"Multimodality Treatment of Breast Cancer: Translational Studies of Polo Like Kinase 4 (PLK4) Inhibition and Radiotherapy."

Dr. Armen Parsyan, MD, PhD, DSc, MPH, FRCSC
General Surgeon and Breast Surgical Oncologist, London Health Sciences Centre
Assistant Professor of Surgery and Oncology, Department of Surgery, and Oncology, Schulich School of Medicine & Dentistry.
Clinician-Scientist, Lawson Health Research Institute

Objectives:
- to learn about the role of multimodality chemo and radiation therapy in breast cancer
- to understand the role of patient-derived models in translational studies in breast cancer therapy
- to learn about PLK4 inhibition as a strategy to augment effects of radiation in breast cancer
