

## PGME COMMITTEE MEETING

Minutes      Date: February 10, 2016      Time: 7:00-8:00am      Location: HSA 101

Meeting called by	Dr. Chris Watling, Postgraduate Medical Education Associate Dean
Attendees	C. Akincioglu, J. Binnendyk, K. Faber, V. Hocke, J. Howard, M. Jenkins, S.-L. Kane, M. MacPherson, K. Nitz, M. Ott, M. Prefontaine, S. Rumas, A. Sarpal, A. Sener, S. Venance, J. Wickett
Note taker	Megan Baxter, <a href="mailto:megan.baxter@schulich.uwo.ca">megan.baxter@schulich.uwo.ca</a>

### Agenda Topics

#### 1. CBME Progress Report Dr. S. Venance

Discussion	<ul style="list-style-type: none"> <li>. CBME is likely to add pressures for Program Directors and require faculty development for assessment and documentation of competencies. How increased time could be funded, recognized and/or shared amongst several faculty members in any given program was discussed. Administrative and IT support will likely be needed, either within programs or centrally at the PGME office.</li> <li>. Concerns were raised about finding the time and willing faculty to take on CBME-centered roles, when education is not as valued when it comes to advancement. The pressure on producing results in research has led to a decrease in education as a priority for individuals.</li> <li>. The planning and implementation of CBME will likely need a much larger amount of time and support than it will after it is well established.</li> <li>. Program directors are encouraged to think about the resources they will need, the faculty and admin time that might be necessary, and what would help get faculty on board with the coming changes.</li> <li>. The general consensus was that there would need to be both funding and increased recognition for educational work.</li> </ul>
------------	---

#### 2. SURGICAL CLOSURES Dr. C. Watling

Discussion	. Dr. Watling has consulted with Margaret Steele. There is currently no one on the relevant committees with an educational agenda. However, as the hospitals are restructuring, there
------------	---

	may be an opportunity to bring a voice for resident education to the table.
3. MCCQE PART II RESULTS	
	Dr. C. Watling
Discussion	<ul style="list-style-type: none"><li>. Breaking down the numbers over the past ten years, last year's results for Schulich were slightly lower than the national average, but not dramatically.</li><li>. Pass rate was 92% for CMGs, but only 56% for IMGs. How to aid those most in need of it in preparation for the exams was discussed.</li><li>. An academic half-day as an information and preparatory session was proposed, including having residents relate personal experiences with the exam.</li></ul>
4. INTERNAL REVIEWS	
	Dr. C. Watling
Discussion	<ul style="list-style-type: none"><li>. An update on the Internal Review cycle that is underway was given, detailing which programs had already been reviewed, and what would be expected in terms of follow-up from departments.</li><li>. Thanks were extended to those who have already participated in the process.</li></ul>
5. CPSO REQUIREMENT FOR EPP SCREENING TESTING	
	Dr. C. Watling
Discussion	<ul style="list-style-type: none"><li>. Occupational Health at the hospitals has decided that they will do the testing, but they need to have a doctor of record to order the testing. This raises privacy/confidentiality issues for residents.</li><li>. It was discussed whether or not the physicians at Occupational Health could order it. The other option raised was to do it through LEW.</li></ul>
9. AJOURNMENT AND NEXT MEETING	
Date and time	The meeting was adjourned at 8:00 am. Next meeting scheduled for <b>Wednesday, March 9th, 2016, 5:30-7:30pm, Sunningdale Golf and Country Club</b>
