

Non-credit Pre-clerkship Summer Electives – System Access and Research Requirements

Prior to starting your elective please connect with the preceptor and/or physician to discuss whether you will need “Medical Student” access to Cerner Powerchart as part of the Electronic Health Record system for your role.

There is time required to 1) submit the access request and any additional documentation and 2) provide you with the necessary training required to use the system or enter a research area. The goal is to complete these steps prior to starting your elective.

If the preceptor and/or physician would like you to have systems access, please email the appropriate person as listed below and cc the preceptor and/or physician:

- Non-credit Pre-clerkship Summer Clinical Elective (NPSCE) - email [Jennifer Joyce](#), Medical Affairs
- Combined Non-credit Pre-clerkship Summer Clinical and Research Elective (NPSCRE) - email [Jennifer Joyce](#), Medical Affairs
- Non-credit Pre-clerkship Summer Research Elective (NPSRE) - email [Sharon MacDonald](#), Lawson Research

Systems’ training is organized through Medical Affairs. Once you have requested the access connect with [Jennifer Joyce](#) to arrange.

Research Elective: Please note that if you are in a Research stream you and the preceptor and/or physician will be contacted by Lawson prior to complete additional documentation and you may be required to complete additional training.
