The One Health Approach and Cannabidiol (CBD)

• CBD is a phytocannabinoid and the second most prevalent component of cannabis.

• Goal: Investigate the potential beneficial and/or adverse effects of CBD on humans, other animals, and the environment

• Main Objectives: Use a one health approach to conduct a
  1. Research project
  2. Literature review
  3. Stakeholder map

- High energy consumption
- Water intensive
- Seizure management
- Relieve osteoarthritis pain
- Anxiety
- Chronic pain
- Epilepsy
