional deportment. Particular emphasis is placed on the principles and execution of prevention, operative field management, minimal intervention, cavity preparation and restorations. Lectures 24 hours; Clinic 84 hours</p>	
<p>5130 Occlusion: This course is an introduction to concepts of occlusion designed to provide the student with a basic understanding of the fundamentals involved. The course content is coordinated with Operative Dentistry and Dental Anatomy. Lectures 6 hours; Labs 72 hours</p>	

<p>5131 Dental Anatomy: This course introduces the student to basic dental terminology, and to the eruption and macroscopic anatomy of the teeth. The course content is coordinated with Oral Histology and Occlusion. The content of this course was previously included in D5130 Occlusion. Lectures 17 hours; Labs 37 hours</p>	
<p>5140 Oral Histology: An introduction to the composition, function and development of diverse tissues in the oral cavity and related structures. The goal of the course is to prepare the student to become competent in understanding and interpreting the normal histological structures of the oral cavity. Lectures 24 hours; Labs 24 hours</p>	
<p>5144 Biomaterials: This course provides first year dentistry students with foundation knowledge associated with dental materials science. The goal of the course is to enable students to understand biomaterial concepts presented in other clinical courses. Lectures 14.5 hours</p>	
<p>5160 Systemic Anatomy: A component of the General Medicine Unit, this systems-based course runs sequentially with Human Physiology, Pathology, Pharmacology and Medicine. It will cover systems-based human anatomy. Lectures 21 hours; Labs 5 hours</p>	
<p>5161 Human Physiology: A component of the General Medicine Unit, this systems-based course runs sequentially with Systemic Anatomy, Pathology, Pharmacology and Medicine. 42 dedicated hours</p>	
<p>5162 Pathology: A component of the General Medicine Unit, this systems-based course runs sequentially with Human Physiology, Pharmacology, Systemic Anatomy and Medicine. The course examines specific aspects (etiology, clinical presentation, macroscopic and microscopic features, and pathogenesis) of common human diseases relevant to the practice of dentistry. Lectures 23 hours</p>	

<p>5165 Medicine: A component of the General Medicine Unit, this systems and case-based course runs sequentially with Systemic Anatomy, Pathology, Pharmacology and Human Physiology, and covers the management of medical conditions as they relate to dentistry. Lectures 38 hours</p>	
<p>5170 Oral Diseases: An integrated course covering the common diseases of the teeth, periodontal and periapical tissues; specially caries, gingivitis, periodontitis, pulp disease, periapical inflammation, regressive dental conditions, and dental anomalies. Lectures 43 hours; Labs 1 hour</p>	
<p>5185 Core Biology: This course is a series of modules introducing the dental student to fundamental concepts related to various conditions and diseases. Lectures 46 hours; Labs 4 hours</p>	
<p>5186 Head and Neck Anatomy: This course covers the macroscopic anatomy of the head and neck using prosected specimens, with particular emphasis on those areas relevant to the practice of Dentistry. The course content is coordinated with related topics in Oral Histology. Lectures 26 hours; Labs 15 hours</p>	
<p>5187 Patient Assessment: This integrated course introduces the student to history taking, clinical examination and record keeping. Lectures 24 hours; Clinic 19 hours</p>	
<p>5188 Clinical Procedures I: This is an introductory course to basic dental procedures including impressions and models, basic periodontal procedures, and intraoral radiography. Lectures 15 hours; Clinic 16 hours</p>
