

Read this email carefully – a copy of it is posted on the [Neuroscience Course Selection website](#). Do not reply by email with questions that might arise – **Please direct all questions to the [BMSUE Question Portal](#)**.

Enrollment dates/times: will be posted in your Student Center by **end of day on Friday, July 14** and cannot be changed.

Review the information for **Year 2 course selection** on the [Neuroscience Course Selection website](#).

Weighing your options when choosing between Psychology 2811A/B and 2812A/B, or Biology/Statistics 2244A/B and Computer Science 2120A/B

Students interested in keeping open the option of applying to Year 3 BMSc (or any basic medical science Major that has a senior statistics requirement) must take either Biology or Statistics 2244A/B. Special permission will NOT be granted to use Psychology 2811A/B and 2812A/B or the former Psychology 2810 in lieu of Biology/Statistics 2244A/B in any other basic medical science module.

Constraints – priorities, restrictions and reserved spaces in courses: Visit [Access to Courses](#) for information describing enrollment constraints on basic medical sciences courses. Here you can find constraint charts describing what kind of access a student can expect to a particular course based on their module/program during the enrollment period. A video is available from the summer of 2021 that offers a comprehensive explanation of constraint charts, enrollment periods, and using the wait lists for courses.

Special permission to register in courses without prerequisites, with timetable conflicts, in an increased/imbalanced:

Information is located on the Academic Counselling Office's [webpage for Special Permissions](#).

Back-to-back classes: Although it appears as though classes run for a full hour, there will be time for you to get from one class to the next since classes end at 20 after the hour, e.g., a class that runs from 9:30-10:30 will end at 10:20.

Be flexible:

The schedule you plan may require revisions as sections of courses may fill before your enrollment date/time. Review the enrolment status of your desired suite of courses before your enrolment time so you can be more agile with adjusting your timetable after your appointment time opens.

DO NOT: email me if the sections of the course you want fill up and you cannot register. I do not belong to a department that offers courses and I don't have any authority/control over the enrollment capacities in courses. Only the [departments offering the course](#) should be contacted but DO NOT contact departments unless you have exhausted all possibilities.

Zoom meeting availability. See the [Connect with a BMSUE Coordinator page](#) for my availability and ways to get in touch. I have **weekly zoom drop-in sessions** on Mondays and Thursdays. Feel free to attend if you have any pressing questions. Please note that this is an exceedingly busy time of year and

there may be a wait to see me. Please be patient and I will invite you in from the waiting room as soon as I am able.
