September 10, 2019  
Dr. Rosemary Bagot, McGill University  
Assistant Professor & William Dawson Scholar  
Department of Psychology  
“Circuit mechanisms of resilience and susceptibility”

October 1, 2019  
Dr. Mark T. Wallace, Vanderbilt University  
Dean of the Graduate School  
Louise B. McGavock Endowed Chair in Neuroscience  
Professor of Hearing & Speech Sciences, Pharmacology, Psychology and Psychiatry  
“Adventures in Multisensory Science: From Single Neurons to Autism”

November 19, 2019  
Treva Glazebrook Lecturer:  
Dr. Li-Huei Tsai, Massachusetts Institute of Technology  
Professor and Director of the Picower Institute for Learning and Memory  
“Network level approaches to studying Alzheimer’s disease”

December 3, 2019  
Dr. Eiman Azim, Salk Institute for Biological Studies  
Assistant Professor, Molecular Neurobiology Laboratory  
William Scandling Developmental Chair  
“Feedback circuits for dexterous forelimb movement”

February 25, 2020  
Dr. Jennifer Steeves, York University  
Associate Dean Research & Graduate Education, Faculty of Science  
Professor, Department of Psychology  
“Audiovisual plasticity following long term monocular deprivation”

March 24, 2020  
Dr. Numa Dancause, University of Montreal  
Associate Professor, Department of Neuroscience  
“Premotor cortex organization and reorganization after brain lesion”

April 21, 2020  
Dr. Khaleel Razak, University of California, Riverside  
Professor, Psychology and the Graduate Neuroscience Program  
“Mechanisms and biomarkers of sensory hypersensitivity in Fragile X Syndrome”

May 12, 2020  
Dr. Sarah Certel, University of Montana  
Associate Professor, Division of Biological Sciences  
“Fighting flies: Octopamine neuron dependent aggression requires dVGLUT in dual transmitting neurons”
