

CLINICAL ENCOUNTERS TRACKING AT MID-ROTATION

Academic Year 2018 – 2019

As per Accreditation Standard 8.6e, “The completion of the required patient encounters and procedures of each medical student is monitored during all required clinical learning experiences. These data are discussed with the student at the mid-point of a required clinical learning experience by the student’s preceptor, director of the required clinical learning experience, site director or designated faculty member. The student’s clinical experience is appropriately altered if needed to optimize completion of the required patient encounters and procedures.”

I have reviewed this trainee's clinical encounter tracking completed by mid-rotation. *	<input type="checkbox"/> Yes	<input type="checkbox"/> No
This trainee's clinical encounter tracking is up-to-date and appropriate for this stage of the rotation. *	<input type="checkbox"/> Yes	<input type="checkbox"/> No
Please provide any additional comments about this trainee's clinical encounter tracking.
